THE DAILY EXAMINER

THE LEADING DAILY NEWSPAPER OF P. E. ISLAND,

sued every afternoon, from the office of E EXAMINER PUBLISHING COMPANY, in the adon House Building, Queen Street.

RATES OF SUBSCRIPTION.

(IN ADVANCE)

ONE YEAR	$4.00
SIX MONTHS	2.00
THREE MONTHS	1.00
ONE MONTH	0.35

Sent post paid to any part of Canada or the United States

ADVERTISING RATES

For small advertisements which are ordered for only one or two weeks the charge is 50 cents per inch for the first insertion, and 20 cents for each continuation. Rate cards are furnished on application at the office. Special contract prices at a reduced rate are quoted for advertisements four inches in size or larger, which are to run for three months or longer.

No special notices inserted unless paid for at the rate of 10 cents per line, and under no circumstances will such paid notices appear in the local column.

Special discounts made on all advertisements connected with Church Fairs, Bazaars, cnics, etc. No notices will be inserted with the same unless the regular rate of 10 cents per line is paid.

That THE EXAMINER is considered by our Merchants and Manufacturers to be the leading newspaper in P. E. Island, and consequently the most valuable advertising medium through which to make their announcements public, is abundantly proved by the fact that in order to accommodate our advertisers we have been compelled to enlarge the paper to its present size.

THE DAILY EXAMINER is for sale by the following agents:—

R. H. Mason, Post Office, Charlottetown
J. McIntyre, Malpeque Road, "
C. Paul, Lower Spring Park Road, "
W. M. Coffin, Grafton Street, "
S. Grey, cor. Water and Prince St. "
D. Chappell, Prince Street, "
Bazaar Store, Queen Street, "
Geo. Carter & Co., Queen Street. "
S. Gray, News Stall, P. E. I. Railway and on the trains.
M. & T. J. Walsh, Eclectic Bookstore, Summerside.
Harry McFarlane, Souris.
Hon. D. Gordon, Georgetown.
D. A. Egan, Mt. Stewart.
G. M. Clarke, Alberton.
A. J. McNeil Stanley Bridge.

The Weekly Examiner

s issued every Friday morning from the publishers' office. It is made up of matter which has appeared in the Daily editions, and is a first-class weekly newspaper—interesting and full of the latest news.

The subscription for THE WEEKLY EXAMINER, post paid to any part of Canada or the United States, is one dollar per year.

Advertising rates on the same scale as given bove for THE DAILY EXAMINER.

D. POTTINGER
Gen. Mgr. Can. Govt. Railways.
J. UNSWORTH, Superintendent.
Charlottetown, Dec. 14, 1893.

HAVE A GUESS.

Oh, wheelmen, all take my advice,
And don't forget, be sure
To take a look at the famous "Bike"
In PROWSE'S well-known Store.

The handsome Brantford Bicycle
That in their window's shown
Is as good as any in Charlottetown,
And it may be your own.

A jar in which are cents galore
Is placed where all can see;
Guess how many cents the jar contains
And the "Bike" your own will be.

Be wise, make all your purchases
At PROWSE'S Clothing Store;
Each purchase, on that Bicycle,
Will give you one chance more.

Their Carpets, Hats and Furnishings,
And all, in fact, they keep,
Compared with others in the town
Are more than quite as cheap.

MORTGAGE SALE.

To be sold by Public Auction, at the Court House in Charlottetown, on WEDNESDAY, the sixth day of June, A D 1894, at the hour of twelve o'clock, noon:—

All that tract, piece and parcel of land situate, lying and being on Township Number Sixty-one, in King's County, in Prince Edward Island, bounded and described as follows, that is to say:—By a line commencing at a stake fixed in the south side of the Sturgeon Road, and in the north-west angle of Farm Lot Number Seventy now or formerly in the possession of John Steele, and running thence by the magnetic meridian of the year 1761 south fifty-six chains and sixty links, or to the rear line of farms fronting on the north side of the Saint Mary's Road; thence along the said rear line west eight chains and eighty-one links; thence north to Sturgeon Road aforesaid, and thence along the same east to the place of commencement, containing by estimation fifty acres of land, a little more or less.

The above sale is made pursuant to a power of sale contained in a Mortgage dated the 15th day of November, A D 1881, made between Daniel Duncan and Sarah Duncan, his wife, of the one part, and Henry Coombs of the other part, and duly assigned to the undersigned.

For further particulars apply to Mr. William S. Stewart, Solicitor, Newson Block, Charlottetown.

