NOTICE

Our Stock of Prints, Hats, Flowers and Dress Goods.

GEORGE E. FULL,
Ch'town, April 24, 1889. QUEEN STREET.

Local and Other Items.

WANTED.—Two watchmen to take charge of Charlottetown on the 10th July next. All our citizens are going to the picnic at Tracadie on that day.

Veri, Vidi, Vici! This is true of Hall's Hair Renewer, for it is the great conqueror of gray or faded hair, making it look the same even color of youth.

Now for It.—Many citizens who were formerly opposed to the construction of water-works, have made application for a supply of the beverage. The world moves.

BRITISH EMIGRATION.—The Empire's London cable says: 1333 emigrants sailed from Liverpool for Quebec last week. The total emigration to Canada and the United States was five thousand.

A dry, hacking cough keeps the bronchial tubes in a state of constant irritation, which, if not speedily removed, may lead to bronchitis. No prompter remedy can be had than Ayer's Cherry Pectoral, which is both an anodyne and expectorant.

SMALL EGGS.—Says the Moncton Times: Mr. Mathew Tait, of Meadow Brook, beats the record for smallest hen's eggs. One sent to this office weighs only one dram, 2 scruples, or the eighth part of an ounce, apothecaries weight.

The value of a remedy should be estimated by its curative properties. According to this standard, Ayer's Sarsaparilla is the best and most economical blood medicine in the market, because the most pure and concentrated. Price \$1. Worth \$5 a bottle.

KEEP OFF THE TRACK.—A Lachine despatch of the 7th says that a little daughter of Michael Leger, hotel keeper at Willows Station, a short distance east of Lachine, Quebec, while in the act of placing pins on the track had her arm cut off by a passing train. She may recover.

THE FOUNTAIN.—Some people think that the best site for the proposed fountain on Queen Square, is the small enclosure between the two lamps, immediately in front of the Provincial Building. Placed there it could be seen from the foot of Great George Street, and would be a splendid attraction.

EXCURSION.—It is expected that Eastern Star Lodge of Picton, Norton Lodge of New Glasgow, and other Lodges in Pictou County, will visit Charlottetown at the time of the session of the Grand Lodge of Oddfellows in August next, and be accompanied by several bands of music in order to participate in the grand parade.

HORSEFLESH FROM THE ISLAND.—A fine Clydesdale mare has been brought from P. E. Island for Mr. W. J. Robinson, to match one recently purchased by him, which was brought over from the Island a short time ago. The horses are for his son's farm at Little River, Albert County, and will make a fine team. Mr. Robinson proposes to raise some stock after Deacon.—Moncton Transcript.

SECLARISM VS. CHRISTIANITY.—A petition with the names of over one hundred young men, whose minds have been stirred by the religious controversies of the time, as carried on in periodicals and on the public platform, will be presented to the Evangelical Alliance of this city, asking that Charles Watts be met in debate by some one competent to present the case of Christianity in the most forcible and logical manner.—St. John Sun, 8th.

SUDDEN DEATH.—The Moncton Times of the 8th inst. says: "The wife of Rev. John Prince died suddenly this morning between 8 and 9 o'clock. She had been in her usual health and was found dead on the floor. She had evidently been in the act of doing some household work at the time of being stricken. Rev. Mr. Prince was down town at the time and only made the discovery of her death on his return. The deceased lady was about 70 years of age. Paralysis of the heart was the cause of death."

A TERRIBLE DEATH.—The St. John Sun says: On Thursday last Nathaniel Martin, while working on a jam of logs in West River, Albert County, N. B., was caught among the logs and crushed to pieces. His clothes were torn into shreds, his flesh crushed to jelly, his bones broken into fragments, and his hearts blood smeared the adjacent logs and imparted a crimson tinge to the angry water of West River as it heaves and rapidly flowed onward towards the ocean.

SUPPOSED TO HAVE COME TO CANADA.—The provincial police have been advised by the savings bank of Sioux City, Iowa, to look out for an unknown party who secured from them several thousand dollars by fraud, and for whom a reward of \$1,000 is offered. He is described as about 60 years of age, with gray hair and full beard, both streaked with red; about 5 feet 10 inches in height; weight about 175 pounds, and an innocent face and manner, well calculated to deceive.

ADVICE TO MOTHERS.—Mrs. Winslow's Soothing Syrup should always be used when children are cutting teeth. It relieves the little sufferer at once; it produces natural quiet sleep by relieving the child from pain; and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best known remedy for diarrhoea, whether arising from teething or other causes. Twenty-five cents a bottle. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind. (April 1) '88

GEORGE FRANCIS TRAIN'S FAST.—A New York despatch says: George Francis Train finished the 18th day of his fast at noon on Monday. His pulse is down to 60, and weak. His weight has fallen from 198 to 174 pounds. He continues his diet of two pitchers of ice water and a Turkish bath daily. On Sunday he lectured at the Union Square theatre under the supervision of Mr. Miner Griswold, of Texas Siftings. Before going on the stage, he sucked an orange and drank coffee so that he might stand squarely on his legs. Mr. Train remains firm in his determination to outlast Dr. Tanner.

