QUEEN VICTORIA: HER LIFE AND REIGN: great historic work, sells on sight to thousands. Lord Dufferin introduces it to Canadians in glowing words. Easy to make \$20.00 a week, some make twice that. Many make more in spare time than during day at regular employment. This year's Great Sexagenary Celebrations are booming it. Books on time. Prospectus free to canvassers. Territory going fast. THE BRADLEY GIBBERTSON Co Ltd Toronto, Can

Pain-Killer.
(PERRY DAVIS')
A Sure and Safe Remedy in every case and every kind of Bowel Complaint is

Pain-Killer.
This is a true statement and it can't be made too strong or too emphatic.

It is a simple, safe and quick cure for Cramps, Cough, Rheumatism, Colic, Colds, Neuralgia, Diarrhea, Cramp, Toothache.

TWO SIZES, 25c. and 50c.

WISE OBSERVATIONS.

Concerning Calf Feeding—Cream Ripening and Butter Salting.

Calves fed three times daily for the first month are less exposed to the dreaded trouble scours.

New method oil cake is not so suitable for replacing the fat of milk for calf feeding. Flaxseed is better.

Butter fat is worth more sold as butter than sold as veal.

The cow with her first calf that is milked but six to eight months has been spoiled.

Some say that cows are simply machines. Possibly so, but they should not be housed during the winter in nature's shed nevertheless.

If 150 pounds of butter annually is the dividing line between profit and loss, the cow that makes 200 pounds annually is worth twice as much as the one that makes 175 pounds, while the cow that makes up 155 pounds is worth but one-fifth of the latter and one-tenth of the former, provided they all cost the same to feed.

Many farmers own unprofitable cows and do not know it. Quantity of milk is an unsafe guide, since quality and length of milking period are potent matters.

Color of milk is not a safe guide whereby to judge of its content of fat. Yellow milk is not necessarily rich milk, neither is white milk necessarily poor milk.

If one cow returns \$15 profit, two cows do not necessarily give \$30. Many people build up herds; however, as if the opposite were the case.

It is important that cows in milk should have all the salt they want whenever they want it.

One sided rations do not produce as much butter as properly balanced rations, neither do they produce butter of as fine quality.

Trouble frequently arises in churning due to improper feeding. Other things being equal, a varied diet results in more and better butter than a narrow ration and is less likely to cause difficulties when churning the cream. We have tested buttermilk with as much as 6 per cent of fat in it when we knew that one cause was coarse pasture with many objectionable weed growths in it.

The summer feeding, a mixture of the cereals and the legumes, gives more satisfactory results than either separately, besides giving more produce per acre.

Corn fodder in the stook loses much of its value when exposed to autumn rains.

Some farmers get an improper idea of the feeding value of corn fodder because they commence to feed it too early.

While autumn rye, rape, turnips and turnip tops may not be the most desirable foods for milk cows, they may often be sown advantageously to feed the other stock, thus reserving the better foods for the milk producing part of the herd.

Ripening cream and churning it at high temperatures results always in two evils. First, the churning is not thoroughly done, and some of the butter—often much of it—remains in the buttermilk. It is not economical to feed 20 cents a pound butter fat to 5 cents a pound veal. Secondly, the butter which one does get is not of as fine a quality. The texture, flavor and keeping quality are all injured very materially by the practice. Moral—Avoid high temperatures in butter making.

Salting butter in the churn has much to recommend it, especially in warm weather. When the churning is finished and the buttermilk washed from the butter, the latter is drained for a time, then half the salt is sifted on to the granular butter in the churn, the churn tilted to turn the butter over, and the other half is put on. Then turn the churn partly over, back and forth, to sift the fine salt through the particles of butter. The cover is then put on and the churn given ten or a dozen complete turns, the butter allowed to stand a couple of hours and then worked. Two-thirds of the usual working will be found sufficient. Try it.—Montreal Herald.

PYNY-PECTORAL
Positively Cures
COUGHS and COLDS
is a surprisingly short time. It's a scientific certainty, tried and true, soothing and healing in its effects.

W. C. McCOMBER & SON,
Bouchette, Que.,
reports in a letter that Pyny-Pectoral cured Mrs. C. G. Gosselin of chronic cold in chest and bronchial tubes, and also cured W. G. McComber of a long-standing cold.

Mr. J. H. HURTY, Chemist,
508 Yonge St., Toronto, writes:
"As a general cough and lung syrup Pyny-Pectoral is a most valuable preparation. It has given the utmost satisfaction to all who have tried it, many having spoken to me of the benefits derived from its use in their families. It is suitable for old or young, being pleasant to the taste. Its sale with me has been wonderful, and I can always recommend it as a safe and reliable cough medicine."

MUNYON'S SUCCESS

Is Only What Ought to Be Experienced From HIS METHODS

Upright in Everything—Always Keeping Faith With the People, and, Above All, Curing Them of Their Ills—Why Wouldn't Success Follow?

