Canadian Troops

one of the world's finest detection units by American radiation experts, swept into the area with the sure confidence of skilled technicians.

And with a speed that amazed U.S. Army observers, they began the complicated task of compiling a radiation density map.

In wartime such maps are needed by commanders in the field to determine strategy and to avoid the risk of ordering troops into dangerously radioactive sectors.

EXAMINE DAMAGE

Today the Cnadians, along with some 3,000 American soldiers and civil defence workers, will examine in detail damage caused by the blast to test structures erected on the proving grounds for experimental purposes.

The explosion of the atomic weapon, believed to have had the equivalent force of between 35,000 and 40,000 tons of tnt, ended a dreary nine-day series of postponements during which the Canadians three times waited tensely throughout the night for the scheduled shot only to have it cancelled in the last hour.

The Canadians, crouching head down in their trench positions, saw an eye-piercing flash of light that lit up the surrounding cactus-covered desert with a dazzling brilliance far brighter than the mid-day sun despite the protection of high-density goggles.

Then came the awesome spectacle of the building fireball. Long fingers of red and orange-colored flame licked out from the terrifying mass, twisting and churning.

As the fireball grew, sucking up great clouds of dust, the coloring took on a brownish tinge, then a delicate rose. Surrounding the fireball, whose beauty drew gasps of wonder from the wide-eyed Canadians and other observers, was a weird purple halo shaded from pale mauve to indigo.

TRENCHES SHUDDER

About 30 seconds later the trenches began to quiver, then shook and shuddered as the shock wave from the blast roared past with an ear-splitting crack that reverberated from the surrounding hills and rolled into the distance to be heard in Los Angeles, 175 miles to the west.

Typical of the Canadian reaction was breathless, graphic description of Chief Petty Officer R. F. Currie of Halifax:

"I thought the world was coming to an end and pinched myself to make sure I was awake."

In the final fitting climax to the indoctrination of Canadians in nuclear warfare, the huge mushroom cloud, rapidly losing its radioactivity at the height of 43,000 feet, moved northward toward Canada.

The 14th and final shot of the 1955 series, also from a 500-foot tower on Yucca Flat, was scheduled tentatively for Saturday, depending on how soon instruments can be made ready after Thursday's big "duster."

Dental Health Director Supports Fluoridation In Address To S'side Club

.."Statistics reveal an average of 10 decayed teeth per school child in P.E.I., Dr. J. B. O'Meara, director of dental health, told the Summerside Y's Men's Club last evening, adding that only an average of 3 of these 10 defective teeth receive dental treatment.

Speaking in support of fluoridation of municipal water supplies in P.E.I., Dr. O'Meara said that by adding sodium fluoride to the drinking water in Brantford, Ontario, tooth decay of school children in that city has been reduced by almost 70 percent.

The cost of providing this means of preventative dentistry would only be about 10 cents per person per year, and he pointed out that a lifetime cost of fluoridation would only be about the price of having two teeth filled.

Dr. O'Meara, himself a graduate in dentistry as well as in public health, said that tooth decay will always be out of hand "if we rely solely on dentistry service as there are not sufficient dentists to cope with the problem." Preventative dentistry was not mass medication, he pointed out, and refuted another charge made by anti-fluoridationists by saying that the recommended use of sodium fluoride — 1 part per million — added to the drinking water, has no effect whatsoever on any other part of the body except the teeth, and he said, "there is not one atom of truth in the suggestion of a recent letter in an Island newspaper to the effect that it would cause cancer."

Dr. O'Meara described the success in the reductions in dental cavities among school children, which has been proven by municipalities who have added sodium fluoride to their water supply.

