Cattery & Jewellery.
Fancy articles of beauty and durability.

JUST PUBLISHED,

**PRINCE EDWARD ISLAND
CALENDAR**

1856:

The Almanack of this year is embellished with a
number of neat and appropriate WOOD ENGRAVINGS,
and besides the usual information, contains
a request of several friends, the day's length for
every day in the year.

"A Professor of universal knowledge" had
put up his sign near the palace of an Oriental
Prince, who suddenly came in upon the pretender,
and put his wisdom to the test.

"So thou knowest all things," said the King;
"then tell me to-morrow morning these three
things only, or thou shalt lose thy head. First,
how many baskets of earth there are in yonder
mountain? Secondly, how much is the king worth
at the time?"

The professor was distressed beyond measure,
and in his apartments rolled upon the carpet in
agony, for he knew that he must die on the morrow.
His several learned friends, who were ordered
to appear before the King and take his chance
of answering the questions. The next morning the
servant, clad in his master's robes, presented
himself to his majesty, who was deceived by his
appearance, and the King proceeded:

"Tell me, now, how many baskets of earth are
in yonder mountain?"
"That depends upon circumstances. If the
baskets are as large as the mountain, one will hold
it; if half as large, two; if a quarter, four; and so
on."

"The King had to be satisfied, and proceeded:
"Now, tell me how much the King is worth?"
"Willy your Majesty, the King of Heaven and
Earth was sold for thirty pieces of silver, and I
conclude you are worth one piece."

This was so witty an escape, that the King
laughed, and great was the rejoicing.
"Now, once more, tell me what I am thinking
of?"

"You are now thinking that you are talking
with the Professor, whereas it is only his servant."
"Well done," said the King, you shall have
your reward, and your master shall not lose his
head.

"Mistaken, where's your house?" asked a
curious traveller of a half-breed, half-civilian
squatter.

"House, eh? D'ye think I'm one of them sort,
stranger? I live in the prairie—I eats raw
buffalo, and drinks out of the Mississippi."

The Great American Hair Tonic.

Bogle's celebrated Hyperion Fluid, for the growth
and preservation of the Hair is well known to be with-
out a rival on this continent. Hundreds of imitations
have started into an ephemeral existence, since the
introduction of this unrivalled Hair restorative, and
they do not bear the name, whilst Bogle's Hyperion
Fluid, with a popularity never attained by any
other article, goes on "conquering and to conquer."
There is no remedy, which will so soon cure the Hair, but
it can be cured by this incomparable preparation. To
Indies it is invaluable; and on children's heads it lays
the foundation of a good hair. It is now pre-
pared by His Majesty the Queen of Great Britain
and commands an extensive sale throughout Europe.
Bogle's Electric Hair Dye converts red or grey
hair into a beautiful black or brown, the moment it
is applied, literally dying the hair without staining
the scalp and leaving the Hair soft and glossy without
injuring its texture in the least; a decided superiority
over all other Hair dyes.

For Archaic, Rheumatic, and compound rashes that
usually unpleasant operation (shaving) a decided
luxury.

Hebentons remove Freckles and tan from the
face in the shortest possible time, and is acknowl-
edged to be the very best article for beautifying the
complexion.

To be had, wholesale or retail, of W. Bogle, 227
Washington street, Boston, U. S.

And by all Druggists and perfumers throughout the
Canada, United States and Great Britain. W. R.
WATSON, Agent for P. E. I.

GILMAN'S HAIR DYE.

The best and safest ever used, as hundreds can testify
in this city and surrounding country. Read! GIL-
MAN'S LIQUID HAIR DYE is instantaneous
change in color to a rich black or glossy
Brown, which is permanent—does not stain or
in any way injure the skin. No article ever yet inven-
ted which will compare with Gilman's, and which
only who have勇气 to buy it, for it never fails.

—Boston
Dr. G. W. MAN, Chemist, Washington City, In-
ventor and Sole Proprietor.
For sale by Druggists, Hair Dressers, and Dealers
in all parts of the United States.
W. R. WATSON, Agent for P. E. I.

GENERAL INTELLIGENCE

THE SOUND DUES.—A private letter
from ALONA mentions, that the Danish
Government has now lost all hope of bring-
ing anything like a conference together on
the subject of the Sound dues. The Gov-
ernment is described in this letter as in
the greatest embarrassment and disunion as
to the course to be pursued towards the
flag of the United States, on its first at-
tempting to pass Kronborg, duty free, after
the expiration of the present treaty. It is
naturally enough feared, that the attempt,
if successful, will be initiated by other
nations, and the example become widely
contagious. It is affirmed, that the Danish
authorities have at last deliberated upon
the plan of letting the Americans through
unmolested, but of keeping an account
against them for presentation, when the
subject of the Sound dues shall have been
adjusted. The Cross journal announces
that the United States' government has
been disposed to pay a sum of 40,000 dollars,
and no more, in lieu of all demands for
Sound dues, and further a given sum
equivalent for maintaining light-houses,
buoys, land-marks, &c.

