We have sold a large quantity of Coal from the above Company's Mines this season, which has given entire satisfaction, and are now prepared to sell at very lowest prices

PEAKE BROS. & CO., Selling Agents for Dominion Coal Co., Ltd. Charlottetown, November 7, 1894—16

DON'T WORRY! TRY SUNLIGHT SOAP. IT BRINGS COMFORT ON WASH DAY

FEATHERBONE. Corsets are now recognized to be the Standard Corset of Canada. Satisfaction guaranteed or money refunded.

COMBINES. Are as a rule objectionable, because they benefit the few at the expense of the many. But there is at least one combination that will commend itself favorably to everybody and that is the celebrated

HIGHLAND RANGE. Which combines in itself all the good features of the ordinary Cook Stoves, with several distinctly its own. We are the only people in Charlottetown selling AMERICAN STOVES. Buy a Highland and have peace and comfort in your home.

Every Range Warranted. Local References. FENNELL & CHANDLER. Charlottetown, November 2, 1894—m w f

Priestley's Dress Fabrics. In the long run it is the quality of the material that will determine the success of a lady's costume. Every lady who has at all studied the matter knows this. Priestley's Black Dress Goods are the best that the market affords. That is conceded on all hands. The ladies of Great Britain cordially acknowledge it. The American ladies prefer Priestley's dress fabrics to French. Our Canadian ladies are now asking for them. They wear better than other goods; but their great charm consists in a peculiar richness and softness of appearance, and a flexibility which enables them to drape in the costume with that suggestion of flow and rhythm which it is the dream of all tasteful women to realize.

Cranby Rubbers. Always to the front. This season's goods finer than ever. Now that the public is familiar with the excellent Quality, Style, Fit and Finish of the Granby Rubbers, the demand is almost universal. Everybody wants them. Every dealer sells them. Granby Rubbers Wear Like Iron.

THE ELECTRIC FLUID. A FORCE OF NATURE NOT YET UNDERSTOOD BY SCIENCE. Whence Come Those Deadly Bolts?—Weather Bureau Investigating—Some Extraordinary Pranks Played by Thunder Bolts.

So mysterious and little understood is electricity, even now that it is so widely utilized for mechanical purposes, that its vagaries in nature excite the utmost interest. The question recently discussed by Italian scientists, as to whether a bird can be struck by lightning, seems to be answered in the affirmative by the destruction of a whole flock of wild geese on April 30 last. Twenty-two of them, flying north over Ansonia, Mich., were slain by a bolt from the sky. Such an extraordinary event would have been regarded as an ominous portent a century or two ago. The action of lightning as an explosive is a subject that has elicited special attention from the weather bureau of late. Up to date no theory has been found to account for it satisfactorily. On April 30, 1894, a brick house at Kewok, Ia., was struck and completely wrecked as if a bombshell had done the work. One day earlier a farmhouse near Kiowa, Kan., the property of D. R. Streeter, was completely ruined by a bolt, the roof, doors and windows looking as if they had been shot full of holes. At Barber's Landing, on June 18, 1888, the dwelling of William Martin was literally torn to fragments by a similar agency. Inasmuch as two hundred people are killed every year by lightning in this country special protection for the person is rarely called for. One ingenious scientist mentioned by the Philadelphia Times has devised an umbrella with small copper chains attached to the end of the ribs. These are long enough to reach the ground. A thunder-storm coming up they are loosened and permitted to dangle, while the owner of the contrivance walks along in perfect security. Under such circumstances metal about one's body is dangerous—for example, the wires in a lady's bonnet. But this peril may be overcome by fastening similar chains or copper threads to the frame-work of the headgear. Though a bolt should destroy a bonnet, the electricity would spare the wearer and pass off into the ground. An instance on record is that of a lady who raised her arm to shut a window as rain began to fall on a summer's day. There was a sudden blaze of light and, though she was unharmed, her gold bracelet disappeared so that no vestige of it could be found. A sulphurous smell was observed in the air. This, scientific men say, is quite usual when lightning strikes, being due to an excess of ozone generated by the electricity. The atmosphere in its usual condition contains one ten thousandth part of ozone. When this proportion is increased inconveniently is felt by men and animals. It has been suggested that sometimes persons found dead after a stroke of lightning, though showing no marks of injury, may have been suffocated by ozone.

