

THE DAILY EXAMINER.

DECEMBER 10, 1895.

THE WINTER TABLE.

REPORTS from the West are not over enthusiastic about the winter railway arrangement. One of our esteemed correspondents cannot refrain from giving the management this broadside:

"What under Heaven do you expect the West to say to such shabby treatment, anyway? It is all right for Summerside and Charlottetown; it sends us back into the glacial period. One old lumbering train a day, and a loss of three days in foreign mail matter even now—the busiest and most important seasons of the year—while the steamboat express lies idly by at Summerside, instead of coming through to Tignish, when the coal is the only extra cost to count. Entertaining management indeed! We had a lot of that kind of enterprise in the past, and the sign is on us. I say, Sir, that it would be money saved to send us two trains all winter and not block our road with snow for days and weeks at a cost of thousands of dollars per month. Last winter we had no service at all between the bungling of those directing trains and the worthless rolling stock employed. It would certainly pay the road better and give some little satisfaction to the public. If two trains ran winter and summer, place the amount paid for clearing the track against the amount paid the hands on an extra train, and you will find it a reasonable proposition. Trains passing over the road twice a day would easily keep it open if the engines were any good at all. We know it will take time to waken the sleepy authorities up in these matters, but they get more attention in the future from this neglected Western county than hitherto, and in the end justice will prevail. We don't want the earth, but we do want some kind of half-decent treatment, and this winter arrangement is no improvement over that of twenty years ago."

"Impartial, the Tignish organ, while it gives in silence the figures of the winter table, adds: 'It is to be hoped that the system which has given such perfect satisfaction all summer will be renewed at once in early spring.' It is pleasing to note that our esteemed Western contemporary does not forget to acknowledge the improvement of last summer made in the face of bitter opposition. The advantages afforded by the Government are too apt to be forgotten, while every cause of complaint is always borne in mind.

It is not wonderful that our correspondent feels annoyed when he contrasts the prompt service of the summer with the decidedly slow service of the winter. But he ought to remember that if the people of the West are entitled to two trains a day so are the people of the East; and if two trains a day would be material to lessen the cost of snow shovelling in the West that the expenses would not be increased by the addition of a second train, we might as well have two trains a day all over the line. The question is one to be considered in the light of experience and in view of the needs of the country. We presume that a good deal would depend upon the amount of snowfall and the drifting snow storms in the different winter. If the snowfalls were light, one train would pay better than two; if heavy, two trains a day might possibly be run as cheaply as one.

In point of fact, there are upon the mainland, in Nova Scotia and New Brunswick, as many, or almost as many trains running in winter as in summer; and the people of Prince Edward Island may, without unfairness, claim a railway service comparatively equal to that of their neighbors. Instead of this, they are forced to take passage in little twenty-year old, ill-ventilated cars contrasting unfavorably with those of the mainland, and they have to put up with one train a day in winter, while the people of the mainland have as many trains a day in winter as in summer. The railway conditions of the Provinces are not fair, and the unfairness is prejudicial to the interests of this Province. We hope that the Minister of Railways will take this matter into his consideration.

NOTES AND COMMENTS

The revenue and expenditure of Canada are about \$3,000,000 better than at this time last year.

The Duke of Saxe-Coburg and Gotha plays the fiddle with fervor and skill. Shall we pray that his arm may be paralyzed?

The predominance of Tarte leads a correspondent of the Mail and Empire to observe that the Liberals are endeavoring to persuade the electors to bow down at the shrine of Baal and As-Tarte.

Mail and Empire: Sail is the fall from Mackenzie to Tarte, and still still the spectacle which is presented when a man who Mr. Beaupre, a strong Quebec Liberal, has found wanting is presented to the Ontario Reformers as one of their goals. To-morrow no doubt Pacard, Langier and McShane will be found fit men to rule Canada. Let there be no mistake about the situation now. The mark is removed. Obviously it is intended that the Tarte and Pacards shall stand before the world as the representatives of Canadian honour and Canadian morality.

Here is a suggestion which must give the ladies pause. A well-known London physician says he fears that the tendency of too much education or intellectual development in women is apt to make them less beautiful. He instances the Zoro women of India. They are supreme. They woo the men, control the affairs of the home and nation, transmit property, and leave man nothing to do. The result is that they are the ugliest women on earth. Here is a consummation to be avoided!

Brazil has refused Great Britain's offer to submit the question of the ownership of the little island of Trinidad to arbitration. And the U. S. Judges are in an ecstasy of delight, and say that Brazil is "acting like a man." At the same time they want the United States to declare war against Great Britain because she will not agree to Venezuela's proposal of the greater part of British Guiana to arbitration. Thus, as the Halifax Herald remarks, it appears that arbitration is

THE RACING SEASON OF 1895.

