

School Buildings Easier To Obtain Than Teachers

By FORBES RUHE
Canada Press Business Editor
S. H. Deeks, director of the Industrial Foundation on Education, sums up Canada's trained manpower problem as follows:

The manpower is available; we have the money to be made available; and if the facilities are identified, presumably the facilities can be sufficiently expanded.

There is, however, a major difficulty and that is the time taken to expand teaching staff, for a teacher cannot be trained as fast as a building can be put up.

The Industrial Foundation on Education was formed as a result of the conference of industrial and educational leaders in St. Andrews, N.B., last Sept. 9-11, on "engineering, scientific and technical manpower."

The foundation — which is the concrete result of the conference — received its federal charter Dec. 27, and actually has been in operation since Nov. 1.

BRAIN POWER AVAILABLE
Indication that a great body of brainpower is available for more advanced training is found in Ontario today.

This shows that of a total of 6,467 grade 13 (senior matriculation) this year, 3,171 plan to go to university; 1,150 are not going to university because they do not wish to go but 2,146 wish to go but don't do so for financial reasons.

The Ontario study indicates that the financial obstacles to getting this latter group into university would be removed by a bursary or busary loan fund, averaging about \$300 a student.

On the financial side, the foundation is particularly studying what industry's share might be. Available figures are from a small sampling, it says, and should be taken with reservation.

to needy students.

try and teacher associations in a program of specialized summer employment for teachers, under which mathematics, science and physics teachers would get first-hand experience with on-the-job application of the subjects they teach.

VOCATIONAL SCHOOL BANQUET

The annual banquet of the Provincial Vocational School Day Students, sponsored by the Student Council, was held at Central Royalty Hall on Thursday evening, the

P. W. C. GRADUATING CLASS

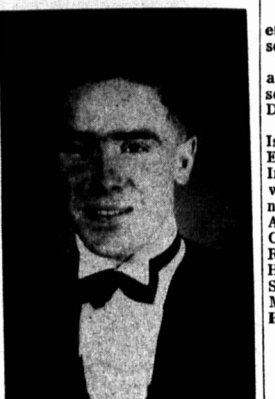

JAMES H. D. WARREN
James Hal David Warren, science, Parkdale, is the son of Mr. and Mrs. Edwin S. Warren. The world first greeted him on January 21, 1938, and he was discovered attending Parkdale School whence he successfully passed entrance, winning a Bell Scholarship — an indication of the fine scholastic record he was to maintain at P.W.C. Jim has a lively interest in wrestling, baseball, hockey, and horse racing.

Although he would like to become a professional wrestler, Jim plans first to obtain his B. Sc. at Dalhousie, specializing in chemistry.

CARL B. WILLIS
Carl Bertram Willis, pre-Agriculture, Cornwall, born November 27, 1937, is the son of Mr. and Mrs. Stanley Willis. He attended his home school for ten years completing Grade Ten in '53. In the fall of the same year he entered Prince of Wales College, and this year we find him a member of the graduating class.

He is keenly interested in ploughing, skating, and watching television. Next year Carl intends to continue his studies in Agriculture at Macdonald College, and his classmates and many friends wish him the best of luck.

Meyers Studios.

Coming Events

Concert in Cornwall Hall tonight.
Rummage sale Heartz Hall Saturday May 25, 2 p.m.
Dance Iona East School, Monday, May 20th and every Monday.
Dance in Afton Hall, Saturday night in aid of hall, good music.
York Hall, Meet Angus MacLean and Heath MacQuarrie, Saturday night May 25. Social meeting.
Reserve Wednesday, May 29th, For Indian River play in high school auditorium, Kensington.
Fresh lobster and hot turkey served at Sea Shell Inn, Victoria, Sunday.
Teen-age dance Souris High School Saturday, May 25th. Admission 40 cents. Canteen. Sponsored by Souris Lion's Club.

In stock grass seeds, cereals, barb wire, page and hog wire, asphalt shingles, purina chick starter and grower, W.I. Bowman Hunter River.
Not much risk in buying grain, feeds, screenings etc. at prevailing prices. Carloads only. The Atlas Grain Company, 300 St. Sacrement Street, Montreal.
Come to the three act play "Raggy Nanny" at South Rustico Hall on Monday, May 27th, presented by the Oyster Bed Bridge Players. Opening time 8:30.
Meeting of the Progressive Conservative voters of Mt. Herbert Hill are requested to meet at Russell Driscoll's, Saturday night, May 25.

