S'ide Legion Branch Holds Monthly Meeting

President G. Lorne Monklye presided at the regular monthly meeting of the Summerside Branch of the Canadian Legion held in the Home last evening with approximately 100 members present.

It was revealed by secretary-manager, Comrade James Hogan, that a drive to duplicate the present membership of the Canadian Legion in Canada is to be held during the next two years, with the objective being 500,000 members. The present local campaign, from September 1st to October 15th has as its motto "Every Member - A New Member." and Comrade Hogan asked each member to make certain he brings in a new member during that period. The objective of the Summerside Branch is 500, but this mark is expected to be reached easily as there are now 474 paid up members, which includes 46 new applications which were approved by the meeting.

This is the largest number of applications ever brought in at a meeting of the Summerside Branch and Comrades Frank Savidant and Vince Savidant were instrumental in getting a large percentage of these.

Comrade Hogan pointed out the objects and aims of the Canadian Legion and related many of the services provided by this large organization. He stated that a drawing will be held for two Cadillac cars, to assist in promoting the national membership campaign and each Legion member, new or old, will automatically be eligible for the draws, which will take place July 1, 1957 and July 1, 1958 at Dominion Command headquarters in Ottawa.

The reports of standing and special committees were given with Comrade Charles Hogan reporting that the Sea Cadet committee, of which he has been chairman, have made arrangements with the School Board for new quarters for the cadets in the High School consisting of the old library and a classroom.

Before adjournment a motion was approved for the appointment of a committee to investigate the possibility of getting mail street delivery in Summerside.

STUDY VOLTAGE PROBLEMS OTTAWA (CP)—About 70 scientists and engineers from many countries met in Ottawa Monday to start a three-day international meeting to study high voltage problems. The symposium, sponsored by the National Research Council, will deal with such problems as long distance transmission of power in Canada and abroad.

THE "PERSISTENT CHURCH" was the theme of the sermon which had for its text, "Jesus Christ the same yesterday, and today and forever." (Hebrew 13:8). These words are the keynote of these celebrations. Changes come through the years but the gospel remains the same and is the one answer to man's need and the one assurance of salvation from his sin. A living church must have a membership whose hearts are afire with a divine enthusiasm to win men and women and young people to Christ. The miracle of the Christian gospel is that through all the years it has

been changing human nature. There is no one who is beyond redemption.

The Tryon Community Choir led the evening worship of praise, and in doing so contributed richly to the worship of God. Special selections rendered were a solo, "Bless This House" by Mr. Norman MacDonald; a male octette, (Messrs. Arthur MacKay, Austin Smith, Roy Dawson, Norman MacDonald, Otto Johnson, George Robblee, Sheldon Howatt and Arthur Simmons) "For You I am Praying." "A ladies' trio (Mrs. George Robblee, Mrs. Asher Howatt and Mrs. Ray Wood) "Cleanse Me," the anthem, "Fear Thou Not," male octette, "Tell someone about Jesus;" the organist was Mrs. Allison Lea. It was a matter of regret that the director, Dr. Peter MacDonald, was unable to be present.

In the evening sermon the minister called to remembrance the worthy churchmanship of many members of this church in the past, and told the story of the Gordons of Erromanga, members of this congregation who became the first martyrs of the Canadian church. He reminded his congregation that they have the past to inspire them, the present to challenge them and the future to beckon them toward things even greater than those done before.

At the close of the service members of the guest choir and the choir of the church were entertained at a social hour in the church hall.

Lions Club Will Be On The Jump

The next few months should prove to be busy ones for the members of the Summerside Lions Club.

At their regular dinner meeting on Wednesday evening, plans were initiated for quite a number of activities. These will include the formation of a Lionettes Club giving the members wives an opportunity to share in the work of their husbands. Lion Herbert Schurman will be busy in his capacity as representative of the Lions Club on the rink commission.

Other busy Lions will be Wendell Rogers as chairman, Layton Schurman as vice chairman and Reg MacLellan as executive of the Navy League of Prince Edward Island. Lions Ross LeFurgey, Martin MacKenna and Thane Baglole were appointed as officers of the club-sponsored Sea Cadets. Also, the club as a whole will enter into several fund raising projects to further their good work in Summerside.

BLIND APPEAL

King Lion Russ Kelly reported on a Canadian National Institute for the Blind executive meeting which he attended in Charlottetown. He brought back to the club the congratulations of the institute executive on the work of the Summerside Lions during last year's financial campaign for the blind. The work of the Lions Club and the response of the people of Summerside was described as "tremendous". As the club has taken on this work as an annual project, it will soon be time for the members of the club to go to work on this year's appeal.

On a lighter note, a social evening for the Lions and their wives was planned for the near future. There is no one who is beyond redemption.

The Tryon Community Choir led the evening worship of praise, and in doing so contributed richly to the worship of God. Special selections rendered were a solo, "Bless This House" by Mr. Norman MacDonald; a male octette, (Messrs. Arthur MacKay, Austin Smith, Roy Dawson, Norman MacDonald, Otto Johnson, George Robblee, Sheldon Howatt and Arthur Simmons) "For You I am Praying." Telephone Plant Chief Honored On Retirement

Leigh Stewart, former plant chief with the Island Telephone Company at Summerside, was tendered a reception at Summerside restaurant after 30 years of service with the telephone company. Mr. Stewart joined the company at Charlottetown on April 1, 1916, and came to Summerside in 1924 as plant chief for the western end of the island.

In April of 1954 he suffered a heart condition, and this year was compelled to retire from active service with the company. In his years of employment in Summerside, Mr. Stewart has seen vast changes made in the telephone system and service, which has, in the intervening years, increased in Summerside from less than 500 phones to a present total of 2,650.

At the reception, presentations by Mr. E. G. Cameron, plant superintendent at Charlottetown, were made to Mr. and Mrs. Stewart on behalf of the employees of the Island Telephone Company.

Following a buffet lunch, music was supplied by the orchestra of Ted Ahern.

Let's Talk It Over

Everyone has heard of the absent-minded Professor. A good many jokes have been built around this particular weakness of his. In one sense, it is not a weakness at all, but a strength. The professor has developed his powers of concentration to such an extent that when he is thinking deeply about a problem he is able to shut the external world completely out, and this leads to minor mishaps in his relationships with everyday trivial matters. So you see the professor's "absent-mindedness" is really an extreme form of present-mindedness. Occasionally, however, these mishaps, for the most part minor, can develop into major proportions and even end in tragedy, as when Pierre Curie, crossing a busy Paris street and apparently absorbed in a problem of physics, was struck by a truck and killed.

Children, like learned men of letters, tend to shut the world out too, but for a different reason. They sometimes become absorbed in their world of make-believe. In any case, their enthusiasm for what they are doing is greater than ours, and because of this, they are more impetuous. Recently a news commentator, remarking on the mounting toll of children traffic tragedies, expressed the opinion that something would have to be done to condition children to safer habits of play in this mad maelstrom of traffic that is a part of our modern civilization. Drivers should exercise more care undoubtedly, but we must convince the children themselves. We'd like to raise our voice again, crying in the wilderness as we may well be, to say that inevitably some day this task will fall to the lot of the little red and the big brick schoolhouse. To save it to the parents is like hiring the first twenty men you meet on the street to take the car-ferry across Northumberland Strait. It's a job for trained personnel, and involves every day drill to be effective.
