On the Use of Campbell's Wine of Beech-Tree Croscote, in Diseases of the Lungs and Throat.

IN the South of France, where all persons threatened by Phthisis go to be treated; where Doctors Bouchard and Gimbert, the two specialists so highly recommended by public opinion, have experimented with all the proposed medicines against Pulmonary Tuberculosis, it is the years past they have finally adopted, after many comparative experiences, based upon the anti-septic method, having especially in view the destruction of the Bacilli.

After a few days' use of the remedy, the expectoration diminishes and very soon one is pleased to witness the gradual disappearance of the Bacilli, the breaking off of the fever and the rapid recovery of appetite and strength.

When instead of confirmed Phthisis, Catarrh or Chronic Bronchitis have to be dealt with, the rise to an uncertain diagnosis, they have always been cured. Those excellent results need not astonish us, if we consider the lucky and not associations of complete antiseptic and Balsamic principles in the compound, and which for ten years our Wine shall have restored health, it and at all events to discontinue its use at once, before winter sets in, and at every change of season followed by damp weather.

DIRECTIONS.—A small dessert spoonful three times a day, after each meal, gradually increased to a large dessert spoonful.

N. B.—The use of Cod Liver Oil, as a powerful stimulant to the remedial properties of the Wine, is recommended. Campbell's "Secret" Oil being the best, is the kind which should be taken. Sold by C. RANKIN, Charlottetown. nov6—ly eod
