Ross "Johnnie" Young, who operates the new Imperial Esso Service Station which will be officially opened at Red Point on Monday is pictured above.

A new modern service station, operated by Ross "Johnnie" Young will be officially opened on Monday at Red Point.

"Johnnie", as he is familiarly known, is no stranger to automobile operators in the Eastern area of the Province. For the past three and a half years he has operated a service station at the stand where he has constructed his new building.

His years of prompt and courteous service to the

public has resulted in an ever-increasing trade and it was this expansion in business which influenced him to expand his facilities and thereby provide better service facilities for his customers.

"Johnnie" has spared no effort in his determination to make this Imperial Esso Service Station one of the best. He has constructed a building 60 feet long by 30 feet in width and among other things it houses a completely equipped mechanical and greasing section.

The building also contains a large office and parts department. It was erected under the supervision of Major Young with the lumber being supplied by R. W. Dixon of East Baltic.

There are two large modern doors for entrance to the mechanical and greasing sections. The entire floor of the building is of cement supplied by H. P. MacDonald of Bothwell and the electrical wiring was installed by Preston D. MacLure of Montague.
