# THE DAILY EXAMINER.

AUGUST 30, 1879.

The Press of the United States and the National Policy.

SEVERAL American journals of late dates contain articles abusive of Sir John Macdonald and the Liberal-Conservative party because they have adopted the National Policy. These articles are republished by the Grit newspapers throughout the Dominion and are represented as independent public opinion. If American journalists were earnestly in favor of Free Trade, they would first use their influence with the politicians and Government of their own country. If they were opposed to Protection, on principle, they would at least endeavor to get their own Government to modify its exorbitant protective tariff. The opinion of the United States journalist who advocates a Protective tariff for his own country, and Free Trade for others, should be looked upon with suspicion. He writes long articles to prove that Protection is the best thing possible for Uncle Sam and the worst thing possible for any other country. The world would be perfectly governed—according to his ideas—if a Chinese wall were built around the United States, and Uncle Sam had free access into every other country. Unfortunately for them, other people and nations cannot see things in the same light. They have come to the conclusion that such a policy may be very good for the United States, but very bad for every one else. The people of the Dominion rebelled against this Yankee idea of how the world should be governed; and in self-defence elected a party to protest against it. This party, led by Sir John A. Macdonald, said: "We are willing to have, and even want, Free Trade, with our cousins, but not a jug-handled Free Trade, with all the benefits on one side. That there may be no mistake about this, we will pass an Act to admit—free of duty—into our country, any American productions that the American will admit—free of duty—into his." This seems just; but the Yankee political philosopher is not reasonable. He is vexed because the citizens of the United States have to pay a duty on the corn, coal, and oats which they send to the Dominion to compete with our farmers and miners, and consequently abuses Sir John A. and the Conservative party, and lauds Mackenzie and his party to the skies. The Grit papers, of course, publish all this. Fancy the inconsistency of an American editor abusing the Dominion Government for doing that which he praises and upholds his own Government for doing! For praising Mackenzie and his defunct Government, the American journalist has good and tangible reasons. During the five years that Mackenzie ruled the destinies of this Dominion, he did a great deal for the United States, and very little for the Dominion. That the American people should extol Mackenzie is only natural. We are doubtful if any of their own politicians did as much to benefit them during the last five years as did the Grit Premier. But why the people, whose country was brought to the verge of bankruptcy by his misgovernment, should fall down and worship him, is a mystery.

### The Boat Race.

A number of young men who went to Halifax on Monday last, to witness the Ross-Smith boat race, returned home disgusted and disappointed last evening. They report that visitors have nearly all left Halifax much dissatisfied. The St. John News has the following:—

"What, have you got back from Halifax?" asked one St. John man of another yesterday. The party interrogated had been in Halifax for three or four days. "Yes," he replied, "I came back last night because I felt that I could not afford to run the risk of staying in Halifax till Christmas in order to see the race." "Oh," replied another, "you would not wait to wait that long. If the race does not take place before then the chances are that the Halifax harbor would be frozen over, and the basin only fit for skating purposes."

"I can tell you the cause of the rough water on Bedford Basin" said one man to a number of persons in front of one of the telegraph offices yesterday.

"What?"

"The great blow that Halifaxians are making ever Smith's ability to win. It is sufficient to make a tempest in a mill pond."

The Telegraph says:—"On Thursday night, while Ross and Smith were out practicing, lots of Smith's friends gathered on the banks. They mistook Wallace for Smith, and were cheering loudly for him, some saying, 'I know it's Warren, he rows just like old George Brown,' and 'how easy he sends her along—no dip nor splash there.' They compared the men, saying, 'Ross can't row like that,' and all such remarks. Some of Ross' friends were on hand, and took the whole thing in, laughing at Smith's friends, who had all the time been looking at and cheering Wallace. They mistook Wallace for Smith in the dark."

### He Cannot Deny It.

It will be remembered that Hon. Mr. Langevin, in a recent speech before his constituency at Three Rivers, charged Hon. Mr. McKenzie with the authorship of a letter to the Manchester "Examiner," in which a most unpatriotic attack was made upon the credit of the Dominion, and an effort made to dissuade English capitalists from investing money in this country, either in private enterprises or in the great public works undertaken by the Government. The Montreal "Gazette" says: "Since that charge was made, Hon. Mr. McKenzie has addressed the people of Galt, yet neither there nor in the public prints has he denied its truth, and until he does so, he stands before the people of this country as a man who, for a petty party advantage, is ready to damage its credit, retard its progress, and hinder the development of its resources."

### THE NEWMAN HALL DIVORCE CASE.

This case has resulted in the granting of Mr. Hall's application for divorce. After the charge of the President of the Court, the jury conferred together for a few moments and then found as their verdict, that Mrs. Hall had been guilty of adultery with the correspondent, Richardson, and that the petitioner had not been guilty of adultery with Miss Wyatt. Mr. Hall is reported to have left the building amid the congratulations and plaudits of numerous friends.

## City Council.

A special meeting of the City Council was held last evening. Present: Councillors Beer, Lawson, Davy, Hooper, Horne and Byrne.

A letter was read from the officers of the Hook and Ladder Company, asking for an advance of \$40 from their yearly allowance, to pay for some expenditure incurred at the visit of the Marquis and Princess. No action taken.

A letter from Henry Coombs, in regard to a survey of Euston-street, was also read, and ordered to lay on the table.

