Plan For Sewage Disposal Accepted By City Council

Mayor Casts Ballot To Break Deadlock

Over-riding the adamant stand outlined in the citizens' petition submitted Monday night and reiterated by representative spokesmen again last night, City Council last night approved construction of a sewer outfall leading to North River.

Mayor Edwin C. Johnstone cast the deciding vote with Councillors A. Walthein Gaudet, F. W. Boyles, A. J. Haslam and J. E. Arsenault voting for the resolution and Councillors Gerald R. Foster and Elmer McRae were not present at the emergency session.

CONCESSION GRANTED In partial recognition of the claims advanced Monday evening by the citizens of the North River area, Council agreed to install a barminator on the main outfall at the end of York Lane, and asked for an immediate design for a chlorination plant "to improve sanitation and general conditions in the waters of the area under consideration."

SMALL COST Mr. Crandall informed Councillor Baker that the cost of the barminator and the proposed chlorination plant would be not more than two per cent of the entire project.

Either or both would not improve the treatment which was complete when sewage was discharged into a body of water capable of accommodating it, but adding one or both to the system he had recommended earlier might improve the situation from an aesthetic standpoint.

Surface drainage of storm water was found impractical in other centres due to the high cost of maintaining the adjoining roads and streets.

In response to further questioning by Councillor Baker Mr. Crandall said that his firm had considered diverting the sewage flow from the North River development into the outfall recently completed through government pond, but because of the capital cost of \$30,000 of the pumping station and force main required it had been discarded for economic reasons.

Mr. Crandall said the final outfall of the interceptor would be in 20 feet of water at low tide in an area where a large hole occurred in the river bottom.

INTERMITTENT FLOW The discharge at the Kirkwood Drive overflow would occur only during a period of heavy rain and it would contain only one part in (Continued on page 2 col. 2)

Communist Poison Try Is Termed 'Mystery'

MUNICH, Germany (AP)—A report by Radio Free Europe Wednesday that Communist agents tried to poison all its employees created a mystery. U.S. authorities, the Bavarian ministry of interior, the justice ministry, political and criminal police and state security officials denied Wednesday night they had been informed of such an incident.

The European director of the American-financed private station, Erik Hazelhoff, insisted he notified U.S. and German authorities after finding poison in some of the salt shakers in the station's cafeteria Nov. 21.

Furthermore, Hazelhoff said the contents of the salt shakers were examined by U.S. Army medical authorities and were found to contain lethal doses of atropine. This is a derivative from the deadly nightshade plant. Most of the 1,200 employees of the station are refugees from European Iron Curtain countries. There are about 100 American employees.

CLOSED CAFETERIA Hazelhoff said he immediately closed the cafeteria. The station's shop stewards brought a suit against Hazelhoff for closing the cafeteria without telling them why.

Mountie Chorus Is Said Thrilling OTTAWA (CP)—A group of real-life singing Mounties is thrilling local teen-age girls such as Nelson Eddy thrilled their mothers in the motion picture Rose Marie.

The 16-member, uniformed choral group, formed last fall, is making its first public appearance in a series of concerts begun last week at Ottawa high schools.

Beatification Of Laval Advocacy Expected By BERTRAND THIBAUT MONTREAL (CP)—One day in 1663, the governor of New France, accompanied by soldiers with shoot-to-kill orders, bust into a humble house in Quebec's upper town and demanded to see the occupants.

A few seconds later, a man wearing a dusty cassock and fingering a mustache of the type then in vogue appeared in a doorway to a room where the furnishings consisted solely of a bed, a table and a chair.

With bayonets at the ready, the soldiers advanced menacingly towards the man. Then to the astonishment of the governor they snapped to attention and respectfully saluted the 40-year-old man who calmly and serenely advanced towards them.

RETIRING MANAGER HONORED William Hayward, retiring manager of the Bank of Nova Scotia in Charlottetown receives a camera from Clarence Bartlett, assistant manager. Mr. Hayward received the gift at a dinner in his honor at the Queen Hotel last night.

