

"Just Precautions," Says P.E.I. Air Commodore

By JACK BRAYLEY Canadian Press Staff Writer NICOSIA, Cyprus (CP) — The beautiful countryside, rolling by, was undisturbed even by a breeze.

Higher up, winter stayed reluctantly with long fingers of warning brown extending into the snowy slopes.

Then the staff car made a hair-pin turn in the mountain pass and there was no longer any peace.

Ahead was a young peasant adjusting the pannier on his donkey.

SUDDEN DANGER The driver of the car, with one motion applied the brakes and dropped a hand to his revolver.

The guard in the front seat un-snap-ped the safety catch on a sten gun.

Air Commodore A. J. (Tony) Shelton of Ch'town, P. E. I., a Canadian in the RAF, calmly explained.

"Just precautions. That's the way the terrorists operate. It's usually a youngster with firearms or a home-made bomb in a bag ready to fire or throw when you're passing—and then a dash into the cover of the hills."

Lending weight to the air commodore's terse summary of EOKA operations was a story in a newspaper under his arm. It told of a lad charged with having bombs

and ammunition in a bag strapped to the handlebars of his bike. COMMANDO PATROLS

He was caught; and while our staff car rounded another turn in the pass, it was obvious that this lad, too, had little hope of getting away if, in fact, he was carrying explosives.

For at this moment platoons of commandos were converging on the spot from all angles, their progress directed by walkie-talkies.

This was one of a series of jolting wartime interruptions to the pastoral tranquility in a trip of less than 20 miles from this capital of strife-torn Cyprus to the Canadian's home in the old Crusaders' fortress town of Kyrenia.

At one point, British troops were searching Cyprus. Further along, a convoy of camouflaged helicopters swooped over the treetops to drop a platoon into a ravine on a beat through the bush.

MANY PLANES The area bristled with military activity as the car wound through the mountain range and down toward the sea. From the crest, a mighty collection of air and military power could be seen on the wide central plain with Nicosia in its centre.

Jet fighters and bombers are much in evidence in the skies overhead. Widely spread on the ground are the mushroom patterns of tent towns that hold brigades, many of which keep their fighting edge with patrols against the EOKA.

Obviously Britain has decided, temporarily at least, that her eshe shall stand in the eastern Mediterranean.

Tells Legislature

(Continued from page 1)

season and the uncertainty of the weather we decided that we would use the building and have our official opening during Mental Health Week of this year.

"The first floor of this unit in its central portion is occupied by the administration and business offices and out-patient treatment unit. The east wing for females and the west wing for males—30 beds in each wing.

"The upper floor in its central portion provides for the insulin unit, nursing office and training school.

"The east wing contains the Lab and X-Ray Department, Operating Room, Dental Unit and the ear, eye, nose and throat Unit. The west wing provides further beds for males and females.

BUILDING PROGRAM "A new residence is being constructed for our registered nurses and for affiliates in training. The building now occupied by our students in training will be used as female staff quarters.

"Our Laundry has been enlarged to look after the increased volume of work and it is hoped that this laundry can now be a central laundry for all our institutions with the exception of the Sanatorium.

"When our new nurses' residence is completed we hope to have about twelve student nurses from our general hospitals affiliated with the hospital for psychiatric nursing. This will be of great benefit to us as well as to our nursing profession.

"All of our general hospitals that have nursing schools in the province have informed us of their eagerness to co-operate in this nursing program."

TREATMENTS The following is a report of treatments given:

Number treated 22 49 Recovered 22 8 Much Improved 6 20 Unimproved 2 11

Sub-Coma Insulin 2 10 Treated 1 6 Unimproved 1 4 Prefrontal lobotomy 6 2

Number of operations 2 0 Returned home 2 0 Much improved 2 2 Improved 2 0

CONSTRUCTION CO.—In a recent issue of the Royal Gazette it is noted that within a short time an application will be made to the Lieutenant-Governor in Council for a Charter of Incorporation by Letters Patent to incorporate the Hillboro Construction Company Limited. The objects for which incorporation is sought include building and contracting. The capital stock of the company is \$120,000 divided into 12,000 shares of \$10 each. The applicants are Francis W. Curtis, George A. Hawkins, Ernest S. Matheson, all of Charlottetown, Louis H. Poole, Montague, George J. Hayes, Theron D. Morrison, both of Summerside. All are described as Construction Managers.

RE IN MEMORIAM Mrs. Laura Murphy (Walsh) Sympathy Cards in addition to those previously listed were received from Rev. Daniel Driscoll O.M.I., Ottawa, Mr. and Mrs. Fred Murphy, Port Hope.

