

Worms.

HOW PEOPLE GET THEM—SOME INVESTIGATIONS OF TROUT—TWENTY-FOUR FEET TAPE-WORM IN A SALMON.

During the past few weeks, a number of trout have been seized by the police, under instructions from the City Medical Officer, as unfit for food.

It is well-known that spring salt water fish, mackerel and herring may look nice, but are not so good as fall fish; the former being known by the appellation of "leather bellies."

Among the bottles are to be found samples of the eggs of the tape-worm in which it is almost impossible to destroy the germ of life, it being necessary, it is said, to subject them to a higher temperature than 212 boiling point.

A distinguished Boston clergyman desiring to inform his mother of an interesting domestic event, sent her a postal card containing the following directions:—

A SINGLE box of Mack's Magnetic Medicine will prove to any sufferer from nervous prostration or weakness of the generative organs, that it is the best and cheapest medicine ever sold for this class of disease.

According to Mr. David Mills, Solomon once said: "If a man deceives me once, that's his fault; if he deceives me twice, that's my fault." It is to be regretted that Solomon did not include this sage observation among his other proverbs.—Mail.
