As will be seen by our advertising columns, the management of the Fishwick Express Line Steamers are seeking to accommodate the public by continuing their boats on the P. E. Island route at a later season than usual. We believe that the required number of subsidized trips for the season have been made with satisfaction to the public in general, and now that its business is continued without Government patronage, we hope that the Company may be fully compensated by receiving a large amount of freight and passengers.

A CORRESPONDENT writes: I notice the Patriot editor scolds the EXAMINER in a style as coarse and ungenerous as it is weak and contemptible. Such language as "blundering Peckaniff," "impious and dishonest," "ambitious, conceited dunces," "blockheads," etc., is sufficient to account for the opinion, more than once expressed by journalists abroad, as to the coarseness and personally abusive character of some of the members of our Island Press." It may reassure our correspondent to know that we regard the abuse of the Patriot no more than we do the idle wind. It does not hurt THE EXAMINER.

By the request of the Trustees of the Tryon Methodist church, the Rev. Mr. Phinney of the Tryon circuit being in town yesterday, waited upon Mrs. W. W. Lord, wife of the Hon. W. W. Lord, and presented her with the silver trowel, which was to have been presented to her at the time of her laying the foundation stone of their new church, but could not be procured for the occasion, as they had to send away from the Island for it. Through the kindness of Rev. Mr. McLellan of St. James' Church, Ch'town, his silver trowel was lent for the service, and now the trustees have much pleasure in presenting her with the one intended for the time, as a small token of the esteem in which they hold the venerable lady. The following inscription is upon the trowel:

MORE LIGHT!

THE Charlottetown Gas Light Company have imported some of "BRAY'S BURNERS," which they will supply and fit on Gas Brackets, etc., at a moderate cost to consumers.

These Burners are reported to be the best Flat Flame Burner yet produced, and will give a far greater amount of light than any other Burner with the same consumption of Gas.

Dr. Wallace, F. R. S. E., F. C. S., Gas Examiner to the City of Glasgow, in a lecture delivered by him, calculated that 2150,000 (\$650,000) a year are thrown away in Glasgow by the use of imperfect fittings. On the subject of Gas Burners he says: "Another and as I think a better Burner is that called Bray's regulator, and as I consider these the best unien Burners attainable at moderate cost, I have selected them for a series of experiments."

The Report of the Committee of the British Association of Science to enquire as to the best means for the development of light from Coal Gas of different qualities—comprising Dr. William Wallace, Professor Dittmar, and Mr. Thomas Willis, F. C. S., F. I. C. E., showed that Bray's Burner yielded the greatest amount of light of all the two or three score of Burners reported upon, which included all the Burners of repute in the market.

In a pamphlet upon Light and Heat, published by R. B. Taler, A. M., he says: "The cost of Gas as compared with other illuminants is much more economical when rightly used, than many suppose. From experiments made for this purpose, the following results have been obtained. They were made by burning samples of Devos's Brilliant Oil and ordinary Oils, and testing their illuminating power. It was found that Coal Gas costing one cent at \$3 per thousand feet, gave a light equal to 18 candles, while Devos's Brilliant Oil consuming 27.4 grammes costing half a cent, gave a light equal to 9 candles.

A good Argand or Johnson's Burner, the Burner used in the last experiment, will therefore give the light of 2 ordinary Oil Burners in direct comparison, at no greater expense in the case of the finer and safer grades of Oil. Lights, however, on the authority of Scientists, are not to be compared in direct proportion, but in proportion to the squares of their powers, and such a comparison with the case of the use of Gas, its cleanliness, freedom from odor and dangers, renders its use desirable wherever it can be introduced."

As the above experiments were made with Gas at \$3 per 1000 feet, and not consumed through Bray's Burners, it will readily be seen how much more economical it is to consume Gas instead of Oil, when its price is only \$2.63 per 1000 feet as now charged here when consumed, more especially through Bray's Burners.

Messrs. Goodwin & Co., of Philadelphia, the well-known manufacturers of Scientific Instruments for testing the illuminating power of Coal Gas, etc., say in their Circular to Gas Companies: "In presenting the Bray's Standard Patent Silt Union Burners and Lanterns, for which we are the sole Agents in the United States, to the attention of the public, we are convinced that we are filling a want long felt." They further add: "The yield of light from these Burners is 12 to 20 per cent. greater per cubic foot of Gas consumed than that from any flat flame Burner hitherto introduced. [no 4 eod ft]
