CHARLOTTETOWN.

Influence of Superior Minds.

No person of superior mind can live in any situation without exerting a strong influence. Obscurity cannot hide, nor poverty divert it of its power. Endowed with a great soul—the most glorious possession of humanity—one has a treasure that wealth cannot equal, and a power that station cannot command.

Whose is the governing mind in the obscure neighborhood? Who in the retirement of home instills high and noble purposes, that afterwards result in a useful and honored life? Whose counsel is most eagerly sought in perplexity? Who is welcomed to the lecture-room to interest and entertain us? Whose writings are most valued and longest preserved? Whom do we select to guide the affairs of State, make our laws, and hold the scales of equity? Who speak with most effect to a nation's ear in behalf of a nation's rights? Are they not those to whom God has given great and glowing minds, that are here always pre-eminent?

Yes—the power of a strong intellect is mightier than that of kings. Wealth and station unconsciously yield obedience to it. All instinctively honor it, and are influenced by it.

Always and everywhere, whether it is used in a Christian and patriotic spirit, or perverted to selfish and iniquitous purposes, it moulds, guides and governs with irresistible effect.

All other earthly powers combined cannot withstand its influence. It is, as it was designed to be, the ruling power; and when it shall be wholly enlisted in the service of God and humanity—its only proper sphere—what peace, happiness and prosperity will be enjoyed.—S. C. Weston.

A Great Steamship.

The new and magnificent ocean steamship City of Paris, on her first trip, having made the voyage from Queenstown in the remarkable quick time of 7 days, 11 hours 39 minutes. It is believed her speed will be increased after a few more voyages have been made and her machinery becomes a little worn. As it was, the vessel made 498 miles as her fastest single day's run. The Paris is a younger sister to the City of New York, which was finished, and made her first voyage last season. Both ships are substantially similar in size construction and machinery. Length over all, 580 ft.; length on water line, 525 ft.; breadth, extreme, 63 ft.; and depth, moulded, 42 ft.; the gross registered tonnage being 10,500 tons. The vessels have very fine and graceful lines, and their beautiful appearance is in no wise impaired by the clipper bows with which they are provided. Each ship is propelled by two sets of triple expansion engines, and they are supplied with twin screws, so that in one engine or propeller should become disabled, they can proceed with the aid of the other. This provision has already been found of great value.

Robust Outdoor Exercise.

A child in winter should be allowed as much of robust outdoor sports as it inclines to seek. And this applies as well to girls as boys. Skating, coasting and even rougher sports tend to vitalize and strengthen. The child who can make half a day in the cold of winter dragging the sled up the hill for the exhilaration of a swift ride down again is sure to gain in health and strength by the operation. The exercise stimulates the body and the excitement warms the flow of blood. The result is an increase of power, which is sure to finally show itself in improved health. Then again such sports train to self reliance. The child that can dash down a steep hill sees self confidence and courage. It may seem a little bold in girls, but it is the boldness of bravery and not that of modesty. So with all sports of winter—they tend to health, strength and courage.

The Human Body.

Of all the visible and tangible wonders of the universe the human body ranks the first. It is the centre and home of all the sciences. All things by ministering to it, unanimously consent that it is "head over all." It is the throne of all laws, and comprehends every form. Only let it be added that for the exquisiteness of its lines it excels all forms, surpasses everything that exists, whether in the vegetable or animal world. Hence, one may pass for a good artist in the representation of mountains, clouds, streams, trees and cattle, and yet have very little capacity to represent the subtle and delicate lines of the human face. The body of man, and especially of female man, is the creation exceeding itself, and man exceeding himself.

"How do you account for George's not coming for the past three days?" asked a fond mamma, who had aspirations for a millionaire son-in-law. "Oh, he isn't coming any more at all." "Why, my daughter, you didn't throw such a chance overboard?" "No, mamma, no; but George's father is bankrupt." "You are a dear, good girl."—Hartford Post.