TELLS OF DISCOVERY

The discovery that this chemical was effective in preventing tooth decay was made, he said, when it was found that there was a marked reduction in dental decay in areas where the chemical was a natural part of the water supply. This same investigation revealed that mottling or straining of the teeth appeared in areas where sodium fluoride in an unusual high content was present, but that these same teeth had much

(Continued on page 15)

WE OFFER THE FOLLOWING
USED
TRACTORS AND EQUIPMENT

1 — 1953 Ford Tractor (New Condition)
1 — 1950 Farmall C. With Hydraulic Plow
1 — 1950 Massey-Harris, 30. (Completely Reconditioned)
1 — Ford, 6 Foot Tandem Disc Harrow.
1 — Ford, Hydraulic Plow.
1 — Ford Spring-Tine Cultivator, Lift Type.

New Ford and Fordson Major Tractors Gas and Diesel Models in Stock.

GUARANTEED
4 FULL YEARS

THE NEW ONLY AT CANADIAN TIRE

HI-CAPACITY
MOR-POWER ARMOR-GLASS

MORE POWER THAN EVER BEFORE—Yes, up to 50% more amperage output than original equipment. You can readily see that this surplus power means faster motor turnover for quicker starts. The new "HI-CAPACITY" is "factory fresh" to eliminate stale battery power loss, aging and premature failure which can occur when a supplier has a small turnover.

GET BONUS POWER AND LONGER LIFE—In addition to 50% more power, the new "HI-CAPACITY" MOR-POWER ARMOR-GLASS is built to outlast 4 ordinary batteries. Yet this amazing new battery costs you less than you would ordinarily expect to pay for the standard original equipment quality replacement elsewhere. SAVE SAFELY—AT CANADIAN TIRE.

Big Allowance For Your Old Battery

18-Month Guarantee
MOR-POWER
Heavy Duty
30 PLATES
REG. LIST $16.95
7.95 and Your Old Batt.
Equal or better than original equipment—96 amp. capacity. Dependable power-packed performance for all normal driving and lighting needs. Fits most popular cars.
Fits Ford products—1954-54; 30 plates, 105 amp. capacity. Reg. list $20.50. SAVE $10.55. (With your old battery) 9.95
Ford 1950 and earlier ... 11.30

2-Year Guarantee
MOR-POWER
Super Service
45 PLATES
REG. LIST $23.95
11.45 and Your Old Batt.
120-amp. capacity—Extra power for all electrical equipment. More plates per cell to give instant action starting with ample power reserve. Fits most popular cars.
Fits Ford products—1951-54; 51 plates; 120-amp. capacity. Reg. list $23.95. SAVE $11.36. (With your old battery) 11.95
Ford 1950 and earlier ... 13.45

REMEMBER!
MORE CAR AND TRUCK OWNERS INSTALL
Mor-Power
THAN ANY OTHER BATTERY

4-Year Guarantee
MOR-POWER
Hi-Capacity Armor-Glass
51 PLATES
REG. LIST $30.25
15.45 and Your Old Batt.
For extra high capacity requirements—Up to 50% more power capacity for faster motor turnover and longer full load output in zero weather. 150-amp. capacity. Fits most popular cars.

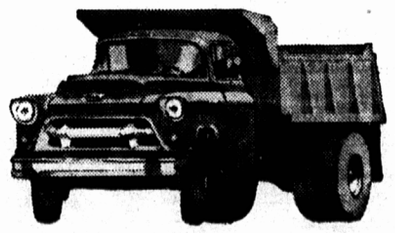
NEW CHEVROLET *Task-Force* TRUCKS

with a whole truckload of new advantages for you!

Here's what happens when Canada's No. 1 truck builder pulls out all the stops! Here are some of the new advances ready to work for you right now.

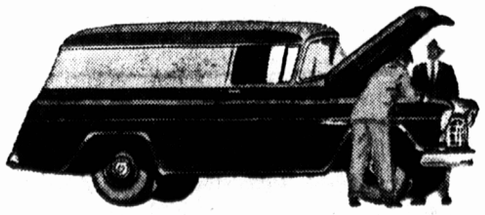
These new Chevrolet Task-Force Trucks do more jobs. Do 'em faster. Do 'em better. And do 'em with new economy. If you've got a job for a truck, we've got the modern truck for your job! Look over the new features and advances highlighted here — no other line of truck offers so much that's new. Then come in and look over these Task-Force Trucks in person.