Dated this 30th day of April, A D 1894.

RICHARD HEARTZ,
Assignee of Mortgage.

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptab's and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 75c. bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

W. R. Watson, Druggist, Charlottetown P. E Island. iymwtf

ERIE MEDICAL CO., Buffalo, N.Y.

MANUFACTURING AXES.

The Evolution of This Useful Article From Crude Steel.

On entering the main workshop, the first step in the operation which is seen is the formation of the axe-head without the blade. The glowing flat iron bars are withdrawn from the furnace and are taken to a powerful and somewhat complicated machine, which performs upon them four distinct operations, shaping the metal to form the upper and lower part of the axe, then the eye, and finally doubling the piece over so that the whole can be welded together. Next the iron is put in a powerful natural-gas furnace and heated to a white heat. Taken out it goes under a tilt-hammer and is welded in a second. This done, one blow from the "drop" and the poll of the axe is completed and firmly welded. Two crews of men are doing this class of work, and each crew can make 1500 axes per day.

When the axe leaves the drop there is some superfluous metal still adhering to the edges and forming what is technically known as a "fin." To get rid of the fin the axe is again heated in a furnace and then taken in hand by a sawyer, who trims the ends and edges. The operator has a glass in front of him to protect his eyes from the sparks which fly off by hundreds as the hot metal is pressed against the rapidly revolving saw. The iron part of the axe is now complete. The steel for the blade, after being heated, is cut by machinery and shaped. It is then ready for the welding department. A groove is cut in the edge of the iron, the steel of the blade inserted, and the whole firmly welded by machine hammers. Next comes the operation of temperiug. The steel portion of the axe is heated by being inserted in pots of molten lead, the blade only being immersed. It is then cooled by dipping in water and goes to the hands of the inspector. An axe is subject to rigid tests before it is pronounced perfect. The steel must be of the required temper, the weight of all axes of the same size must be uniform, all must be ground alike, and in various other ways conform to an established standard. The inspector who tests the quality of the steel does so by hammering the blade and striking the edge to ascertain whether it be too brittle or not. An axe that breaks during the tests is thrown aside to be made over.

Before the material of the axe is in the proper shape it has been heated five times, including the tempering process, and the axe, when completed has passed through the hands of about 40 workmen, each of whom has done something to ward perfecting it. After passing inspection the axes go to the grinding department, and from that to the polishers, who finish them upon emery wheels.

Telescopes of the Future.

In a paper by Mr. Alvin A. Clark on the telescopes of the future, the view is suggested that astronomers may look forward to the possession of instruments more powerful than any they now possess. When in 1846 lenses 15 inches in diameter were made most astronomers thought the limit of size had been reached. But in 1870 Mr. Newhall, Gateshead, England, built the 25-inch telescope, now at Cambridge. In 1873 26 inch glasses were made for the telescopes at the University of Virginia, and at the National Observatory, at Washington. Till recently the difficulty of getting suitable glass was the chief obstacle. Glassmakers have, however, continued to improve their processes for producing disks of glass of large size and free from imperfections. Perseverance has at length brought matters to the point that the only obstacles to getting glasses "of almost any size" are the time required to make them and the small number of persons having money enough to pay for them. This fact is illustrated in the increase of size of lenses in great telescopes in recent years. The 30-inch glass ground in 1880 for the Russian Imperial Observatory at Pulkowa was succeeded about 1887 by the 36-inch Lick telescope. At present Mr. Clark has under way the largest lenses ever constructed, of 40 inches diameter, for the University of Chicago.

Instruments of this prodigious size are required, Mr. Clark thinks, for original discoveries. Most important original discoveries have been made with the largest telescopes in use at the time. Once seen with the large glass new objects are readily made out afterward with smaller instruments. The fewness of large telescopes has greatly restricted the number of original discoveries. Reflecting telescopes will not, in Mr. Clark's opinion, compete fully hereafter with refractors in po, The large telescopes of this class have rarely, he says, accomplished much except in the hands of the opticians who made them. They are extremely sensitive to unfavorable conditions that effect the use of high magnifying powers. The tendency is to displace the reflecting telescope.

But the makers of the great lenses of refracting telescopes have great difficulties to overcome. They are able now to procure the great disks required, but to figure them, to give them the proper shape, and to polish them, require the highest skill of the scientific optician. "He must be an artist in color," says Mr. Clark, "as well as in light and shade, in order to do the perfect work required." The task is a hard one, and its difficulty increases with the constant increase of size. Machinery is available for the rough work of the first stages of manufacture, but the fine grinding and smoothing are always done by hand. The finishing touch can never, it is thought, be given otherwise than by hand.—Baltimore Sun.

