Purchase Offer Is Rejected By Foundation Company Ltd.

MONTREAL (CP) — The Foundation Company of Canada Ltd., has told shareholders that the directors and "several of the larger and most influential shareholders" will not accept an offer made by an unidentified client of the National Trust Company to acquire 500,000 of the 1,182,816 shares of the company.

A letter to shareholders said because of the secrecy of identity of interests seeking to acquire effective control of the company, they could not recommend acceptance of the offer.

The offer, made Tuesday, said the first 500,000 shares of Foundation tendered the National Trust Company would be bought at $14.75 a share, about -3 above the current market price.

The letter, signed by F. G. Rutley, chairman, said the company had net earnings of $944,485, or 79 cents a share, in 1961, compared with $1,292,546, or $1.09 a share, in 1960.

The earnings figures were given shareholders three weeks before the publication of the annual report, the company said, "in anticipation of the annual meeting April 26."

RETAIN CONFIDENCE

The letter said the company was Canada's largest construction company, but "even more important is the ability of its management team and staff generally to retain and even increase the confidence and goodwill of its clientele."

The letter said the company had been unable to find out on whose behalf the National Trust Company had made the offer and the National Trust refused to identify their client.

The company said the offer contained a clause enabling the offer to be withdrawn and hence "could amount to nothing more than giving the offerers an option to purchase your shares."

Shares of Foundation closed at $11.63 on the Montreal Stock Exchange Friday, but rose to $14.25 on announcement of the offer Tuesday. Since then they slipped back to $13.50.

The issue closed at -13.25 Thursday afternoon on the Montreal Stock Exchange.

International Insurance Suggested For Investments

By FORBES RHUDE
Canadian Press Business Editor

A freer flow of money in the world is probably much harder to bring about then a freer flow of trade.

You may take a chance on an individual trade transaction, even if your confidence is a little shaky, but you like to be pretty sure of a country's future before you invest a sum of money in it for a term of years.

This is particularly a problem for the newer and under - developed countries, anxious for and in need of capital, but whose future political stability may be uncertain.

One suggestion made is insurance of private foreign investments through some international arrangement.

Discussions are in the preliminary stage and, to provide data, the World Bank recently completed a study entitled Multilateral Investment Insurance.

HELPED RECOVERY

The World Bank itself and several other international bodies, such as the International Monetary Fund and the various bodies that have operated in Europe's recovery, are evidence that internationally - supported bodies can achieve results far beyond the amounts of money involved.

The World Bank's loans have an interest beyond the countries involved, because they make possible projects on which construction and engineering companies of other countries can bid.

Among recent announcements is a loan equivalent to $20,000,000 to Industrial Credit and Investment Corporation of India Ltd., a privately - owned and-managed development bank established to promote growth of private industry in India. Three earlier loans to the institution totalled $40,000,000.

In seven years the Indian body has approved financial assistance equivalent to $90,000,000 to 133 industrial concerns, more than half of them new enterprises in such industries as electrical, chemical, mechanical, sroppng, teqtile, fertilizer, food - processing, paper, glass and building materials.

World Bank loans in India total $346,000,000 of which the Bank still holds $600,000,000.

The International Finance Corporation, World Bank affiliate, has agreed to invest the equivalent of $3,000,000 in Fabrica Espanola Magnetos S. A. (LFEMSA), leading manufacturer of automotive electrical equipment in Spain.

Poor Man Wins Tax Appeal Case

OTTAWA (CP)—The Income Tax Appeal Board has ruled unanimously that a poor man, able to pay only $9 a month for his wife in a mental hospital, is still supporting her.

In a judgment issued here and bristling with indignation, the board flatly rejected the revenue department's claim that Theodore Lariviere of St. Hyacinthe, Que., wasn't entitled to a $2,000 basic income tax exemption as a married man.

The department based its case on the income tax law which allows a $2,000 exemption for a married person "who supported his spouse." It argued that Mr. Lariviere hadn't supported his wife.

The judgment said that Mrs. Lariviere has been in a mental hospital since 1938. Her husband has to pay only $9 a month for her board "in view of his precarious financial condition." In recent years he hadn't even paid that much, and owed the hospital $929 up to March of last year.

The board said that, to counsel for the revenue department, supporting a person means spending money for that person.

"Nothing could be farther from the truth."

The board said that Mr. Lariviere was "providing his wife with what she required, in view of her condition, for the needs of her sad and miserable life."

"What more could the taxpayer do, and what better could he do, than what he did under the circumstances in which he found himself by reason for his wife's illness?"

CONTRACT BRIDGE

The bidding:

South	West	North	East
1NT	Pass	Redble.	Pass
3NT	Dble.		

Opening lead—queen of clubs.

When the opponents put you on notice that there is danger ahead, it is certainly wise to take advantage of the information. Here is a case in point.

South got to three notrump on perfectly normal bidding and West took it into his head to double. This was not the smartest thing in the world for West to do. While he had good prospects of defeating the contract, he could not, first of all, be sure that he would, and secondly, he was openly announcing, to declarer's advantage, that he had all the high cards that were missing.

North redoubled, reasonably enough, and the battle was on. West led a club and South could see that West's double had to be based on a long club suit and two side aces.

Declarer realized that if he lad a diamond, the suit that he would normally attack, he would run into a dead end. West would take the ace and establish his clubs and South would be in a position where he could cash only eight tricks. West, at that point, would have the ace of hearts as an entry to run his clubs.

So South, armed with the knowledge he had obtained from the double, decided to attack hearts first. But he took the precaution of not initiating the suit by first leading a heart from dummy. If he had done this, he would have gone down.

Instead, he entered his hand at trick two with a spade and led a low heart. West was powerless to do anything against this play. If he took the ace, South would be able to score nine tricks—consisting of three spades, four hearts and two clubs.

And if West ducked the heart lead (which he did), dummy would win with the jack and South would then force out the ace of diamonds, permitting him to win nine tricks consisting of three spades, a heart three diamonds and two clubs.

West was dead either way. He had spoken out of turn.

Wheat Acreage Boost Forecast From Ottawa

OTTAWA (CP — Canadian wheat plantings of 24,600,000 acres — up four per cent from 23,792,000 in 1961—are indicated this year, the Dominion Bureau of Statistics reported. This is 11 per cent above the 1956-60 average.

The forecast reflected prairie crop optimism despite abnormally-low moisture reserves on the heels of last year's slim wheat crop of 261,000,000 bushels, less than half the 1960 all-Canada total of 489,000,000 bushels.

INCREASE IN OATS

Oats for grain in Canada—not including fodder—will take 12,000,000 acres or an increase of five per cent over 1961.

Barley indications at 6,100,000 acres are up only one per cent over 1961.

Biggest drop is in flaxseed at 1,900,000 acres, off 20 per cent from last year.

Rye—spring and fall varities —is up 13 per cent from 1961 at 587,200 acres.

Mixed-grain acreage is 1,600,000, four per cent above last year.

Rapeseed plans to reduce sowing by 18 per cent to 514,400 acres.

Potato acreage is expected to total of 317,000—four per cent below 1961 but three - per - cent higher than the five-year average. Prince Edward Island and New Brunswick indicated the sharpest cuts due to potato surplus.

Yesterday's Answer

DAILY CRYPTOQUOTE — Here's how to work it:

A X Y L D B A A X R
L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.