OLD ANSONS ARE REMEMBERED

The airmen are not identified but the old Avro-Anson plane in the background needs no identification to World War Two airmen nor to many Island citizens who saw the Ansons in Island skies during the years that the air training plan was operating from bases here. The picture is timely now because tomorrow marks the 20th anniversary of the inception of the Commonwealth Air Training Plan. The airmen shown here were among the 30,000 navigators trained under the scheme. (National Defence Photo)

Columbia Power Decision Said Victory For Canada

By HAROLD MORRISON Canadian Press Staff Writer WASHINGTON (CP)—Qualified authorities said the Canada-United States International Joint Commission Wednesday recommended that the downstream benefits of the 1,225-mile west coast Columbia River be shared on a 50-50 basis by the two countries.

This basic proposal—a major concession to Canada—was hammered into a draft of principles which the commission will shortly submit to the two central governments. It will form the basis of a joint power construction pact likely to be negotiated in the first three months of 1960, authorities said.

First project that may be considered for joint negotiations is development of the Mica, Creek storage dam about 90 miles upstream from Revelstoke, B.C., providing about 11,000,000 acre-feet of water reservoir.

Harnessing of the Columbia, originating in British Columbia, has been the subject of various discussions for some 15 years.

FIRM AGREEMENT Wednesday, in a 75-word announcement—following 13 separate meetings since last February—the commission announced it reached firm agreement on a "final draft of principles to be applied in the determination and appointment of benefits from cooperative development of the Columbia."

The commission's recommendations, to be outlined in a 30-page document, is to be submitted to the two central governments shortly after all the legal niceties of the document have been cleared up.

Officials said the proposals would either state or imply: 1. Canada is to get one-half of all power generated on the U.S. side of the Columbia River. 2. Canada is to get a cash payment from the U.S. for flood control measures which would prevent flood damage on the U.S. side. 3. Canada would not give up the right to divert waters of the Columbia for future power projects of her own, but she would be morally bound not to divert any waters that would interfere with any joint agreement.

LT.-GOV. BOWLEN

EDMONTON (CP)—Lieutenant-Governor John James Bowlen, successful-rancher, farmer, businessman and politician, died Wednesday after an illness of several weeks. He was 83.

Hospital officials attributed death to cardio-renal disease. Mr. Bowlen was lieutenant-governor for almost 10 years. His five-year term, which started in 1950, was extended indefinitely in 1955. He had been a member of the Alberta legislature for 14 years.

A state funeral is planned for Saturday. The service will be held in St. Joseph's Roman Catholic Cathedral with Archbishop J. E. MacDonald of Edmonton presiding. Burial will be in the family plot in St. Joachim's Cemetery.

Chief Justice C. J. Ford of the Supreme Court of Alberta will perform the duties of the lieutenant-governor. He has been acting in the capacity during the governor's illness.

Plane Firms Plan Merger

LONDON (Reuters)—Two big British aircraft firms, Hawker Siddeley and de Havilland, today announced plans to merge.

A joint statement said the merger will bring about "the most powerful organization of its type in the British Commonwealth."

WHERE-TO-FIND-IT Announcements, notices 20 Births, deaths, etc. 2, 20 Classified section 20, 21 Comics, features 22 Charlotetown news 5 Editorials 4 Finance, markets 19 Island news 2, 3 Sports 8, 9 Women's page 6, 7 Late reports from Guardian news bureaus in Summerside, Montague, Alberton and Souris, and from special correspondents now appear on the Island News Page.

ST. JOHN'S Nfld. (CP)—Resources Minister Hamilton said Wednesday no survey has been made yet by his department to determine whether it would be beneficial to close the Straits of Belle Isle. He was commenting on recent remarks on the subject by a Montreal shipping agency spokesman.

Mr. Hamilton said the matter came up about two years ago when atomic energy officials cited such a project as a possibility. He said the narrow 10-mile gap between Newfoundland proper and Labrador could be closed by using atomic power but such an operation would have international implications because of public reaction to atomic blasts.

