PEACE COMMISSION.

It Is Thought It May Finish Its Labors in a Month.

PARIS, Oct. 4.—Yesterday's session of the peace commission lasted until 4 o'clock, at which hour the commissioners adjourned to meet at 2 o'clock next Friday afternoon, such interval being desirable and necessary to allow separate consideration by each commission of matters requiring such course before being presented to the joint commission.

The opinion is now held that the work of the commission may be finished within a month from the present time.

While it is the general impression that yesterday's meeting was again devoted to preliminaries and that the adjournment to Friday was taken only to enable the secretaries to draw up a schedule of work, the representative of the Associated Press learns that the session was highly important and that the Americans have made a demand of such character that the Spaniards found it necessary to ask for an adjournment in order to enable them to consult with the home Government at Madrid.

It is believed that the question concerns the Philippines and it is known that the Americans are highly pleased at having so soon reached what they consider a very important phase of the negotiations and consider the two sessions thus far held as very satisfactory to America. The fact that a member of the commission expressed the belief that the work would be completed within a month indicates a happy frame of mind.

MADRID, October 3.—The reported intention of the United States Government, to retain the whole of the Philippine Islands has created almost a state of stupefaction here and it is semi-officially announced that the Spanish Government has resolved vigorously to combat any such action, which, it is claimed, the terms of the peace protocol preclude.

In the Spanish camp great hopes are built on what they believe General Merritt will advise; namely, that the Philippines are incapable of self government and that the whole situation does not warrant America in taking the responsibility for the entire Philippines.

The Spaniards are quite ready to give whatever America asks in the way of coaling stations; but will resist more to the verge of a renewal of hostilities.

PARIS, Oct. 5.—The American peace commissioners devoted yesterday's session to a conference with Major General Merritt, who detailed to the commissioners his personal views and those of Rear Admiral Dewey regarding the physical, geographical, moral and political conditions prevailing in the Philippine islands.

La Patrie last evening printed an interview said to have been had with Gen. Rafael Cerezo Saenz, of the Spanish peace commissioner, in which he is represented as saying:

"Peace between Spain and the United States will complicate all the eastern questions. The day upon which the preliminaries are signed, the first chapter in the new history of Europe will be commenced, as the United States henceforth will play a preponderant role in events of which different parts of the world will be the theatre.

"It has been pretended that Spain wanted war or at least, allowed herself to be dragged into it. This is a mistake, since the United States have long coveted our territories. They introduced separatists and autonomic ideas into Cuba, ideas which were not shared by a majority of the inhabitants of the island. Influences of all kinds have been brought into play to excite risings, and hence ensued a war, the consequence of which may be so prejudicial to ourselves and may affect all European interests.

"The North Americans on the other side will be compelled to create at once the naval forces demanded by the situation, brought about by events. The stronger the United States are the more their friendship will be sought after, and the more also their rivalry will be feared by all European nations.

"Look at the extreme orient, where France, Russia, Germany and England are powerful rivals. If the Americans instal themselves in the Philippines, the situation will be greatly modified; and they will not hesitate to seek the friendship of Japan England to the detriment of all other nations. This will be for America a truly privileged situation, out of the diplomatic rule will be rendered proportionately more difficult."

Mr R N Taylor, ophthalmic optician, will be at Dr Taylor's office, Grafton St, for two weeks only, where he will be prepared to examine the eye by modern methods for all kinds of trouble requiring the aid of glasses. Eye strain and headaches are most frequently caused by the need of suitable glasses even where good sight may be enjoyed. Such cases will receive special attention. No charge will be made for consultation and examination and glasses will be furnished when needed at moderate prices. Appointment can be made at any time. Parties whose glasses require adjusting are invited to call and have them properly fitted free of charge.—4 d&w 31

SIR WILLIAM VAN HORNE

Talks to a Winnipeg Reporter About His Railway

WINNIPEG, Man., October 4.—Sir William Van Horne and party, consisting of Mr R B Angus and Principal Peterson, of McGill University, arrived from the East yesterday. Sir William said he had found the roadbed between Montreal and Winnipeg in magnificent shape. Those who have not been over it recently would not recognize it. The grades have been cut down, curves straightened, and practically all the old wooden structures replaced by stone and steel. The whole distance is being relaid with 75 pound rail, and this is now completed over all the line between Fort William and Winnipeg.

Continuing, Sir William said: "We have now one of the greatest railroads on the continent in point of safety and comfort. Since the line was opened for traffic between Winnipeg and North Bay we have sent nearly \$11,000,000 in making the roadbed permanent, and we are well satisfied with the result. The travellers wonder where we get all the money to spend in these improvements all along the north shore. They see \$50,000 going in at one point, \$100,000 at another, and no traffic along the way to help us out. It is like maintaining a bridge 1,200 miles long. That is a point overlooked by the people of the Northwest. There is a great national highway to keep up to a high standard, but we are pleased to be in a position to say that we are now getting some help in the way of traffic at points where we received no return in the past. This is of importance as it makes burdens at other points lighter."

Sir William is looking forward to a remarkable era of progress in Canada within the next ten years. He has faith in the richness of the Yukon; but greater faith in the future of the prairie lands and mineral resources of British Columbia.

The announcement was made of a new line of steamships to run between Vancouver and Siberia. This was in the nature of an experiment, but it was thought it would not be a fruitless venture.

AN IMPORTANT SPEECH.

Thought to Indicate the Policy of France in Africa.

PARIS, Oct. 4.—Major de Brazza, the well known French explorer, speaking Sunday at a meeting at Bordeaux to welcome M Liotard, who has just returned from the Congo, said that Major Marchand's mission had just crowned a work that had been pursued for eleven years. France was thereby enabled to assist in settling the Nile question. He instanced the neutrality of the Congo waterway, which had been regulated by the intervention of the powers.

M. De Brazza proceeded to glorify the act of Berlin, which, he said, had inaugurated the principles of a new law founded on freedom of trade and free navigation of the great rivers of Africa.

The speech is important, as it suggests that France will profess to be the champion of the "open door" in Africa, as England has done in China.