The racing season of 1895 is over, save an exchange, and the two-minute trotter is as far off as he was one year ago. The wonderful mile in 2:03, made by Alex at Gallop, Ill., September 19th, 1894, still remains the best on record, and there is only one new 2:01 performer to show for 1895. That one is Azote, who trotted a mile in 2:04 against time over the same track on which Alex made her best record. Three other horses—Beuzetta, 2:06, William Penn, 2:07, and Nightingale, 2:08, trotted into the 2:08 list during the past season, and an additional ten trotted in 2:10 or better for the rest of the year. There are now 46 trotters in the 2:20 list, and Maul S.S., who a few years ago was queen of the turf, ranks 25th. The most notable of the new 2:10 trotters, outside of Azote, 2:04, who, until he went lame, looked like the possible two-minute trotter, is Beuzetta, the four-year-old filly who trotted to her record of 2:06 in the fourth heat of a hotly contested race. It is the fastest fourth heat on record and the best mile in a race for a four-year-old filly. Nightingale's record, 2:08 is also a remarkable one considering the fact that he is ten years old and has been campaigned six years. The world's race record for two-year-old trotters was reduced to 2:13 in the Lexington stakes at Lexington, Ky., October 17, by the brown colt Tommy Britton, by Liberty Bell, 2:24. Azote's 2:04 is the best on record for a trotting gelding, replacing Ryland T's 2:07. Danly Jim reduced the half-mile track record to 2:11. Among the pacers Robert J's 2:01, made in 1894, is still the best for a mile, but the times for the fractional distances were lowered by John R. Gentry, who paced the last quarter at Sioux City last September in 25 1/2 seconds, and also paced a half in 59 1/2 seconds, and three-quarters in 1:38 at Freeport, Ill., in July. John R. Gentry equaled the stalling pacing record (his own) with a mile in 2:03 at Detroit, Iowa, on September 25, but led to be that mark, despite his many starts. Aggie D. set up new figures for pacing mares with a mile in 2:04 at Detroit, and Strathberry reduced the record over a half-mile track to 2:53 in a trial, against the watch at Okaloosa, Iowa, in October. The chestnut pacing gelding W. W. P. reduced the two-mile record to 4:22 at Lincoln, Neb., and also pulled a section wagon a mile in 2:08 at Terrell, Ia., on September 25, but led to be that mark, knocking 41 seconds off Roy Wilke's kite track record, made in 1891. Judge Hart and Miss Rita lowered the three-year-old race record for pacing colts and fillies respectively to 2:03 and 2:08, while Be Sure and Allen did the same trick for four-year-old pacers, with miles respectively in 2:06 and 2:07. Directly's mile in 2:07, made in California, is the best for a three-year-old pacer against the watch. The 2:10 pacing list grew until there are now 101 in it, 40 of which have beaten 2:05.

On the running turf the 4 1/2 furlong record was reduced to 53 seconds by Meadows O'Connell ran three-quarters of a mile in 1:12, with 121 pounds up, at the Oakley track; Wernberg and Irish Beel ran 6 1/2 furlongs in 1:19 2/5 at Sheepshead Bay, and Manie Scott ran 7 1/4 furlongs in 1:34 at California, all these replacing old records.

Mr. Gladstone Cannot Come.

NEW YORK, Dec. 7.—Chauncey M. Depew, who some time ago forwarded the invitation of the Chicago Press Club to the Right Hon. W. E. Gladstone to discuss the Armenian question in the Chicago Auditorium in 1896, has just received a reply. The blessing of good health is still withheld from the distinguished statesman, and perfect vision and growing deafness, which more weighty considerations might lead me to undervalue, and confine my intercourse with others to what is purely private, are a very restricted character. I send this reply with much regret, but with full assurance of my best wishes.

Old Exoner to York.—Doubtless the oldest person in Nova Scotia who exercised the franchise at the recent municipal elections was Angus Campbell, of Middle River, Victoria county. Mr. Campbell is 101 years of age and the North Sydney Herald is informed that he drove a distance of five miles to poll his vote on election day. Mr. Campbell has been a resident of Middle River for over 80 years, being one of the first settlers in that district. He is a carpenter by trade and is still wonderfully active for one who has passed the century mark.

Who is He?—The Boston correspondent of the St. John Sun writes of the recent exciting campaign at Springfield between the A. P. A. faction and the "antis," Archibald Leander, a native of Summerside, P. E. I., represented the former faction on the ticket for school committee. He was badly beaten by his opponent, a woman.

ISLAND CREEK.—The Montreal Trade Bulletin fiercely attacked the Dominion dairy commissioner for holding that 24,000 boxes of P. E. Island cheese in Montreal as a lead weight on the market, and declares he is setting a very bad example to the trade in general. The "cheese" goods, it says, should have been put off the market long ago.

FROM HALIFAX.—The steamer City of Ghent arrived from Halifax about two o'clock this morning.

The Fastnet will leave Halifax for Charlottetown this evening. This will be her last trip to Charlottetown this season.

Lord Dunraven will come out to the United States to be present at the equity trial in the matter of the measurement of the Defender during the races last September. He is expected to leave London to-morrow.

Japan has a highly interesting new woman in Mme. Oyama, wife of the Mikado's field marshal. She is a Vassar graduate of the class of 1883, was president and valedictorian of her class, and is a lady of great cultivation and ability, and of beauty as well. Mrs. Oyama speaks Russian, French, German and English with fluency, is the Empress' chief lady-in-waiting and draws the highest salary paid a woman of the court. She is a sort of arbiter of elegance for the feminine portion of the court, which she instructs in European manners and etiquette. She is also the most active apostle of dress reform in Japan.

TRICKS THAT ARE VAIN.

In vain is the get spread in front of any bird, and in vain do unscrupulous dealers offer a high price label with a poor wine inside the bottle. The Bordeaux Claret Company are not concerned about a label. They have put before the public a generous, old, robust wine at a price which is absolutely unparalleled for the high-priced people. Even those who like it well enough to get wine at half-price have almost been afraid to believe the good news. The new prices for Claret and Burgundies are \$3 and \$4 per dozen quarts. Bottled from the wood imported direct from the vineyards of France. Address: Bordeaux Claret Co., 30 Hospital St., Montreal. 216

Unlike "Cain"

We will treat our brother well, that is if he wants good walking stick. Remember a nice cane makes a suitable present, and we won't "stick" at anything from 25c. up.