"Mother doesn't think she'll go to the theatre with us to-night, Albert." "Is that so? I've got three tickets. What shall we do with the third one?" "Give it to the man that you always go out to see between the acts. He can sit with us and you won't have to go out to see him."

"We would like to see your mother if she is not engaged." "Seven-year-old 'Engaged'! Goodness, she was engaged long ago and got married before I was born."—Life.

SHOEMAKERS.—Heavy custom sole leather by the side, 23 cents per lb. Send your orders to us for tops, thread, nails, leather, pgs and dressing. Your orders will be promptly attended to. Goods can be returned if not suitable. Low prices given to—Gulf Bros.

Local and Other Items.

To-NIGHT. Go and see the Broom Brigade.

THE STYLE.—This excellent paper for May at the Diamond Bookstore.

AT THE LYCEUM.—The ladies are requested to kindly remove their bonnets at the Lyceum to-night.

A faded or gray beard may be colored a beautiful and natural brown or black, at will, by using Buckingham's Dye for the Whiskers.

PASSING.—The bill to borrow \$3000 for the Halifax summer carnival and the bill to borrow \$5000 for the public gardens both passed the N. S. Legislature.

BEER IN MODERATE QUANTITIES.—The Buffalo Times thinks that beer is not deleterious to health if it is taken in moderate quantities—say 25 glasses a day.

THE BROOM BRIGADE.—Twenty-four of Charlottetown's prettiest young ladies form the Broom Brigade at the Lyceum to-night. We advise all our young military men to attend.

For nearly half a century Aver's Cherry Pectoral has been the most popular cough remedy in the world. The constantly increasing demand for this remedy proves it to be the very best specific for colds, coughs and all diseases of the throat and lungs.

FAVORABLE.—The statistics of Canadian Trade for the nine months ended 31st March are quite favorable. The imports were upwards of five millions in excess of the same period last year; while the exports were about the same.

For the delicate and aged and all in whom the vital current is impoverished and sluggish, Ayer's Sarsaparilla is the very best tonic. It restores the wasted tissues, and imparts to the system surprising elasticity and vigor. Price \$1. Worth \$5 a bottle.

THE COMING EVENT.—Everything points to the 70th anniversary of Oddfellowship as the feature of the season. Those who were privileged to attend a rehearsal of the operas assure us that the rendition is equal, if not superior to that given by many professionals.

COMING HOME.—Says the St. John Star: Several lately married couples who had left King's County to make their home in the United States, will this week return home. It is not all gold that glitters, and the stories told of high wages across the border are misleading. Then again the climate is not suitable, hence their return.

EXAMINATION OF CANDIDATES.—Rev. J. J. Colter, Sec. Examining Board of N. B. and P. E. I. Conference, announces:—Examination of candidates and probationers of the N. B. and P. E. Island Conference will be held in Fredericton April 30; Moncton, May 2nd; Sackville, May 4th; Charlottetown, May 2nd.

A FAST TRIP.—The steamer Umbria arrived at Queenstown, on Friday night last, after a remarkably fast passage. She passed a Browhead at midnight, making the run from Sandy Hook bar in exactly 6 days, 2 hours and 25 minutes. As the time is generally reckoned from the lightsight outside of Sandy Hook, the Umbria really made the passage in 6 days and one hour.

AT ENTERPRISING GIRL.—Says the Bangor Commercial: "It is reported on good authority that a young province girl in male attire came to the States early last fall and hired to cook for a party of 26 men, in a camp on the head waters of the Machias river. Her sex was not suspected until the first of March, and, although she had performed her task satisfactorily and conducted herself correctly, she was then discharged. That girl should receive considerable credit for her enterprise anyway."

RECEIVED INTO THE CHURCH.—Rev. C. W. Hamilton, of Margate, received 33 persons into the full membership of the church there on the 7th. He says in the Wesleyan:—"The scene was an impressive one. Perhaps never before in the history of Methodism here did so many persons, at one time, receive the right hand of fellowship into the church. Among them were children of tender years and parents advanced in life."

