AUSTRIAN CHANCELLOR VISITS ITALY

Schuschnigg Said Seeking Mussolini's Counsel Re Rapprochement With Germany.

(A.P. By Guardian's Special Wire) ROME, June 4.—An important Austro-Italian conference appeared tonight to be in the making, despite Italian silence and insistence by Austria's visiting Chancellor, Kurt Schuschnigg, that he is in Italy for a "rest."
Premier Mussolini was at Rocca delle Caminate; Schuschnigg at Viareggio and Fulvio Suvich, Under-Secretary for Foreign Affairs at Forlì. It was thought they were preparing for a meeting at Florence tomorrow.
However, the press ministry minimized the importance of Schuschnigg's visit and the Chancellor himself told newspapermen at Viareggio that he did not expect to see Italian government officials. He said he would leave for Venice Friday or Saturday.
Schuschnigg conferred today with Colonel Liebesky, the Austrian military attache at Rome.

Seeks Counsel

(Vienna reports have stated Schuschnigg wants to see II Duce for counsel on a plan to effect friendly relations with Germany without jeopardizing Austrian independence. Another Austrian report was that Mussolini would try to make peace between Schuschnigg's supporters and the militant followers of Prince Ernst von Starhemberg, whom Schuschnigg ousted from the cabinet.)

In any event, it appeared that strong political currents again were involving Austria. This situation developed swiftly with the Fascist Prince Starhemberg's break with the Chancellor; with Schuschnigg's move toward a "brotherly" rapprochement with Germany, and with the visits to Rome of both Starhemberg and Schuschnigg.
II Duce telegraphed in friendly fashion to Schuschnigg after the Chancellor had ousted Starhemberg from his cabinet. He reiterated that Austria could count on Italian support.

The advice he gave Starhemberg was to keep quiet on his return to Vienna and not to stir up trouble—seemed to indicate that Mussolini wanted Schuschnigg to continue at the helm.

Situation Not Clear

But many political and diplomatic circles here believed the situation was not clear cut. Some thought a little trouble in Austria might, in fact, help Italy.

Their reasoning was that Britain and France, seeing difficulties brewing in Austria, and believing they would lead to Germany's getting hold of that country, would compose their differences with Italy by dropping sanctions, so as to unite with Italy in defending Austria's independence.

Curiously, Italy herself has furnished Germany with a strong legal argument for Austrian union by absorbing into her own political body a small nation, Ethiopia, a member of the League of Nations.

From a legalistic viewpoint, could Italy object, some argue, if Germany were to eliminate her dependence on Austria and absorb her into the body politic of the Reich?

Light Sentences

VIENNA, June 4.—An Austrian superior court let a group of Nazi leaders off with light sentences today, lending weight to the impression that the Schuschnigg government is trying for an understanding with Germany.

Alr Lieutenant Johann Lukesch, Thomas Kotsch and Josef Weninger, described by prosecutors as members of the "Nazi general staff in Austria," were sentenced to 10 months in jail. They already had served the terms while awaiting trial.

Fifteen other accused Nazis were similarly treated.

Further Arrests in Black Legion Probe

(A. P. By Guardian's Special Wire) DETROIT, June 4.—The dread Black Legion was accused in an order of arrest of flogging warrants today the secrets of the hooded, night riding terror band were being recounted in Grand Jury inquiries in three Michigan counties.
While witnesses described murders, floggings and alleged political

Railway Notes

Mr. Alec Scott, C. N. R. division engineer, has returned from a pleasant trip to Montana, accompanied by Mrs. Scott and daughter Miss Janet, who have been visiting Mrs. Scott's mother for the past three months.

Mr. T. B. Grady, retired C. N. R. superintendent, and Mrs. Grady are receiving a hearty welcome from many friends on their return from Florida, where they spent the winter.

Mr. T. A. Costello, C. N. R. plant inspector Atlantic region, who was called home recently on the death of his mother, was a passenger Monday morning en route to the mainland.

Harry Anderson, a former Mechanical Superintendent of the C. N. R. Island division, at that time the P. E. Island Railway, died in Westport, Conn., May 26. Mr. Anderson was born in Belfast, Ireland, 94 years ago. On relinquishing railway work in Canada he joined the Westinghouse Company's staff in New York, and at the time of his death was a pensioner of that organization. There are several retired C. N. R. employees of the Island division living, who worked under Mr. Anderson, when he was mechanical superintendent here over 40 years ago.

At the commencement exercises of Prince of Wales College last Friday, Miss Evelyn Hessian, Georgetown, daughter of the late James G. Hessian, former C. N. R. engineer, died for the T. A. LePage prize, given for the best student in first year. Miss Hessian led the Island at the matriculation examination last August.

Gordon Douglas, student at P. W. College, is spending his vacation with his parents, L. H. Douglas, C. N. R. station agent, and Mrs. Douglas, Georgetown.