PITCAIRN'S Island.—An interesting com-
munication has been received from this
place. The inhabitants were all well on
the 14th of September, 1855, the date of
the chaplain's letter to the Rev. T. B.
Murray. They had heard of the death of
the Czar Nicholas; but, as no newspaper
was on board the vessel which conveyed
the intelligence, they were still in the
dark. Though they had suffered some
anxiety from a poor year harvest, they had
a good stock of sweet potatoes to turn to,
and the "pinch of the year" was past.
They were awaiting the measures of Gov-
ernment for their transfer to Norfolk Is-
land, some having relinquished house-build-
ing in expectation of this important change.

It appears, by accounts from Sydney, that
Sir W. Denison, Governor of New South
Wales, had, in September last, under in-
structions from home, despatched a vessel
to Pitcairn's Island, with a view of making
arrangements. It was intended that, on her
return to Sidney, a transport should be fit-
ted out, for the purpose of conveying the
inhabitants to their new and beautiful abode.
All care would be taken in the manner of
accomplishing the object which they them-
selves have sought to attain, and every re-
spect paid to their admirable principles and
exemplary ways. Mr. Nobbs stated, that the
church and school were well attended. His
eldest son, Keuben, had died of an attack
on the lungs, the youth having returned
from Valparaiso, where he had held a mer-
cantile situation, to die among his family
and be buried in the island. Much
unanimity prevailed among the people.

NEW BURNESWICK, FEBRUARY 6th.—The
Hon. C. Fisher, Attorney-General, has
returned from his mission to England, and
we are happy to say, if the reports in cir-
culation are to be credited, that he has
been completely successful, having arranged
with the delinquent firm of Messrs,
Peto, Brassy Betts, and also obtained
assurances of sufficient supply of money,
on Provincial security, to carry into effect
the railway policy of the Government.
This is extremely gratifying intelligence;

but it will be time enough to rely upon it
when we hear something more definite
from the gentleman himself. The Exe-
cutive Council is now in session at Fre-
dericton, and we therefore presume the
facts will soon be known.

A PRECEDENT FOR RUSSIA.—A letter
from Vienna, dated Jan. 2d, published in
the Constitutionnel, says:

"As much as has been said about the
dignity of the crown of the Czar, I will
mention a case in which the two first na-
val powers in the world did not think it
a derogation from their national dignity
to reciprocally adopt, under similar cir-
cumstances, the arrangement which the
allies of the 2d of December have just
presented to Russia for the solution of
the 3d guarantee."

The writer then alludes to the arrange-
ments come to between Great Britain and
America on the subject of the navigation
of the river St. Lawrence and the upper
lakes, and by which those two powers
were reciprocally interdicted from having
vessels of war on any of the lakes, the
waters of which washed the territory of
the two States; and then proceeds:

If Great Britain, notwithstanding her
ancient pretension to the empire of the
sea, has, in her arrangement with the
United States, resorted to the system of neu-
trality, in virtue of which her vessels of
war cannot penetrate into the great lakes
of North America, and renounced by the
stroke of a pen the power of bringing
vessels into the ocean, which she might be
able to build at a much cheaper rate in
Canada, it must be admitted, that she now
demands from Russia nothing more than
what she herself submitted to a quarter
of a century ago. This is what Count
Valentine Esterhazy is particularly charg-
ed to impress on the Russian Cabinet, in
explaining the unalterable interpretation
which the Western Powers have decided
on attaching to the system of neutrality
of the Black Sea."

According to the Albany Evening Jour-
nal "the number of men killed in the
wars over (?) 300,000." Seventy-three
battles have been fought, and no such
bloody record has been presented in any
year since the days of Waterloo."

A new planet, of great brilliancy, has
just been discovered by M. Chacornac, of
the Paris Observatory.

We learn from trustworthy sources
that the Prohibitory Law is in the most
beneficial operation in St. Stephen. It
is a fact, that the appearance of the vil-
lage is totally changed, and few and very
futile must be the attempts to evade the
law.—It is a fact, that no more rejoice
in the operation of the law than some of
the very persons who were addicted to
drinking. We believe it is otherwise in St.
Andrew's.—St. John Courier.

GEOGRAPHICAL POSITION.—The Nursery
of Europe is Llandud.