SOCIETY SHOCKED.—High society in Jersey City is excited just now by an elopement, not the idol of a father's heart with the coachman, but a pretty young heiress with a poor young man, who is clerking in a New York dry goods house. The heiress is an 13-year-old heiress and the daughter of Mrs. Jessie Olcott, who resides in the fashionable part of Grand Street, opposite St. Peter's Church. The bridegroom is William Baile, who is said by his friends to be under 20 years of age, and living in the somewhat less fashionable neighborhood of Wayne St. They were married on Saturday.

THE UNIVERSAL BATH.—Closely following upon the introduction of a plentiful supply of water, we have Knowlton's "universal bath." This is an India rubber bath tub, supported by two chairs and adjusted to suit men, women and children. Professor Haven, President of the Michigan University says of it: "With almost no trouble a person with one of them can enjoy all the benefits and luxury of a bath—not confined to a bathing room—whenever a person wishes to use it." Persons who have had it in their houses for five or six years testify that its durability and practicability have been fully proven. It is well worth examining—especially by those who contemplate the expense and the luxury of a bath in their houses.

ANOTHER WEATHER CRANK.—Levi Beeli, the Berkshire, Mass., weather prophet, who successfully predicted the blizzard of March, 1888, and the mild weather and little snow of the past winter, predicts

as follows: The weather from now through spring will be warm and dry in the Northern Atlantic States, with some rain along the coast and southwest Atlantic States, with storms drifting seaward, some severe storms in the Gulf States; middle states, light rains, generally light winds and light frosts from May 1st to June 10th.

BIG TIME COMING.—New York is becoming great and engaged with the forthcoming centennial celebration of the inauguration of Washington. Three days, April 29 to May 1, inclusive, will be given up to the festivities. At the cadets of the military and naval academies with the troops and militia of the state will march in line, an army 50,000 strong, which will take seven or eight hours to pass a given point. An imposing naval display is promised, and trade processions galore. A ball, banquets, and lots of oratory will be among the other features.

Now 'Tis THE GRASSHOPPER.—A Fergus Falls, Minn., despatch says:—The indications are now very strong that the grasshopper scourge of last season will be repeated in this section. A. Z. Hatch, of Battle Lake, who took an active part last year in fighting the pests, has been making investigations, and says that, while many fields are free from the eggs, others contain enough to destroy everything. Governor Merriam has requested Capt. Chase, Chairman of the County Commissioners, to come to St. Paul and see what can be done to prevent grasshoppers from spreading.

SCARLET FEVER.—The official statistics of deaths in New York City last week show that scarlet fever is raging to a fearful extent. There were seventy-one deaths last week, against an average of only seventeen for the corresponding week of the past five years. The Sanitary Bureau adds: "More deaths from scarlet fever occurred during the week ending April 6th inst. than in any week since that ending April 22, 1882, when there were seventy-eight." During last month there were 1,709 deaths from this malady, against 517 during March, 1888.

Charlottetown Markets.

The attendance at the market to-day was very small in comparison with that of Saturday last. Following we quote the prices:

Beef (small) per lb.\$0.08 to 0.14
Beef (quarter) per lb.0.08 to 0.17

ACADIA NET COAL.—Arrived and landing on Monday, 15th inst., a cargo of fresh-mined Acadia Nat Coal.—R. McMillan. tf—ap 13

DEATHS.

Suddenly, at Long Creek, on the 12th inst. Catherine McLeod, relict of the late Duncan McKinnon, formerly of Uist, aged 71 years. She was a woman of amiable and stinging qualities. In her early youth she became a follower of Christ, under the teachings of the late Rev. Donald McDonald, and with firm faith in her Redeemer she passed peacefully away.

(Private photo copy.)