ON TOUR—Mr. Wallis Scantlebury of Charlottetown, will leave today on a tour of plastic factories in the United States. He will be accompanied by Mrs. Scantlebury and son Roy and will spend some time in Florida.

CARD PARTY HELD—Winners at the Spring Park Card party were: Ladies first, Mrs. Dolph Gallant, second, Mrs. Maurice Doucette; consolation, Mrs. Nelson Whitlock; Gent's first, Clement Wynne; second, Henry MacLeod; consolation, Joe Cheverie; freeze-out Joe Gauthier and Dolph Gallant.

EGG GRADING Short Course Provincial Convention, 8 p.m. to 11 p.m. March 11th to 20th. A few more applications will be accepted. Assistance is given to help students pay board. Enrollment takes place at the Vocational School 3.00 p.m. March 11th to evening. Young men and women 16 years of age or older, apply at once to the School Principal or phone 4647 or 3774.

CARD PARTY — At a card party held at St. Pius X Hall prize-winners were as follows: Ladies 1. Mrs. Margaret Walker, 2. Mrs. Margaret Dowling, low Mrs. Victor Clow; men's 1. Gerome Dolron, 2. Victor Clow and Fred Driscoll (tied), low Joseph MacEachern; door prize C. Morrissey; freeze-out Mrs. Percy MacDonald and Mrs. Vincent Shea.

WIN "SILVER DOLLARS" Get your entry form in to the "Silver Dollar Men". Forms are attached to every carton of Nesbitt's orange and Evangeline flavors and every large bottle of Evangeline. Win up to eight Silver Dollars. Listen to "The Silver Dollar Man" every Tuesday and Thursday over C.F.C.Y. 11.30 a.m.

LEGION PAST PRESIDENT HONORED

Wednesday evening the newly elected executive were hosts to the retiring executive of the Charlottetown Branch of the Canadian Legion, B.E.S.L. in the Clover Club.

Although the evening was filled with music, sing-songs and entertainment, the principal feature was the presentation of the Past President Medal to comrade Vic Bowlan, right, by President Spurgeon Leard, left.

In the address which accompanied the presentation, President Leard gave credit and praise to Past President Bowlan and his retiring executive for the splendid manner in which the affairs of the Legion had been conducted during their term of office.

\$31,000 Objective For PEI Red Cross Campaign

Brigadier G. G. K. Peake, D.S.O., chairman of the Red Cross campaign in Charlottetown, reported last night that the canvass got underway in the City on Monday of this week, when one lady and 35 gentlemen under Dr. Louis H. Poole, Montague, started the rolling toward gathering in the \$12,000 required as Charlottetown's share of the provincial objective of \$31,000.

When questioned as to the reason for the increased objective this year, Brig. Peake explained that rising costs and expanding services have made it necessary to increase the objective by 6.8%.

"Everyone knows," he said "that the dollar buys only one-half of what it used to." The amount being sought is not the exact sum required to meet the budget requirements of the ten divisions and the national headquarters, and each Province has had its objective "upped" by 6.8% accordingly.

Brig. Peake pointed out that while it costs \$60,000 to provide Red Cross services in Prince Edward Island, residents of this Province are only asked to contribute \$31,000. The balance of what is required comes to us from what is collected across Canada.

"Knowing that we are a 'debtor province', Brig. Peake remarked, "I am sure our Islanders will want to uphold their reputation by at least subscribing the \$31,000 which is our provincial allotment—more if possible."

He said, too, that if those who formerly subscribed \$1.00 would consider doubling their contribution this year, they would not be too much difficulty in raising the objective. He also mentioned the fact that contributors should base the amount of their contribution to campaigns of this kind on the amount of the objective. Naturally, the individual and business contributions to a campaign for \$31,000 should be larger than to one which has, say \$10,000, as its goal.

more polo patients who are waiting admission to the Orthopedic Centre for treatment. These people are polo victims of previous years and are keeping the Orthopedic Centre working to 100 per cent capacity.

"We hope that if another physio-therapist becomes available to us we will be able to treat a great number of the Cerebral Palsy children, as it is found that in many of these children, physiotherapy can be of great assistance in making them useful citizens."

IN HIS REPORT, the Minister of Health reported there were the following number of cases of notifiable diseases in the provinces during 1956: chicken pox-100; conjunctivitis of newborn including G.C. Ophthalmia-2; diarrhoea of newborn, epidemic typhus-0; biliary dysentery-22; food poisoning-0; gonorrhoea-36; malignant neoplasms-164; measles-575; mumps-351; poliomyelitis-4; small pox-0; streptococcal infections-774; tuberculosis-44; typhoid and paratyphoid fever-0; undulant fever-0; whooping cough-537; influenza-3,242; infectious hepatitis-115; meningitis meningococcal-4.