The numerous friends of J. F. Leightizer, C. N. R. Master Mechanic, are pleased to hear of his promotion to the position of assistant superintendent of the Island division. Like many other C. N. R. officials, who have attained prominence, Mr. Leightizer started at the lowest rung of the ladder. About 1904 he secured a position in the Moncton roundhouse, where he worked for some years at the then minimum rate of twelve and one-half cents per hour. Promotion was not slow in coming to this industrious and painstaking workman, for shortly after he was advanced to the position of locomotive fireman and subsequently to engineer.

When the Great War broke out in 1914, Mr. Leightizer was among the first who responded to the call. He enrolled in the Engineer's Corps, in which body he afterwards rendered valuable service to his country in France and Belgium. Returning to Canada in 1919 he again resumed his former position as engineer with the C. N. R. at Moncton.

In 1923 his fine record won for him his appointment as master mechanic of the Island division. Blessed by Providence with a splendid physique, Mr. Leightizer stands out prominently in any gathering. His commanding presence draws immediate attention and his pleasing personality holds it. His earnestness, his devotion to duty and his sense of justice and fairness have won for him the confidence of those under him and the esteem of his superiors, who have now given an added recognition of their appreciation in appointing him to this position of trust.

Lawrence Doyle, student at St. Dunstan's University, is spending his vacation with his parents, J. E. Doyle, retired C. N. R. engineer, and Mrs. Doyle, Georgetown.
Sheldon M. Matheson, C. N. R. machinist helper, has returned from a very pleasant visit to Boston and New York.

The new warrants were disclosed when three of the 15 were taken into custody to join 17 others in the county jail awaiting completion of examination on abduction and murder charges for the "ritual" slaying of Charles A. Poole, young workers progress administration worker. Prosecutor Duncan C. McGee said 12 more will be arrested on John Doe warrants.

NEW EYE MAKE-UP

New eyeshadows for evening are more exotic than they have been for many a season. If you insist upon wearing makeup on your lids during daylight hours, it should match the natural brownish tones of your eyelids, of course. But, for evening, you can use gold, silver, or if you have black, dark green, or red hair, the new mahogany tone. To get excellent results with gold or silver eyeshadow or for that matter, with any shade of eyelid

cosmetic, apply it with a small camel's hair brush instead of your fingertips.

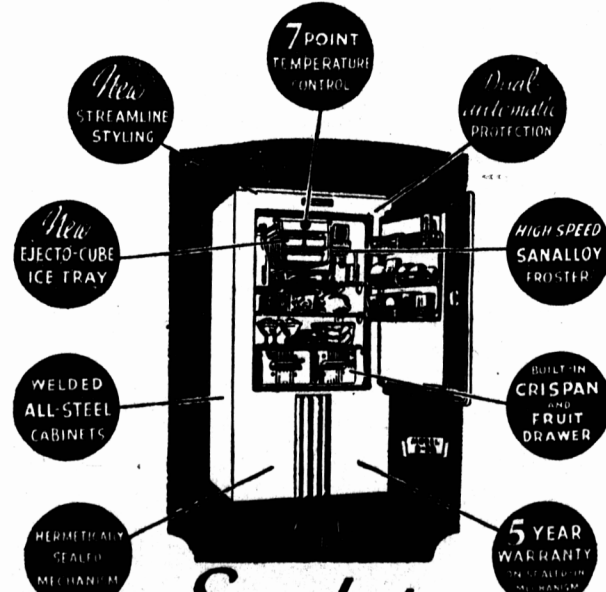

Simply draw a fine line from the inside corner of the eye to the edge of the upper lid. Do the same on the outside corner of the eye. Then draw a narrow line across the bottom of the lid directly above the eyelashes. Never, never, put even a speck of shadow below the eye or around the lashes of the lower lid.

When the minute triangle is complete, fill it in with an extreme-

ly thin film of the makeup. Blend carefully until not a streak or smear remains. Then wipe the little brush, dip it in gold or silver eyeshadow and spread on an even thinner layer of this.

Remember, of course, that it is more satisfactory to darken eyebrows with mascara and brush instead of with an eyebrow pencil. The way, the color of each little hair is intensified softly and subtly, giving a more natural effect than does the harsh line of a pencil.

Eliminate Poisons

By keeping the kidney action regular

The human machine in the process of digestion forms poisons which are eliminated through the lungs, the kidneys, the bowels and by perspiration.

The kidneys are the natural filters of the blood and on them is thrown the work of eliminating the poisons from all we eat and drink, especially the latter. If the quantity of poisons is greater than the capacity of the kidneys can look after, we experience pain and serious disease.

The secret of avoiding trouble of this kind is found in the use of Dr. Chase's Kidney-Liver Pills, because they secure the action of the kidneys and bowels and promptly eliminate the poisons from the system. The kidneys are relieved of overwork and regain health and vigor. Pain, acids and blood poisons disappear and serious disease is prevented.