CONFERENCE A SUCCESS

Asked if at this distance he felt the St. Andrews meeting had been a success, Mr. Deeks said: "I am personally satisfied that it was successful beyond what was anticipated."

"We wished to demonstrate the nature and magnitude of the problem and we wanted people to become aware of it. From those points of view the conference was certainly a success. The foundation is proceeding from there."

The foundation started off with the mass of data accumulated for the St. Andrews gathering and now is doing research on the following subjects:

Financing of university expansion, need for technicians, a more detailed study of the requirements for engineers, shortage of teachers at all levels, and financial aid

MANITOBA INSURANCE

Manitoba Pool Elevators has recently embarked upon a program of accident insurance for its members. Every operator of a farm who has delivered 1,500 bushels of grain in the previous 36 month period is automatically provided with a paid-up accident insurance policy. This move on the part of the Manitoba Pool Elevators is a further indication of a trend on the part of farm organizations to bring to their members some of the benefits enjoyed by employees in other sections of our economy. For a long time it has generally been accepted that the farmer takes his misfortune as it comes and extricates himself from his difficulties as best as possible. However, the trend in other sections of the economy to provide protection and security generally is beginning to have its effect in agriculture and more and more farmers will be seeking such a program that protects them against many of the hazards of farming operations and farm life.

As this newsletter was written well in advance of publication dates we are not in a position to make current comment on cropping progress for this week. Certainly by the 18th with the frost of Thursday and Friday nights spring was not showing much evidence of getting into high gear. It will not be an early cropping but

OUR BEST PROSPECT

There are sound grounds for the concern expressed in this quarter with respect to the position of agriculture and the individual farmer. This concern extends also to the position of the rural community and the developing trends within it. There will very likely always be the individual farmer who has difficulties and there will be the community where generally agriculture and community life is carried on at a relatively low level. There will be as well the community in which generally there is an optimistic approach to rural life and to agriculture as a way of business. In far too few cases is there much attention paid to the equipment which the rural district has or which it attempts to provide itself in its effort to become truly a community.

During the past week we had the opportunity of attending the annual banquet of a farm radio forum. The banquet was provided by the Women's Institute of the district. While such a gathering may not appear to be of momentous importance nevertheless the number of districts in this province that have both a Women's Institute and Farm Radio Forum that can work together in this way is extremely limited. In addition, this same community has a 4-H club and this is a natural complement to the two other groups. It is our opinion that if a larger percentage or even the majority of Prince Edward Island rural districts were provided with Farm Radio Forum, Women's Institute and 4-H clubs with all three working together then there would not be a great deal of cause to worry as to the future of the province. Regardless of the necessity of good government and public men it is nevertheless in the grass roots institutions that the future of the province rests. If the people themselves are unable or not prepared to work on their own behalf in improving the community and in developing interest in farming then our position will continue to deteriorate rather than improve.

We would like to repeat that agricultural progress on Prince Edward Island may be assured if steps can be taken to provide each community with functioning units of Women's Institute, Farm Forum and 4-H clubs with sufficient leadership to insure co-ordination of their efforts. Such co-ordination at the local level will insure provincially the development of a strong Federation of Agriculture which will command the respect not only of the farmer but of the public generally.

POSTPONED MEETINGS

For a variety of reasons there would be a number of school districts which did not hold their meeting on Wednesday, May 15. It should be understood that it is entirely in order for any district to change the date and hold the meetings at a more suitable time. The important thing is that each district should report as promptly as possible to the Federation Office on the business transacted.

MILK PRICES IN ONTARIO

Island dairymen will be interested in recent prices negotiated between the Ontario Concentrated Milk Producers' Association and the Ontario Milk Powder Manufacturers' Association in regard to milk for processing into concentrated milk products other than case goods. The prices set forth are on a delivered basis to plants.

a. for the manufacture of butter and roller powder, \$2.90 per 100 pounds.
b. Butter and spray powder, \$3.00 per 100 pounds.
c. spray whole milk powder for domestic sale, \$2.90 per 100 pounds.
d. roller whole milk powder for domestic sale, \$2.80 per 100 pounds.
e. butter and skim milk into casein, \$2.80 per 100 pounds.
f. skim milk powder in casein and the fat used for any other purpose, \$2.90 per 100 pounds.
g. for the manufacture of milk bound for export, \$2.70 per 100 pounds.