MATERNAL HEALTH Reporting on child and maternal health, Dr. Bonnell said that during the past year an equipment was bought through the Child and Maternal Health Grant and provided such things as oxygen analyzers, oxygen limiters, for better control of oxygen used by incubators; an infant resuscitator, formula bottle washers and croupettes. These instruments, he said, had a great deal to do with reducing the infant mortality rate.

He referred to the bursaries provided by the grant by which nurses were given the opportunity of taking a six month's course in obstetrics, pediatric nursing and clinical teaching at McGill University.

"Not only the patients benefit from these courses but the student nurses benefit from the training they receive from nurses who have taken these courses," said Dr. Bonnell.

He said the Department at the present time was considering buying a supply of fibrinogen which is used in the control of post partum haemorrhage. In cases where its use is indicated it is a life saving measure.

CANCER CONTROL Dr. Bonnell said he wanted to clear up what appeared to be a misunderstanding among some of the practicing physicians in the Province in regard to Cancer Control. He said some doctors have made a practice of sending patients to the hospital for cancer diagnosis without first having informed the Cancer Control Clinic.

He said notification to this effect has been sent to all doctors in the Province and he wanted to make it clear that the Department will not assume the regular cost of the first three days in hospital if the case is not first referred to the Cancer Clinic.

He said that previously only the three larger hospitals in the Island were recognized by the Clinic for admission for diagnosis. But after further consultation it is now agreed that this diagnosis may take place in any registered hospital providing the Clinic is first informed.

Says Oysters Are Depleted

VINELAND, N.J. (AP)—Oyster beds throughout the world, said Dr. John J. McDermott Tuesday, are facing rapid depletion because of overfishing.

McDermott, of the oyster research laboratory at Bivalve, N.J., urged "active conservation efforts" to keep the oyster on the dinner table.

Preservation of "natural seed beds" is the "central focus of the industry's problems today," he said at a service club luncheon.

One of the oldest schools in England, the Carlisle Grammar school was founded in 1170.

Snowfall Only Slightly Above That Of Last Year

Contrary to the prevailing opinion freely expressed, the snowfall in the month of January and February of this year exceeded that of last year by only three and a half inches, according to official figures released by Warren A. Burns, weather observer at the Experimental Farm. The recorded snow-fall in January of this year was 33 1/2 inches as compared with 30 1/2 inches last year and for February the increase was half an inch at 32 1/2 inches as compared with 32 inches last year.

Mr. Burns pointed out that the big thaw last winter disposed of a great deal of the snow, preventing a steady accumulation. Driven by strong winds and gales, to lodge in the country cuttings and city streets, this year the problem of removal becomes a pressing one incident to these conditions

rather than the amount of snow falling.

Moving into the temperature figures a different picture is presented. In January of this year the highest daily temperature was 47, (on January 23) and the coldest was 19 below zero on Jan. 14. The mean temperature for the month was about 17 degrees colder than in January 1956.

For February the highest temperature this year was 43 (Feb. 27) and seven below zero was recorded on the thirteenth. The mean temperature for February this year was 19.2 and last year 19.8.

Hours of sunshine in January this year exceeded by far the recording of last year; totalling 105.1 as compared with 31.9 in February this year the recording showed 120.5 hours as compared with 137 hours last year.

Premier Will Ask For Money To Finance Frozen Food Plant

Premier Matheson stated in the Legislature Monday that due to credit restrictions imposed last Fall the Industrial Development Bank which had previously agreed to finance a large portion of a \$450,000 frozen food plant had to renege on the original amount offered.

Under the original agreement the Provincial Government would put up \$125,000. Mr. Heeneey of the Heeneey Frosted Food Company would put up a similar amount and the I.D.B. would supply the remaining \$200,000. After the credit restrictions were imposed the Bank stated they were prepared to loan only \$100,000 which meant that Mr. Heeneey would have to raise an additional \$100,000.

MR. MATHESON said Mr. Heeneey had already made application to the Island Government for a loan of this amount and indicated that the House would be asked to approve such a loan before the Session ended.

The Premier said when the idea was first proposed, Mr. Heeneey said he wanted to make sure that the type of fruit and vegetables required for the plant could be grown on the Island.

During 1956 a test program of all the products required was carried out under the direction of Mr. Wright, provincial horticulturist who has since become employed by the Heeneey Company. These tests, the Premier said, were entirely satisfactory to Mr. Heeneey who at that time indicated his desire to see the plant in operation as soon as possible this year.