He felt that the proposed project was "in the academic listings" for the peaceful use of atomic energy.

RETIRING MANAGER HONORED William Hayward, retiring manager of the Bank of Nova Scotia in Charlottetown receives a camera from Clarence Bartlett, assistant manager. Mr. Hayward received the gift at a dinner in his honor at the Queen Hotel last night.

Plan Chosen For City Hall

WINNIPEG (CP)—A city hall design calling for a stone office building and a glass-walled council building with a wavy roof was picked for Winnipeg Wednesday by an international jury of experts.

Whether the building ever will become a reality still is a question. Green, Blankstein Russell and Associates of Winnipeg won a total of \$20,000 for the winning design, including \$5,000 for being one of the six finalists among 91 competitors and a \$15,000 advance. The firm will receive six per cent of the cost of the building if it is erected.

State Funeral Planned For Lt.-Gov. J.J. Bowlen

EDMONTON (CP)—Lieutenant-Governor John James Bowlen, successful-rancher, farmer, businessman and politician, died Wednesday after an illness of several weeks. He was 83.

Hospital officials attributed death to cardio-renal disease. Mr. Bowlen was lieutenant-governor for almost 10 years. His five-year term, which started in 1950, was extended indefinitely in 1955. He had been a member of the Alberta legislature for 14 years.

A state funeral is planned for Saturday. The service will be held in St. Joseph's Roman Catholic Cathedral with Archbishop J. E. MacDonald of Edmonton presiding. Burial will be in the family plot in St. Joachim's Cemetery.

Chief Justice C. J. Ford of the Supreme Court of Alberta will perform the duties of the lieutenant-governor. He has been acting in the capacity during the governor's illness.

ST. JOHN'S Nfld. (CP)—Resources Minister Hamilton said Wednesday no survey has been made yet by his department to determine whether it would be beneficial to close the Straits of Belle Isle. He was commenting on recent remarks on the subject by a Montreal shipping agency spokesman.

Mr. Hamilton said the matter came up about two years ago when atomic energy officials cited such a project as a possibility. He said the narrow 10-mile gap between Newfoundland proper and Labrador could be closed by using atomic power but such an operation would have international implications because of public reaction to atomic blasts.

He felt that the proposed project was "in the academic listings" for the peaceful use of atomic energy.

BRIDGE CRASH TAKES LIFE 27

Captain Donald Smith of Borden was drowned last night when the car he was driving smashed through the guard rail of the Dunk River bridge at Bedeque, plunging into 15 feet of water. The skipper of the Abegweit is known to have left Summerside last night shortly before 10 o'clock and the mishap was discovered by a passing motorist a short time later. This is the 27th highway fatality in Prince Edward Island this year.

Penniless, Ill Refugees Are Flown Into Canada

By JOHN E. BIRD Canadian Press Staff Writer TORONTO (CP)—Seventy European refugees—19 suffering from tuberculosis—arrived here Wednesday by air from Rome. Most of them were penniless but they carried a valuable never dreamed of owning—a travel document entitling them to live in Canada and qualify later for citizenship.

The sick were taken immediately to the Mountain Sanatorium in Hamilton and Toronto Hospital in Weston, a Toronto suburb. Families of the patients were taken to homes in areas reasonably close to the two hospitals.

Just before the big Canadian Pacific Airlines plane landed, Dr. R. W. Wood of the federal health department discovered six-year-old Anna Maria Maticic had the measles.

The attractive Yugoslavian girl and her family were detained aboard the aircraft until Ontario government health authorities investigated.

MILD FORM Dr. Wood said the girl is suffering from a mild form of measles. She was released in the care of her parents, who are quartered in Toronto.

Anna Maria is the daughter of Antonio and Maria Maticic. She has two brothers, Antonio, an infant, and Rodolfo, 7, the member of the family with tuberculosis.

