SUMMER SCHOOL OF SCIENCE.

MONCTON, July 19.

Amongst the subjects that are eagerly studied by the students of the Summer School is music. Miss Ada F. Ryan, of Halifax, the instructor in that subject has an inter-Provincial reputation, and under her skillful instruction marked progress is being made.

The most interesting of the public lectures in connection with the school was that given by Dr. Bailey, of Fredericton, on Saturday evening. His subject was "Niagara," in which he treated of the geological causes producing the Falls, the present condition of them, the uses to which the water of Niagara River is being put, and the possibilities of the future of the Falls.

The Round Table Talk on Monday evening was on "Canadian Literature," opened by Miss Read, of Truro Normal School, who remarked upon the writings of Bourinot, Lampman, Carman, Roberts, Hopkins, Morgan, Gilbert, Parker, Dr. Drummond and many others. The discussion of the subject was continued by members of the School, and all felt that we had a literature of which we need not be ashamed, and that more might and ought to be done in our schools to inculcate a love for our Canadian writers.

On Monday, under the guidance of Dr. Grant, chairman of the Moncton Board of School Trustees, the members of the Summer School were shown through the new Aberdeen School building. This is the finest public school building in the Maritime Provinces, built of stone and brick and costing when finished and furnished $40,000. There are in the building seventeen class rooms, large and airy, two teachers room, lavatories and a large chemical laboratory and physical apparatus room, and a magnificent assembly hall. This building is heated with hot air, and has the improved ventilating system by which a current of air is always passing through the rooms, of this building the citizens are jointly very proud.

From the Aberdeen School building the company proceeded to the cotton factory where they were explained the whole process of the cotton manufacture from the cleaning of cotton, through the carding, spinning, weaving processes to the testing, measuring and baling the goods ready for the market. In this factory there are 260 hands employed and the output is about 103,000 yds per week.

At the annual meeting of the Board of Management the following officers were elected for 1898 99:

President—G U Hay, M A, Ph B, F R C P, St John, N B.

Vice Presidents—V R Campbell, M A, Truro, N S; R H Campbell, Summerside, P E I, W A Hickman, Pictou N S.

Secretery Treasurer—J D Seaman, Charlottetown, P E I.

Executive Board of Management—President and Secretary-Treasurer, L P Baily, L S D, Fredericton, N B; J G Oulton, M A, Moncton, N B; A Cameron, Yarmouth, N S; J Brittain, Fredericton, N B; W W Andrews, M A, Sackville, N B.

The next session of the School will be held at Campbellton, N. B., beginning about the last of July or the first of August. V. D. S.

RESIGN MR. WARBURTON.

SIR,—There is much force in your editorial remarks in yesterday's EXAMINER regarding the King's County Judgeship and the neglect of Mr. Warburton to be sworn in and assume the duties of his office What position does Mr. Warburton occupy any how? He is a duly appointed judge of the land and as such is in receipt of money from the Dominion Treasury. His salary has been running on since the day the Governor General approved of the minute of council recommending his appointment, and rumor has it that on the first day of July he received the first installment of his salary. Nevertheless he is occupying the most extraordinary position of being at the same time the Leader of a Government and Premier of a Province. Comment is needless. At the same time unless Mr. Warburton quits acting the "stool pigeon," he cannot complain if severe comments are made on his position. Is he not dragging the ermine into the political mire?

The New York Herald publishes a graphic story of the manner in which its correspondents at the front have kept that paper supplied with news during the present war. Accompanying the sketch are likenesses of its representatives, among whom is Mr. E. W. McCready, a son of Mr. J. E. B. McCready, of the Guardian. Mr. McCready had a share in the greatest scoop of the age. He and his companion were able to give the Herald the first information of the destruction of Cervera's fleet, which they saw from the Herald's despatch boat. Of that coup the Herald has the following: When Cervera's fleet was destroyed in its attempt to get out of Santiago the Herald's despatch boat Golden Rod was the only newspaper boat in sight of that most thrilling spectacle of a century, Brown and McCready were on board, and the story they sent of what they saw of glory and horror was one of the best word pictures sent to a newspaper. Graphic and complete it was, and is the journalistic triumph of the war, and to add to it, a day or two later, the same men sent to the Herald an expert story of the engagement told by an officer who had seen it from his magnificent ship the Iowa."