The following Committees were then appointed for the ensuing year:—  
Finance—Byrne, Beer and Davy.  
Street—Morris, Hooper and Beer.  
Market—Lawson, Horne and Davy.  
Tender—Murphy, Hooper and Lawson.  
Truck—Crabb, Hooper and Beer.  
Wharves—Davy, Lawson and Murphy.  
Victoria Park—Byrne, Morris and Beer.  
Spring Park—Koughan, Crabb and Lawson.  
Police—Hooper, Horne and Koughan.  
Pump and Well—Horne, Crabb and Morris.

On motion of Councillor Horne seconded by Councillor Davy, Mr. George Douglass was appointed City Surveyor—at a salary of four hundred and fifty dollars per year—instead of Mr. James McNally. The motion was carried on division of 5 to 1.

On motion of Councillor Davy seconded by Councillor Lawson, Mr. Thomas Brennan was re-appointed messenger.

It was moved by Councillor Byrne and seconded by Councillor Beer, and

Resolved, That the salary of the Bailiff be increased to the amount of four hundred dollars a year, in consideration of his serving such notices as may be required by Mayor and Stipendiary Magistrate.

Councillor Byrne gave notice that he would, at next meeting, move for a reconsideration of the appointment of the above committees, and also of the appointment of City Surveyor.

Councillor Lawson gave notice that he would, at next meeting of Council, move for a reduction of the salaries of the City Clerk and Clerk of the Stipendiary Magistrate's Court.

It was moved by Councillor Beer and seconded by Councillor Horne, and carried unanimously,

Resolved, That the City Clerk be requested to notify the Inspector of Bread that unless the provisions of the Bread Act be enforced he will be dismissed from office.

It was moved by Councillor Horne, seconded by Councillor Byrne, and carried on the casting vote of the Mayor.

Resolved, that a committee of three be appointed to examine the work of the Stipendiary Magistrate's Clerk, and also the City Clerk, and report at a future meeting. Council adjourned.

## Correspondence.

We do not hold ourselves responsible for the statements or opinions of our correspondents.

To the Editor of the Examiner.

Sir:—Can you inform your numerous readers what progress is being made towards collecting our share of the fishery award from the General Government. From the fact of our being outside the confederation for some years after the Treaty of Washington came into operation, even such journals as the *Monetary Times* admits that we may establish a claim. If we have a right, and it is only fair to the Local Government to suppose that they believe it to be a just claim, the taxpayers expect that due diligence will be used in its collection. The national policy presses hard on this Province, as our navigation is limited, and the interpretation of the sugar duties causes the tariff in that direction to benefit us but little. The indirect benefits expected, such as a subsidized line from Halifax to the West Indies and South America, have not yet amounted to anything. It looks just now as if the Lower Provinces, for the present at least, will have to carry the heavy end of the protectionist stick.

Yours respectfully,  
HENRY COOMBS.

Ch'town, Aug. 30, 1879.

## Cape Breton Election.

The anti-confederates of Nova Scotia, says the *Toronto Mail*, are making a desperate effort to regain their lost seat in Cape Breton. But if the results accruing to Nova Scotia from the National policy will decide the election, it may be regarded as won for the Conservative candidate. Here are a few of the results. Take iron. The Londonderry Iron company are now erecting a shed of immense dimensions for the purpose of storing material, thus enabling them to prosecute their work in winter with facility and advantage. The rolling mills have three hundred men employed. "The prospects are good, and all are confident of seeing the work, before two months' time, pushed with greater vigor than ever." Such is the report that comes from Londonderry, published before there was any idea of an election in Cape Breton. Next take sugar. Nearly seven millions of pounds more sugar and over \$160,000 more money came into the port of Halifax in the first four and a half months of the new policy. Take again the coal trade. The *Pictou Standard* publishes that the coal sales of the Pictou coal fields are double those up to this time last year. The official statistics are not yet to hand for the month of July, but the statements published in the newspapers of that coal field show that the grand total up to the date of coal shipments from Pictou is 117,292 tons. This does not take into account shipments by rail. The *Halifax Reporter* says there is no doubt whatever that the coal trade of Pictou has been doubled; and that in consequence of the N. P. These results, moreover, have been brought about in a few months.

## Trade Depression in England.

WHOLESALE EMIGRATION PROPOSED—THE FEELING AMONG THE WORKMEN.

The extension of organized movements for emigration is attracting much attention throughout England and Scotland. During the recent visit to England of Mr. Gowen, President of the Reading Railway Company, it is understood that he set on foot a movement among the miners of English and Scotch coal regions for a systematized emigration to the coal regions of Pennsylvania. The political advisers and leaders of the miners are not altogether inclined to favor the proposed scheme for systematized emigration, and these schemes meet with strenuous opposition from certain prominent politicians of the radical wing of the Liberal party. The influence of the politicians, however, goes for little in comparison to that of the natural leaders of the miners, men of their own class, thoroughly understanding the hardships which they have to endure and the prospects which they have of bettering themselves in America. The recent departure from Sheffield of a number of skilled artisans in the cutlery trade, has also had considerable influence in accelerating the emigration movement. Last night a crowded meeting of Sheffield workmen, employed in all branches of iron and steel manufacture, was held in support of a scheme for systematized emigration to the United States. It was composed, to a large extent, of skillful and well-to-do artisans of that city. The speeches that were made plainly showed the discontent and uneasiness of the skilled artisans. It was impossible, some speakers contended, for a workingman with a family, no matter how skilled in his art, nor economical and thrifty in his expenditures, to make both ends meet without depriving himself and his family not only of the little luxuries which they had been accustomed to, but of many of the actual necessities of life. Some of the speakers declared they were not at all carried away by romantic and rosy-colored views of life in America, but they believed that the condition of skilled workmen of all classes would be greatly benefited by large and systematized emigration.