Mr. Maticic was a railway switch-yard operator in Ljubljana, Yugoslavia, and hopes to become a railroad worker in Canada.

Dr. Wood, who accompanied the 19 families on their trip from Rome, said other children aboard the plane were examined but no further trace of measles was found.

Immigration Minister Fair-

Morell Rear Man Shot; RCMP Detain His Father

Peter Scully, 36, of the former Indian Reserve at Morell Rear, is in Charlottetown Hospital suffering from a wound in the stomach caused by a small calibre bullet, possibly a .22, which passed through his body. RCMP say he is expected to live, although he is listed as critical by the hospital.

Joe Scully, 64 father of the wounded man, is in custody in the Georgetown jail but as yet no charges have been laid.

Although details at the moment are few, it appears that Scully was shot between 6:30 and 9 a.m. Tuesday night and remained without medical attention until police and hospital were notified yesterday.

Inspector George A. Woodward, acting commanding officer of the Charlottetown detachment of the

RCMP, said last night that charges would be laid against Joe Scully sometime this morning. He said that two witnesses had been questioned but that their stories were somewhat incoherent, and facts were difficult to obtain.

Sgt. Major E. R. George and Const. J. A. Cox, who arrested the elder Scully conducted an investigation at the scene of the shooting and further inquiries will follow.

The sale of 2 percent Jersey milk in this province is still a very live topic with Jersey men, Fred Kitson, president of the Prince Edward Island Jersey Cattle Club said last night following the club's annual meeting.

Interested members of the club met at Hampshire early last year to discuss the sale of 2 percent milk but no definite action was taken, although a committee was named to enquire further into the possibilities.

Mr. Kitson said last night that although no definite resolution was passed yesterday he and the secretary were asked to look into the possibilities of putting the milk on the market here.

Procedure to be followed, including legislation required if any, and the possibility of acquiring a local dairy were two of the problems high on the agenda. It was learned.

Jersey milk is the highest testing dairy product on the market but in some centres a comparatively fat-free product of 2 percent milk has been marketed. That is the idea in mind here.

RE-ELECTED Mr. Kitson was re-elected president at yesterday's meeting held in the agricultural board room. Reg Clark, New Wilshire was re-elected secretary. Fred Coles of New Wilshire is vice-president.

George MacMillan, Cornwall; Arnold Lord, Bedeque; James Vickers, North River and Elmer Myers, Hazelbrook were named directors.

Grant Butcher, an Ontario man whose home address was not available, was first choice for judge at the provincial exhibition. Arthur McKeown, Richmond Hill, Ontario and Harold Keillier, Fredericton, N.B. were alternate choices.

Mr. Keillier and George MacMillan were named as alternate choices to judge at the Crapaud fair.

The club decided to encourage junior calf clubs by paying two

dollars for each Jersey calf shown at an achievement day. The club will also pay a bonus of \$20 to each club member who purchased a Jersey calf but the bonus will be paid in the year following purchase.

The Jersey club members decided to discontinue completely all other bonusing.

PREMIER BANNERS Premier breeders and exhibition banners will be purchased to be presented to all persons meriting them at the each major show in the province but the banners are to remain the property of the club.

The secretary was asked to consult all the other breed organizations in the province with the idea of having a photographer employed for the provincial exhibition. They will also ask the Canadian Jersey Journal to have one of their staff present at the provincial fair.

A site committee was asked to get in touch with department of agriculture people with the idea of procuring the best Jersey semen available.

The club also voted to ask the exhibition people to check the registration numbers of cattle the night before the show, rather than at ringside.

New Cardinals Seen Probable VATICAN CITY (AP)—Pope John, who has set aside a tradition limiting the College of Cardinals to 70, indicated Wednesday he may increase the college even more.

"We have reached 70," the Pope said, speaking informally at a general audience. "In the future we will go ahead—we will see."

The supreme ruler of the Roman Catholic Church noted that since the limit of 70 was set, the church has grown tremendously.
