District Judge Charles Scoggin granted Mrs. Ford, 44, a divorce from her 45-year-old husband on the ground of mental anguish in proceedings that lasted 20 minutes.

The divorce followed by a little more than six months the formal announcement of the separation of Ford and his wife, the former Anne McDonnell of Southampton, Long Island N.Y.

Ford, grandson of the late Henry Ford, has been linked romantically with Italian - born Mrs. Maria Christina Vettore Austin, divorced wife of a royal navy officer.

NEW YORK (AP)—A windfall gift to American Telephone's 2,500,000 shareholders accompanied a renewed stock market advance Wednesday. The popular averages made historic highs once again.

The gift to A.T. and T's stock-owning family — the world's largest—came in the form of rights to buy one share of A.T. and T. common for each 20 held. The price for the new share is $100. Since the company's common stock closed Wednesday at 148½, an historic high, the rights were valuable.

By the close of the New York Stock Exchange, the rights were quoted at 2⅜ and the trading in them totalled a hefty 3,375,900.

A.T and T. common was the most active stock, an unusual distinction for this high-priced issue. It rose 2½ on turnover of 130,200 shares.

In unusually active trading for Lincoln's birthday, volume rose to 4,640,000 shares from Tuesday's 4,050,000. This was nearly 1,000,000 shares more than a year ago.

Social Environment And Mental Illness

ITHICA, N.Y. (AP) — Social environment and not size of a community determines the incidence of mental illness, a Cornell University team reported here after completing a psychological study in one of Canada's Atlantic provinces.

The team said it found that almost as large a percentage of the population suffered from psychiatric disorders in a rural Canadian county of 20,000 inhabitants as in midtown Manhattan.

From this, the researchers concluded that the risk of mental illness is governed by the degree of social stability within a community.

The risk is minimized, they said, when a community provides "the individual with a feeling that he is a worthwhile member of a worthwhile group."

WORK FOR DECADE

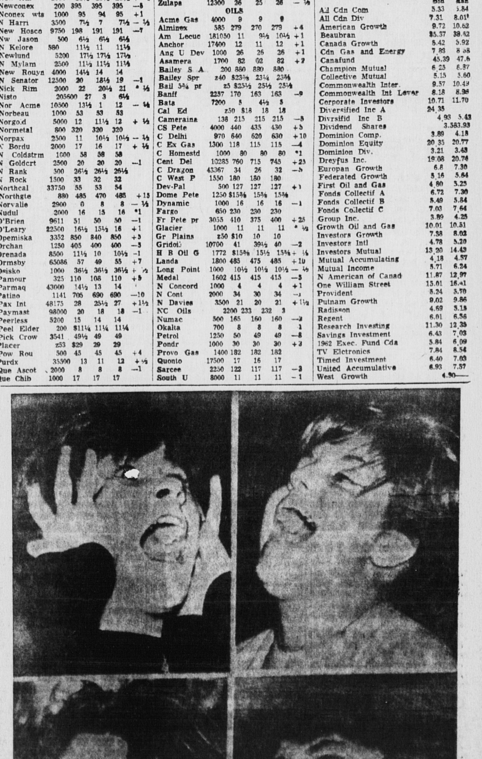
The research project was directed by Alexander H. Leighton, professor of social psychiatry at Cornell's medical college in New York City. The team devoted 10 years to the study of the Canadian county, the population of which is half English- and half French-speaking.

The county was not identified.

A survey of 1,010 persons revealed that 40 per cent of the women and 21 per cent of the men showed clear signs of psychiatric disorder, while about 25 per cent of both men and women indicated "probable" signs of mental illness.

The team concluded that about 20 per cent of the population of the Canadian county "has definite need for psychiatric help, while a larger percentage would presumably be assisted by either preventive or therapeutic measures."

A similar survey in midtown Manhattan at about the same time disclosed that 23.4 per cent of the population was in need of psychiatric help.



THE BEATLES 'SEND' THEM

Squealing and screaming girls displayed these expressions while listening to the "yeah, yeah" music of England's shaggy-haired Beatles in the Washington Coliseum Tuesday night. (AP Wirephoto).
