Mission Continues At Saint Paul's

"Can we know that we are accepted by God? That our sins are put away? Real conversion is always life transforming. Many people feel and say that they do not like the word conversion or to hear someone say that they are converted. But these are Bible words used by our Lord Jesus Christ," pointed out Mr. Tom B. Rees, popular English evangelist, at Saint Paul's Church last night.

Alterations To Telephone Bldg. Nearing Completion

The staging which has surrounded and obscured the view of the new additions to the Telephone building on the corner of Queen and Fitzroy Streets, has been removed, disclosing a modern building of proportions well calculated to look after the expanding needs of the Company for many years to come.

Alterations and improvements have been proceeding also in the interior, where the work on the ground floor for general public purposes has been completed and arranged with desk room for clerks in the modern manner designed to look after individual customers by areas assigned to each clerk. One cashier will be on full time duty, with a view to speeding up individual attention to all subscribers.

Removal of the old roof, made obsolete by the erection of an additional story on the original building, is now under way. Work on the various rooms, including the large extension necessary to house the new toll board, is rapidly reaching completion. All the equipment necessary for the installation of the dial system is being manufactured in Canada and is of the most modern design for such equipment.

It is not possible to say with any degree of certainty when the dial system will be installed and in operation at this stage of the work.

Less Base Lifting Required On City Streets Than Expected

Col. F. J. Storey, chairman of the Street Committee of the City Council, called the members together yesterday afternoon in special session to review the situation regarding the work in progress, and to discuss further proposals to be presented to the Council at their forthcoming meeting, scheduled for Tuesday next.

It was developed at the meeting that the detailed survey of the streets has been completed and Mr. Hewitt, engaged by the City to supervise the proposed new street work, expressed the belief that less base lifting would be necessary than the original superficial examination disclosed. The patching will be complete in about one week, after which the men will be diverted to the sidewalk patching crews, where levelling and replacing broken sections will be proceeded with at a more rapid pace.

He explained also that when the paving work is being done at the intersection of Prince and Grafton, conduits will be placed in readiness for the "Stop and Go" signal wires, when the decision is reached to run them. The same preparation will be made at the intersection of Longworth Avenue and Euston, where a centre light may eventually be placed, to give proper direction to the traffic at this unusual intersection.

A "Cut Back" of the curb at Ambrose Street, on North River Road and a similar treatment on West Street, at the intersection of Kent, will be proceeded with at once, to permit cars to make these turns with less difficulty than is now experienced.

It was also disclosed at the meeting that all the equipment of the Warren Paving Co., to be used on the city street job, has been placed on location on the Mount Edward Road, and that the large steam boiler will be set up early next week. The rollers, used on the city end of the job are now stored here, ready for use.