For a variety of reasons there would be a number of school districts which did not hold their meeting on Wednesday, May 15. It should be understood that it is entirely in order for any district to change the date and hold the meetings at a more suitable time. The important thing is that each district should report as promptly as possible to the Federation Office on the business transacted.

MILK PRICES IN ONTARIO

Island dairymen will be interested in recent prices negotiated between the Ontario Concentrated Milk Producers' Association and the Ontario Milk Powder Manufacturers' Association in regard to milk for processing into concentrated milk products other than case goods. The prices set forth are on a delivered basis to plants.

a. for the manufacture of butter and roller powder, \$2.90 per 100 pounds.
b. Butter and spray powder, \$3.00 per 100 pounds.
c. spray whole milk powder for domestic sale, \$2.90 per 100 pounds.
d. roller whole milk powder for domestic sale, \$2.80 per 100 pounds.
e. butter and skim milk into casein, \$2.80 per 100 pounds.
f. skim milk powder in casein and the fat used for any other purpose, \$2.90 per 100 pounds.
g. for the manufacture of milk bound for export, \$2.70 per 100 pounds.

more is always the consolation that very often late springs are followed by good crops this was very well demonstrated in the case of the grain last year.

NEW OFFICES
This is a further reminder that the Federation offices are now located on Richmond Street in the Oddfellows Building over the Patriot Publishing Company. The Women's Institute and the Federation are now neighbours.

The Canadian Federation of Agriculture will hold its semi-annual directors meeting in Port Arthur on July 24, 25 and 26th. While this is a directors' meeting it is not a closed meeting and usually there are those, other than directors in attendance. In addition to the board meeting a special national committee on organization and program methods will meet and report its conclusions to the board of directors for consideration and action.

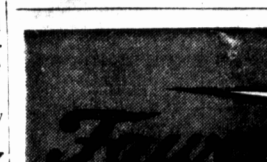

PARITY
During the present election campaign the terms parity income and parity prices are being used in connection with party policy. It is important that the rural voter understand that the terms do not necessarily mean the same thing. For instance parity income does not depend entirely upon the price which the farmer receives for his products, the cost of production and other benefits which he may receive are an important factor in determining his income.

Parity prices on the other hand are merely a means of relating the price of some farm commodity in terms of purchasing power to the price of some goods or service. The setting of parity prices has far-reaching implications which can be in the final analysis mean quite rigid controls in not only marketing but on production as well.

SOCIAL MEETINGS

Come and meet Angus MacLean and Heath MacQuarrie your Conservative candidates for Queen's County at York Hall, Saturday, May 25; Stella Maris Hall, Monday, May 27, Cornwall Hall, Tuesday, May 28.

Inserted by Queen's County Conservative Association.

LLOYD MARTIN
Of Cherry Valley who will be appearing over CFCY-TV at 9:35 Standard Time TONIGHT.

AMONG THE FARMERS

Federation of Agriculture Newsletter

OUR BEST PROSPECT

There are sound grounds for the concern expressed in this quarter with respect to the position of agriculture and the individual farmer. This concern extends also to the position of the rural community and the developing trends within it. There will very likely always be the individual farmer who has difficulties and there will be the community where generally agriculture and community life is carried on at a relatively low level. There will be as well the community in which generally there is an optimistic approach to rural life and to agriculture as a way of business. In far too few cases is there much attention paid to the equipment which the rural district has or which it attempts to provide itself in its effort to become truly a community.

During the past week we had the opportunity of attending the annual banquet of a farm radio forum. The banquet was provided by the Women's Institute of the district. While such a gathering may not appear to be of momentous importance nevertheless the number of districts in this province that have both a Women's Institute and Farm Radio Forum that can work together in this way is extremely limited. In addition, this same community has a 4-H club and this is a natural complement to the two other groups. It is our opinion that if a larger percentage or even the majority of Prince Edward Island rural districts were provided with Farm Radio Forum, Women's Institute and 4-H clubs with all three working together then there would not be a great deal of