Shipboard Signals.

A system of signaling from the captain of a vessel to the engineer by electric bells has recently been invented by a Mr. Robert Eruschaw, of Chicago, says the Railroad Gazette. When operated there is a simultaneous display of signals to both sender and receiver. The unique feature of the mechanism is the automatic "set back," that is, after a signal is given and registered, the giving of the next signal first throws back the register of the former one before the new signal is displayed. This is a device that could be applied to elevators, etc., with advantage. The inventor is perfecting a device that will print in a fire and waterproof box all signals to the engineer with the time, date and rate of speed attached, so if the vessel sinks, and the box can be secured, it will be positive evidence as to what fault caused the accident.

The Army of the Slain.

More railway employes were maimed and mangled last year in the United States than the country lost in wounded and missing on the field of Gettysburg.

ALL DISEASES of the blood are cured by Hood's Sarsaparilla, which by its vitalizing, enriching, and alterative effects makes only PURE BLOOD.

Pond's Extract, a medicine confined to a certain number of diseases. It will cure pain, inflammation or Hemorrhage, external or internal.

The April statement of the United States Treasury shows an increase of $10,011,120 in the public debt during the month.

TANNIN IN TEA.

Percentage of Tannin in Different Brands of Tea.

Some examples which have been forwarded to us, says the British Medical Journal, of the results of analyses for tannin and theine in tea indicate considerable variations in the amount of tannin, according to the quality of the tea and the state of growth at which it is picked. In some blends of China teas the percentage of tannin extracted by infusion for thirty minutes was 7.44; theine, 3.11; and a similar result was given in the examination of the finest Moying; while, on the other hand, with fine Assam tea a percentage of 17.73 of tannin by weight was extracted after infusion for fifteen minutes, and two blends of Assam and Ceylon tea, gave, respectively, 8.91 and 10.26 of tannin. On the whole, it is probable that the Indian teas are much more heavily loaded with tannin than the China and Japan teas. Moreover, the common method of prolonged infusion in boiling water is well calculated to extract the tannin, while it dissipates the flavor of the tea.

To be drunk reasonably, tea should not be infused for more than a minute, and with water of which the temperature does not exceed 170° F. It should be taken without sugar or milk, which would drown the flavor of the delicate and aromatic infusion thus obtained. This, at least is how the tea is drunk both in China and Japan, whence we have borrowed the use of it. With our European method of prolonged infusion in boiling water we destroy all the best flavor of the tea, and we extract such heavy proportions of tannin as to cultivate indigestion as the result of tea drinking. Indigestion is unknown among tea drinkers in the East, and it is in all probability only the result of defective use of the leaf.

Child Inebriety.

At first thought it would hardly seem necessary to discuss this subject in respectable communities. When one remembers, however, how often a little whisky or brandy is prescribed for trifling ailments, such as colds, stomach trouble, etc., there would seem to be some foundation for the remarks of Dr. Keeley in a lecture delivered at Minneapolis, Minn. The doctor said: "Alcohol is the same liquor on the nursery table or sideboard as in the saloon, and has the same effect when given to a baby as when taken by an old person. Much has been said about the heredity of inebriety, but there is no evidence that this disease is hereditary. If it is possible that its heredity reaches back any further than the cradle and the nursery, then it certainly can reach no further than the influence that alcohol may have on the unborn child if liquor is drank by the mother. I do not doubt that inebriates are born and made in this manner. Mothers may sometimes be inebriates or take liquor as a remedy. The danger is to the child. The alcohol, no doubt, circulates through the brain of the unborn infant under such circumstances, and puts the stamp of inebriety on the delicate tissues.

"When the child is born its first crying breath is likely to inhale the odors of liquor. It enters the cradle and its cry is satisfied by opium and whisky. The method of causing inebriety in childhood is the secret of intemperance. It is to intemperance what the riddle was to the dragon slain by Jason when he recovered the golden fleece. That alcohol is a universal and general prescription for children's diseases needs no proof. I do not doubt that a satisfactory substitute can be found in each case for the alcohol given under these circumstances for children creates the disease of inebriety. Mothers should not give their children alcohol, and medical science must find us a substitute."

A New Use for the Compass.