Mr. E. Horner, 610 City Hall Avenue, Montreal, Canada, says: "I suffered with rheumatism in my right hand for eight months. It was so badly swollen that it was impossible for me to sign my name, and the pain was intense. Nothing I used gave me relief. Munyon's Rheumatism Cure cured me completely in two weeks."

Munyon's Rheumatism Cure seldom fails to relieve in one to three hours, and cures in a few days. Price 25c.

Munyon's Dyspepsia Cure positively cures all forms of indigestion and stomach trouble. Price 25c.

Munyon's Cold Cure prevents pneumonia and breaks up a cold in a few hours. Price 25c.

Munyon's Cough Cure stops coughs, night sweats, a laryngitis, and speedily heals the lungs. Price 25c.

Munyon's Kidney Cure speedily cures pain in the back, loins or groins and all forms of kidney disease. Price 25c.

Munyon's Headache Cure stops headache in three minutes. Price 25c.

Munyon's Pile Ointment positively cures all forms of piles. Price 25c.

Munyon's Blood Cure eradicates all impurities of the blood. Price 25c.

Munyon's Female Remedies are a boon to all women.

Munyon's Asthma Remedies relieve in 3 minutes and cure permanently. Price \$1.

Munyon's Catarrh Remedies never fail. The Catarrh Cure—price 25c.—eradicates the disease from the system, and the Catarrh Tablets—price 25c.—cleanse and heal the parts.

Munyon's Nerve Cure is a wonderful nerve tonic. Price 25c.

Munyon's Vitalizer restores lost vigor. Price \$1.

A separate cure for each disease. At all druggists, mostly 25c a vial.

Personal letters to Prof. Munyon, 11 and 13 Albert Street, Toronto, answered, with free medical advice for any disease.

CHEESEMAKING.

Useful Information Concerning Curds, Cleanliness and Curing Rooms.

At a meeting of the Western Ontario Dairymen's association many facts were brought out that show how our Canadian rivals make their cheese. From speeches and papers reported in Hoard's Dairyman we clip various notes.

Here is a description of the Black Hawk model cheese factory:

It is built and equipped for both butter and cheese making. The creamery is a room 35 by 40, at the south end of the building, and immediately adjoining the creamery on the north comes the vatroom, which is 35 by 52; then comes the pressroom to the north of the vatroom, this being 35 by 30. The milk is taken in at the two windows on the west side of the building and opposite the vatroom. The boiler room is on the east side of the building, and so situated that one door opens out of the vatroom and another out of the creamery into it. The ceilings are 12 feet high, the walls are of hollow brick and finished outside with red mortar. There is a wainscoting of cement 4 feet high, and above the cement white plaster. High ceilings, large windows and white walls make an airy and well lighted building. Both the cold and hot water tanks are elevated above the ceiling of the boiler room, the cold water tank being high enough to empty into the other, and pipes connect with both of them from all parts of the building. The whey runs from the vats to a large tank in the ground, from which it is forced 100 yards through pump logs to the hogpens by an ejector. The washings and waste water go to a small tank and are forced by the same ejector past the hogpens to a large open trench with gravel bottom, through which it filters to a neighboring stream. The factory is thus rendered free of offensive smells. The curing room contains ice racks suspended 4 feet from the ceiling for use in hot weather. A pipe runs from the cold water tank to the receiving station, and water is turned into every can after it has been emptied. This is greatly appreciated by the patrons.

Mr. Barr said of cheesemaking (1) that curds which were 3 to 3 1/2 hours from setting to dipping made better cheese than those that occupied a shorter space; (2) that curds dipped with less than one-quarter inch of acid made nicer, more silky cheese than those dipped with more than one-quarter inch.

Here are some of his "don'ts."

To factory men:
Don't cut your cheesemakers' wages any lower.

Don't buy a gang press with a tin trough under the hoops. Have it wooden.

Don't buy a cheese truck with four wheels. Get one with three.

Don't expect a man to make a good fall cheese in a skating rink without a stove.

To cheesemakers:
Don't tender for a factor so low that you cannot live just for the fun of making cheese.

Don't take in bad milk.

Don't overripen your milk to hasten the work. You will retard it and make poor cheese.

Don't give your curd more than one-quarter inch acid.

Don't wash your curd sinks once a week. Wash them every day.

Don't wear the same pair of pants from April to November without washing them. Keep yourself and factory neat and clean.

The D. & L. Emulsion

Is invaluable. If you are run down, as it is a food as well as a medicine.

The D. & L. Emulsion Will build you up if your general health is impaired.

The D. & L. Emulsion Is the best and most palatable preparation of Cod Liver Oil, agreeing with the most delicate stomachs.

The D. & L. Emulsion Is prescribed by the leading physicians of Canada.

The D. & L. Emulsion Is a marvellous flesh producer and will give you an appetite.