CHEVROLET
A General Motors Value



A new kind of truck styling
It's Work-Styling—an exclusive development in truck design with two distinctively different styling treatments. On the job, your truck "looks the part"—becomes a profitable advertisement on wheels for you and your business.

New 19,500 lb. G.V.W. capacity
New Chevrolet Task-Force Trucks are designed and built to handle loads of all kinds and sizes. Capacities now go all the way up to 19,500 pounds Gross Vehicle Weight—the highest ever for Chevrolet!

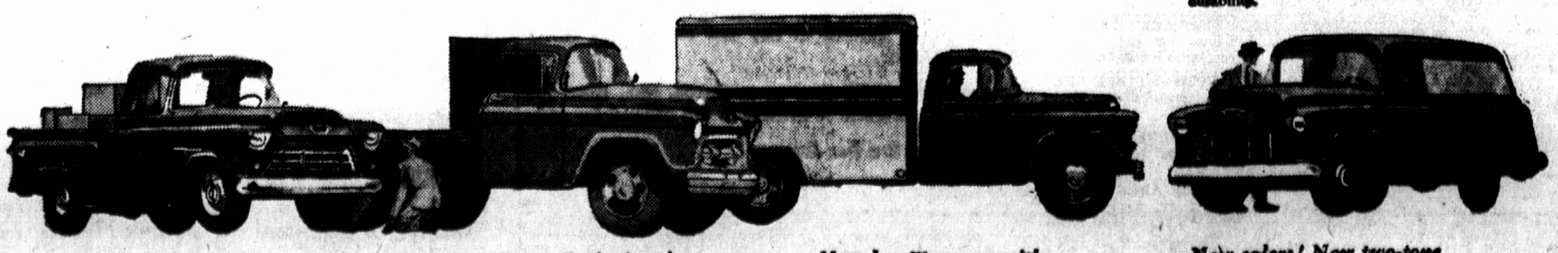


New "high-voltage" engines
All new engines feature a new 12-volt electrical system for faster, surer starts and increased generator capacity—plus many more exclusive advances. They're the last word in smooth, quiet and thrifty truck power!

The cab is as new as the view
New Sweep-Sight windshield — plus more glass all around — for a wider, safer view. New High-Level ventilation for cleaner, fresher air. New broader and softer seats — new stronger cab construction — new comforts and conveniences throughout!

A smoother, load-steady ride
New springs front and rear provide a smoother, more stable ride for the driver and load alike. Chevrolet's new and exclusive concealed Safety Steps guard against accumulations of mud, snow, or ice on the running boards.

New stronger standard-width frames
These trucks are new from the drawing boards out! All models now have new ladder-type frames of standard width, with full-length parallel side members. This new design provides greater strength, rigidity and durability.



New Overdrive or Automatic
Now Chevrolet offers you new Overdrive as well as improved Synchro-Mesh and Automatic transmissions. Overdrive is now available as an extra-cost option on sedan deliveries and Automatic on ½-, ¾-, and 1-ton jobs.

New Power Brakes and Tubeless Tires*
Now you can get the extra ease and safety of Chevrolet Power Brakes available on the Heavy-Duty models! And you get new tubeless tires as standard equipment on all ½-ton models! **Optional at extra cost*

New handling ease with Power Steering
Driving's easier, safer and less tiring with Chevrolet Power Steering — and now it's available on Heavy Duty Chevrolet Task-Force Trucks. It's optional at extra cost.

New colors! New two-tone combinations
Take your choice of a longer-than-ever list of attractive new colors and combinations. They help you take full advantage of the advertising value of your Chevrolet Task-Force Truck.