Lightning does occasionally strike twice in the same place. A few years ago St. Aloysius' church in Washington suffered. A flash ran down the lightning rod to within twenty feet of the ground. Then it left the rod, passed through twenty feet of air space to a water pipe and broke a washstand. Six years later the same thing was repeated in every detail, the electricity leaving the rod at the same point, running to the water pipe and shattering it in pieces, which had not been mended. The Church of the Incarnation, in Washington, was also badly hit. To prevent a repetition of the accident the edifice was protected by a very elaborate and costly system of rods. The most important rod, of course, protects the steeple. It ought to terminate in a sharp point, but the church authorities thought it more appropriate that it should be surmounted by a cross, on top of which was placed a rooster. Thus the usefulness of the defensive contrivance has been almost wholly destroyed, for so it stands at present.

The introduction of lightning rods in Roman Catholic countries was strongly opposed on religious grounds. Pious persons declared that the devices were of the devil, and called them "heretic rods." It was a long time before the churches would adopt them, though buildings of that description have always been the greatest sufferers from celestial fire, on account of their tall steeples. During the last century a certain church in Carinthia was struck so often that services were discontinued during the summer months. It was hit four or five times a year on an average. In 1778 a rod was put on, and there was no further trouble. At Stratsund, in Pomerania, a church was the scene of a very peculiar occurrence. On a Sunday, the building being full of people, a ball of fire entered and fell upon the altar, thereupon exploding and doing great damage.

As to the nature of phenomena of this sort, science knows almost nothing. Such glacial lightning is seen quite often, but nobody can guess how it is formed. All that can be said is that it is electricity very highly concentrated. Balls of lightning are sometimes seen rolling along the surface of the sea. Occasionally they strike vessels. As a rule they burst violently with a loud noise and disastrous effects.

A Nice Young King. The young king of Spain, Alfonso XII, who recently entered upon his ninth year, according to all who have come into contact with him, is bright, intelligent and high spirited. They tell a story of a dance at St. Sebastian, where his majesty took a great fancy to a partner of his own age, and the young lady innocently offered her cheek for a royal embrace. Alfonso, however, proudly stepped back, stretched out his hand for her to kiss, and exclaimed: "I am your king."

For Over Fifty Years. AN OLD AND WELL TRIED REMEDY.—Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays the pain, cures the colic, and is the best remedy for Diarrhoea. It is pleasant to the taste. Sold by Druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.—m. w. f. wily—1 y

THE LATE CHARLES GOULD. THE GREAT FRENCH COMPOSER WHOSE SACRED MUSIC HAS BREATHED FORTH THE PRAYERS OF A GENERATION.

With the beautiful Ave Maria in one's mind, one must almost feel a reverence for its creator, Gould sang out the prayer that was in his very soul, and all the world has felt its influence. His words of praise for a tonic that strengthened and sustained him in his declining years is one of the most valued tributes to the great "Vin Mariani." He says: "Honor to 'Vin Mariani,' that admirable wine which so often has restored my strength." No other tonic so quickly restores strength and energy when weakened by brain exhaustion, nervous depression, fatigue, dyspepsia or sleeplessness, and it hastens convalescence after confinements and fevers. You should send a stamp and receive a little album, free, containing the photos of the many great people who are recommending 'Vin Mariani.' Address: Lawrence A. Wilson & Co., Montreal.

THE SOCIETY OF ARTS of Canada (Limited), MONTREAL. CAPITAL STOCK, - - \$100,000.

A Society established with a view to disseminate the taste for arts, to encourage and help artists. Incorporated by Letters Patent of the Government of Canada, the 27th February, 1893.

Gratel—Comforting. Epps's Cocoa. BREAKFAST—SUPPER.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the properties of well-selected Cocoa, Mr. Epps has provided for breakfast and supper a delicately flavored beverage which may save many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified by pure blood and a properly nourished frame."—Civil Service Gazette.

Made simply with boiling water or milk. Sold only in packets, by Grocers, labelled thus:—

JAMES EPPS & CO., Ltd., Homeopathic Chemists, London, England.

Come and see the Bargains for yourselves.

McKay Woolen Co. Charlottetown, Nov. 6, 1894—dy

DR. CONROY Has removed his Office and Residence to P. P. Gillis' new building, corner of Great George and Dorchester Streets, opposite the Bishop's Palace. Entrance to office on Dorchester Street. oct 11—11

THE LAND OF "PRETTY SOON." I know of a land where the streets are paved with the things which I want to have. It is called "Pretty Soon." I want to have saved. The kind pleasures for which we groan. The kind words unspoken, the promise broken. An many a coveted boon. Are stored away there in that land somewhere. "The land of 'Pretty Soon.'" There are uncut jewels of possible fame lying about in the dust. And many a noble and lofty aim Covered with mould and rust. And of this piece, while it seems so near, Is farther away than the moon. Though our purpose is fair, yet we never get there. "The land of 'Pretty Soon.'" The road that leads to that mystic land is strewn with pitiful wrecks. And the slips that have saved us from the skeletons on their decks. It is farther at noon than it was at dawn, And further at night than at noon. O, let us beware of that land down there—"The land of 'Pretty Soon.'"—Ella Wheeler Wilcox.