A man who has decided theories on hygienic subjects is said to carry a compass in his pocket for the proper placing of his bed when traveling. He thinks this of the utmost importance in securing perfect repose, and urges his friends to form the habit of sleeping with the head towards the north, in order to get the benefit of the electric currents which are constantly passing from north to south.

This is a very old theory, and it certainly would be well for poor sleepers to test it.

In the absence of a compass it is said that a watch may do duty for one by pointing the hour hand to the sun, when the south will be exactly half-way between the hour and the figure XII. on the dial of the watch, and of course the point directly opposite would be the north.

In houses which face east or west this method of placing the bed in sleeping-rooms is generally the one best adapted to the shape of the room, but where the exposure is north or south it might have an awkward effect.

To remedy this, set a projecting brass rod in the wall a short distance from the ceiling, and of a length equal to the width of the bed. Throw over it a long scarf, tent fashion, and push the bed up under it close to the wall.

This scarf may be made of two widths (for a single bed) of dotted Swiss or any delicate white goods, ruffled all around, or of one of the dainty colored chintzes which will bear laundering. It should reach within a foot or so of the floor, and serves to cover the back of the bedstead, which, if not of brass, might be unsightly set in this way.—Harper's Bazar.

Mothers.

As I am my mother made me.—John Q. Adams.

The mother's heart is the child's schoolroom.—H. W. Beecher.

All I am, or hope to be, I owe to my angel mother.—Lincoln.

An ounce of mother is worth a pound of clergy.—Spanish proverb.

The future destiny of the child is always the work of the mother.—Napoleon.

Unhappy is the man for whom his mother has not made all other mothers venerable.—Richter.

Youth fades, love droops, the leaves of friendship fall, but a mother's secret hope outlives them all.—Holmes.

If the whole world were put into one such scale and my mother into the other, the world would kick the beam.—Lord Langdale.

I think it must be somewhere written that the virtues of mothers shall occasionally be visited on their children as well as the sins of the fathers.—Dickens.

Ready to Begin.

The "Governor"—Now that I've paid your debts, Harry, you can make a new start.

Harry—Thank you, father; please lend me a hundred.

A Long Verse.

The fourth verse of the twentieth chapter of Revelations contains more words than any other verse in the New Testament.

How to Get a Sunlight Picture.

Send 25 "Sunlight soap wrappers (wrappers bearing the words "why does a woman look old sooner than a man") to Levey Bros., Ltd., 43 Scott St., Toronto, and you will receive by post a pretty picture free from advertising, and well worth framing. This is an easy way to decorate your home. The soap is the best in the market and it will only cost 1 c. postage to send in the wrappers, if you leave the ends open. Write your address carefully.

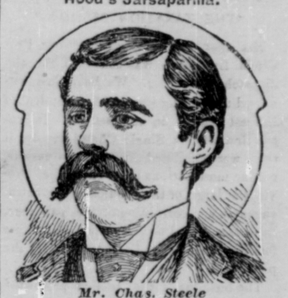
Broken in Health

That Tired Feeling, Constipation and Pain in the Back

Appetite and Health Restored by Hood's Sarsaparilla.



Mr. Chas. Steele
St. Catherine's, Ont.

"C. I. Hood & Co., Lowell, Mass.:

"For a number of years I have been troubled with a general tired feeling, shortness of breath, pain in the back, and constipation. I could get only little rest at night on account of the pain and had no appetite whatever. I was that tired in my limbs that I gave out before half the day was gone. I tried a great number of medicines but did not get any permanent relief from any source until, upon recommendation of a friend, I purchased a bottle of Hood's Sarsaparilla, which made me feel better at once. I have continued its use, having taken three bottles, and

I Feel Like a New Man.

I have a good appetite, feel as strong as ever I did, and enjoy perfect rest at night. I have much pleasure in recommending Hood's Sarsaparilla." CHARLES STEELE, with Erie Preserving Co., St. Catherine's, Ontario.

Little Josephine Libby.

Old age and Childhood NEED SPECIAL CARE, AND THEY Depend upon Others FOR Guide and Support.

HOW PLEASANT

it is to see an aged person with an elastic step, a bright smile and a kind word, and hear the child with its merry laughter ringing in our ears: these denote good health, which can be found in

Skoda's Discovery.

Mr. Chas. Libby, of Auburn, Me., says: "My little girl Josephine, had congestion of the lungs, which left her very nervous and weak. She also had a humor break over her body; after giving her a bottle of Skoda's Discovery and using a tube of Skoda's Ointment, the humor entirely left her. She is now well and strong."
