MISCELLANEOUS.

THE DEPTH OF THE OCEAN.—A very interesting letter from Capt. Denham, H. M. S *Herald*, was recently read before the Royal Society. Capt. D. is engaged in a scientific voyage and among other subjects he was particularly enjoined to endeavour on favourable occasions to ascertain the depth of the ocean. His letter gives an account of a deep sea sounding in 7,706 fathoms, in lat. 36 49 S and long. 37 6 W. The sounding was obtained on a calm day, Oct. 30, 1852, on the passage from Rio de Janeiro to the Cape of Good Hope The sounding line was 1-10th of an inch in diameter, laid into one length, and weighing, when dry, 1 lb for every hundred fathoms. Capt Denham received from Com. McKeever, of the United States' Navy, commanding the *Congress* frigate, 15,000 fathoms of this line, 10,000 on one reel and 5000 on another. The plummet weighed 9 lbs., was 11 inches long, and 1-7th of an inch in diameter. When 7,706 fathoms had run off the reel, the sea bottom was reached. The plummet was drawn up several times 50 fathoms; and after it had renewed its descent, it stopped abruptly at the original mark to a fathom and would not take another turn off the reel. The whole time taken by the plummet in descending to this amazing depth, 7.7 geographical miles of 60 to a degree, was 9 hours 24 minutes and 45 seconds. The highest summits of the Himalaya are little more than 28,000 feet, or 4.7 geographical miles above the sea The sea bottom has therefore depths greatly exceeding the elevation of the highest pinnacle above its surface. Great care was taken to show the nature of the bottom, but in reeling in, the line broke at 140 fathoms below the water line, carrying away a thermometer which had been attached to it at 3,000 fathoms. This sounding is the deepest that has ever been made on any previous occasion.

WIDOW'S DOWER.—The Legislature of North Carolina has passed a law providing that when a man dies intestate, leaving a widow and no child or children, the widow is to have one-half his personal estate. If the husband makes a will, and the widow dissents therefrom, she is to receive one-third, as heretofore.

A FACT FOR FARMERS.—Dr. R. T. Baldwin has made public the result of several years investigation and experiments upon manures, and various ways of fertilizing the soil. He states that the best and speediest way to fertilize any soil, is to cover it over with straw, bushes, or any raw material, so as to completely shade it. The surface of the earth thus being made cool, dark, damp and close, soon undergoes a chemical process like putrefaction, and becomes highly fertilized. This plan of fertilizing, he says, may be applied with success to any soil whatever, no matter how poor, and the result will be astonishing.

The North Pacific fleet, of 1853, of American whalers, it is now ascertained, comprise not less than 286 ships. This number exceeds that of any previous year, except 1846, when the fleet consisted of 296 ships.

INTERESTING FACTS.—Man has the power of imitating almost every motion but that of flight: To effect these he has, in maturity and health, 60 bones in his head, 60 in his thighs and legs, 62 in his arms and hands, and 67 in his trunk. He has also 434 muscles. His heart makes 64 pulsations in a minute, and therefore, 3840 in an hour, 92,160 in a day. There are also three complete circulations of his blood in the short space of an hour. In respect to the comparative speed of animated beings and of impelled bodies it may be remarked, that size and construction seem to have little influence, nor has comparative strength, though one body giving any quantity of motion to another is said to lose so much of its own. The sloth is by no means a small animal, and yet it can travel only 50 paces in a day; a worm crawls only 5 inches in 50 seconds; but a ladybird can fly 20,000,000 times its own length in less than an hour. An elk can run a mile and a half in seven minutes; an antelope a mile in a minute; the wild mule of Tartary has a speed even greater than that. An eagle can fly 18 leagues in an hour, and a Canary falcon can even reach 250 leagues in the short space of 16 hours.—A violent wind travels 60 miles in an hour; sound 1142 English feet in a second.

STOPPING PAPERS.—An exchange says: "When a man gets mad and stops his paper, he always borrows the next number of his neighbour, to see if the withdrawal of his patronage has'nt killed the editor and dressed the columns in mourning. This grows out of the fact, that none try to show their spite in this way but the kind of people who imagine that the world rests upon their shoulders."

The ordinary mode of churning butter in Chili, is to put the milk in a skin—usually a dog skin—tie it on a donkey; mount a boy on him with rowels to his spurs about the length of the animal's ears, and run him four-mile heats.

Wood is the thing, after all, as the man with a deal-leg said, when the mad dog bit it.

ENIGMA.

I'm the light of the eye, the support of the head;
The mouth is indebted to me for its bread.
The arms of their freedom can boast, I must own;
But woe to the legs. if I leave them alone.
I'm a friend to the Muse, and in every song
Am sure to be found on the tip of the tongue.
The ear must acknowledge, and bend to my rule;
And, without me, the nose would appear but a fool.
In every book, whether trifling or sage,
I always remain at the end of each page.
Though learn'd and polite, I dislike not a feud,
And am quite as attach'd to the chaste as the rude;
Although not a doctor, I'm fond of a fee;
And, although not a bishop, I like a good see.
I leave you to answer my riddle, good friend—
I'm in the beginning, and also the end.

J. GILLIGAN,
Great George Street.

General Post Office, Nov. 29, 1852.

BELLS! BELLS! BELLS!

THE Subscribers manufacture and keep constantly on hand, all sizes of Church, Factory, Steamboat, Ferry, Locomotive, School House and Plantation Bells, with the *best* description of Hangings.

These Bells are made from the *best* stock, and the small sizes undergo the same process in manufacturing as Church Bells. An experience of thirty years, with a great many *recent* improvements, and an entirely new method of casting, enables us to obtain the most melodious tone, combining also, in extraordinary vibration.

Nearly 9,000 Bells have been cast and sold from this Foundry, which is the best evidence of their superiority. We have fifteen Gold and Silver medals at our office, which were awarded for the "best Bell for sonorousness and purity of tone." We pay particular attention to the getting up Peals or Chimes, and can refer to those furnished by us. Our establishment is contiguous to the Erie and Champlain Canals, and Railroads running in every direction, which brings us within four hours of New York. Cash paid for old Copper. Old Clocks, Levels, Compasses, Transits, Theodolites, &c., for sale, of superior workmanship. All communications, either by mail or otherwise will have immediate attention.

A. MENEELY'S SONS.

Queen Square, March 24. 4wn19

Young Saladin for Sale.

THIS very superior Entire Horse five years old is offered for sale. He stands 15 hands 1 inch high, is of a beautiful black colour and has strong bone and sinew; he is remarkably good tempered, very gentle either in harness or saddle. His sire is the celebrated Blood Horse SALADIN imported in the year 1846 by the Royal Agricultural Society—his mother was a strong and valuable animal of the Greenwich breed and produced excellent stock. A prize was awarded to him at the Royal Agricultural Society's show in 1849, for the class of Blood horses of the Saladin Breed.

Half of the purchase money will be allowed to remain on security until the close of the next season, on approved security.—Apply at Haszard's Gazette Office. March 16, 1853.