The Dog Language. When engaged in locating a railway in New Brunswick Mr. James Camden, a civil engineer, was compelled one night by a very severe snowstorm to take refuge in a small farmhouse. The farmer owned two dogs—an old Newfoundland and the other a collie. In due time the farmer and his family went to bed, the Newfoundland stretched himself out by the chimney corner, and Mr. Camden and the man with him rolled themselves in their blankets on the floor in front of the fire.

The door of the house was closed by a woodchuck fast asleep by the bar placed across it. Mr. Camden and his men were just falling asleep when they heard the latch of the door raised. They did not get up immediately, and in a short time the latch was tried again.

They were a few moments and then Mr. Camden rose, unlocked the door and looked out. Seeing nothing he returned to his blankets, but did not replace the bar across the door. Two or three minutes later the latch was tried a third time. This time the door opened and the collie walked in.

He pushed the door quite back, walked straight to the old Newfoundland and appeared to make some kind of a whispered communication to him. Mr. Camden lay still and watched. The old dog rose and followed the collie out of the house. Both presently returned, driving before them a valuable ram belonging to the farmer that had become separated from the rest of the flock and was in danger of perishing in the storm. Now, how did the collie impart to the other dog a knowledge of the situation unless through some super sense unknown to us?—Forest and Stream.

Here's Comfort, Girls. There was a time when after a girl had passed twenty she was called passed, so that it really became a matter of no use and followed the estimation of state her age, and she was thought to exhibit some hardihood if she stated it without pressing reason. But so far has the world progressed while spinning down the grooves of chance that now a girl at thirty is not only in the estimation of her own age, but she is the advance from that period when animal charm was the greater, that it is now acknowledged that at thirty-five a woman is in her prime for all the uses and enjoyments of life to herself and to others.

Even although at forty her hair may show a thread or two of silver, they argue nothing against her charm and effect, and are not more unbecoming than the powder with which she sprinkled her hair and made herself be witching in masquerades of years ago, and they have very little to do with the decrease of beauty, anyway, for a fair skin and a rosy color are often brightened and made more attractive by what is considered prematurely gray hair than otherwise. And if there are lines about the eyes they are not noticed when the eyes kindle with intelligence and the lips curve in gentle smiles.—Harper's Bazar.

Women as They Always Were. Young ladies scorn housework and learn to embroider, to play the piano and to flirt, while their mothers are engaged in all the drudgery of the household. They eschew all useful reading, and prefer French novels to English classics. In selecting husbands they choose dandies with social graces rather than men with solid attainments. They are full of strange, whimsical notions peculiar to the age. Reader, this is a synopsis of the opinions of an English magazine writer of 1780 on the women of his time. They sound very much as if they were written by certain pessimists of the day.—Boston Transcript.

A Mistake That Stands. The conversation moved along with the ticking of the little clock on one of the bookcases before us. A pet cat that was prowling about knocked down a book from its place. The master picked it up. It was a copy of Ben Hur. The talk turned to the author.

"I asked Wallace one day," said the talker, "if he had made any geographical mistakes in either of his two last works. He told me that in one of the best descriptions he had he was mistaken as to locality. But he said that six months after the book was out he received a letter from a woman calling his attention to the mistake. She gave him all the evidence necessary to establish the truth of her statement and his investigations corroborated what she had written."

"Did he correct it in a later edition?" "I asked him that and he said he had not. It was not because he did not respect the woman, but he said if he made the correction he would receive a great many for years, and as the mistake involved no infringement on historical fact, he concluded to let it stand."—Chicago Herald.

For children's coughs and colds Hawk er's balsam of tolu and cherry is unequalled. It is the children's favorite.

What your story needs," said the critic, "is more atmosphere." "Well, that goes to show that there's no pleasing everybody," said the discontented author. The editor who read it last says it's too breezy."—Washington Star.

The best is Pond's Extract, because it is the strongest, purest and most uniform article made. Note bottles with buff wrappers.

As Well as Ever After Taking Hood's Sarsaparilla

Cured of a Serious Disease. "I was suffering from what is known as Bright's disease for five years, and for days at a time I have been unable to straighten myself up. I was bed for three weeks, during that time I had heeched applied and derived no benefit. Seeing Hood's Sarsaparilla advertised in the papers I decided to try a bottle. I found relief before I had finished taking half of the bottle. I got so much help from taking the first bottle that I decided to try another, and since taking the second bottle I feel as well as ever I did in my life."—Geo. Merrett, Toronto, Ont.