Premier Matheson expressed great disappointment at the Bank's failure to go through with its original agreement but felt that the food processing plant was too important to the Province to allow it to fall through at this time.

MR. ROOP Councillor Foster extended the sympathy of the Council to the family of the late J.M. Roop. He said that the City had lost a fine citizen, the Market Committee a fine tenant, and they had lost a good friend.

Mayor Stewart announced that the National Intercollegiate Debating Champions from St. Dunstan's University would be invited to the Council meeting Monday evening to receive the congratulations of the City and a memento of the occasion.

The meeting was attended by Mayor Stewart, Councillors Gaudet, Gormley, McCormac, Haslam, Foster and Nicholson.

TO PRESENT CREDENTIALS LONDON (Reuters)—John Hay Whitney, new United States ambassador, was scheduled to pay his first courtesy call on Foreign Secretary Selwyn Lloyd Wednesday night. He will present his credentials to the Queen at Buckingham Palace today.

BREAKUP STARTING SAINT JOHN, N.B. (CP)—The annual breakup of St. John River ice has begun. Clear patches of water extend from the open harbor here to Harding's Point, about 15 miles upriver. There has been no indication yet of flooding.

Streamlining Of Tax Notice Procedure Sought By The City

In a move to reduce the work and cost of delivering separate valuation notices and tax bills the Charlottetown City Council has resolved to petition the Legislature to amend the City's Act of Incorporation. The present system was adopted to permit appeals against assessment to be heard and decided before the tax-rate was struck. Since the system of scheduled rates was established in 1952, however, appeals have been few and have a minor effect on the tax rate.

The amendment proposed at an emergency meeting of the Council Tuesday morning will also permit the combined assessment and tax bill to be delivered by mail or otherwise. Provided public notice is given in two Charlottetown newspapers at least five days before the last mailing date, omission to mail a particular notice will not prevent enforcement of tax payment. The proposed amendment also provides for correction of a typographical error in Sec. 110.

The regular banking resolution authorizing the City to borrow the sum of \$1,000,000 from the Royal Bank of Canada was passed.

MAYOR LEAVING Mayor Stewart stated that he was leaving this morning, Wednesday, and would be away three weeks. In reply to a question from Councillor Gaudet he said that a request for legislation permitting a possible plebiscite on joining with surrounding villages

INTERCEPT GUN

JERUSALEM (Reuters) — Israeli troops intercepted a caravan of Arab gun runners in the Halutzim area, southwestern Negev, 20 miles from the Gaza Strip. Sunday night, an Israeli military spokesman reported Monday. He said one Arab and three camels were shot dead in an exchange of fire. The dead camels were laden with arms and ammunition, he added.

WEATHER

TORONTO (CP) — Temperatures issued by the Toronto public weather office:

Table with columns: Min (Night), Max (Day), Dawson, Vancouver, Victoria, Edmonton, Calgary, Regina

OTTAWA, (Special) — Beauties and attractions of Prince Edward Island were extolled by Senator Elsie Inman when supporting a proposal by Senator Harold Compton of Halifax to extend the machinery to increase tourist traffic to Canada. The Island Province, she said, is unsurpassed as a vacationland and "May truly be called the unspoiled holiday paradise of the Atlantic seacoast."

Not only is it catering to the travelling public profitable for its own sake, Senator Inman said, but if volume of tourist traffic to the Island increased appreciably, much of the farm produce of the Province would be used right on the spot and help to solve trade and export problems.

Residents and representatives of the Province, she said, are noted for being modest, but in the matter of the beauty of land and seas and many other attractions, they should not hide their light and let it under a bushel. She emphasized how readily accessible the province is both by sea and by air.

With 3,000 miles of highway, much of the main roads being paved and virtually no steep hills, driving conditions were very good, she said. Free from the menace of hay-fever and landscaped by nature itself, the vistas delight the visitor with contrast of red soil against greenery. Senator Inman said she and colleagues of the upper chamber:

"Since the day when the Indians peered through the trees at the strange boats which brought Cartier and his men to our shores, Prince Edward Island has remained a land of enchantment and romance."

Beaches of the Province are the finest in Eastern Canada, Senator Inman continued. Large areas are

patrolled by life guards and there is ample shallow water in which children may play. The angling, hunting and swimming facilities along large sections of the coastline are excellent, she said. In speaking of deep sea fishing, she told of catching a cod which at one time she feared would drag her out of the boat into the waters of the Gulf. The Island, she added, also provides excellent horse-racing and yachting.

In Province, Senator Inman said, is a land of sun, surf and relaxation where peace and quiet prevail and where a cordial welcome awaits the visitor.