Canadian Railway Statistics.

THE official statistics show that the enormous sum of \$727,000,000 has been expended in Canada. There are now,—

Miles of railway completed (track laid).....12,701 66
do sidings.....1,531 86
do iron rails in main line.....1,037 55
do steel do do.....11,664 11
Miles in operation.....12,162 88

For last year the railway returns were,—
Earnings last year.....\$42,159,152 65
Working expenses.....30,652,046 03
Net earnings.....11,507,106 62
Passengers carried.....11,416,791
Tons of freight carried.....17,172,739
Miles run by trains.....37,931,306

Not a bad showing for a poor ruined country, weighed down by a National Policy?

The Halifax Herald remarks that in the past ten years we have placed 6,000 additional miles of railroad in operation. Our train mileage has increased by no less than 18,000,000 miles. We now carry 5,000,000 more passengers annually than we did ten years ago. We carry 10,000,000 tons more of railway freight than ten years ago. Our annual railway earnings have increased by \$22,000,000 in ten years, while working expenses have only increased by \$14,000,000.

The Parnell Commission.

THE IRISH LEADER STILL IN THE WITNESS BOX.

Mr. Parnell's cross-examination was resumed on the 7th. He said he had not heard of 100 guineas being paid for the defence of moonlighters at the Cork assizes in 1881. If he had been asked to make such payments he should in those days have approved of them if he had reason to believe the law was being strained against a man, but his general rule was to limit such payments as much as possible. He remembered one case in which he sanctioned the payment of money for the defence of a prisoner, the man was acquitted. Parnell declared that the majority of the members of the physical force party were utter strangers to him. Referring to his speeches made in America, as reported in the Irish World, witness said he could not accept the reports as correct. Ford garbled his speeches to suit the taste of the readers of the Irish World. He never made this statement publicly before. He considered that a person who joined the League and continued a member of the Clan-na-Gael was an injury to the league's policy. Any member of the league who advocated the use of dynamite would be a traitor.

Canadian vs United States Railways.

The Monetary Times remarks that American railways, being hampered by Congress in their freedom of competition, are resolved that, if possible, Canadian rivals which do an international business shall have no advantage over them. In this enterprise Congress and the Interstate Commission are ready to give them willing aid. Of this fact the proceedings against the Grand Trunk afford proof. A committee of the United States Senate has resolved to enquire whether American traffic is done by Canadian lines, with a view to restrictive legislation, under cover of doing something "for the protection of the commercial interests of the United States." "Protection to these interests," the New York Commercial Bulletin truly says, "can really be afforded by the freest competition and insuring the cheapest transportation, and in no other way." And it adds that though restrictions which place American railways at a disadvantage ought certainly to be removed, "the effort to control the transportation system of Canada by rates equally arbitrary must necessarily fail," while "the proposition to cut off Canadian competition is intolerable." Nevertheless there is reason to fear that our roads may be greatly hampered by obstacles which they may be able to throw in their way. The one thing in their favor is, as the Bulletin states, that "the facilities afforded by Canadian carriers have become an important element in the commerce of this (U. S.) country, and the movement for the discouragement of this service calls for the determined opposition of the representatives of commercial interests." Will that opposition be exerted, and if so, will it be successful?

Lower Montague Notes.

The farmers around here are beginning spring work.

We had a visit a short time ago from Mr. Kay, who had for sale a compound calculated to rot vegetable matter, etc., in a very short time. His object was to form a club of farmers who would buy his process. He consented to give his compound a trial, and, if satisfactory, purchase.

W. A. Poole, Esq., merchant, is away on a business trip to Shediac, N. B.

STILL ALIVE.

A Great and Fast Passenger Steamer.

The first trip of the new passenger steamer Puritan, of the Fall River Line, from New York to Newport, via Long Island Sound, was made April 24, with much success. She attained a speed of over 20 miles an hour with 65 pounds steam. When her new machinery is worked down and full power applied, which is 110 pounds, it is believed she will surpass in velocity any passenger boat afloat.

Equal to emergency—"Did you bring a field glass with you?" "Never thought of that; but we can drink out of the flask."

If you want to buy a good suit for your boy at a low price try James Paton & Co's.

About Horses.

Mr. Hickman, of Dorchester, N. B., has sent two imported young Shire mares to Charlottetown to be bred to Mr. Tweedy's Shire horse "Honour Lincoln."

The latest California wonder in the racing line is a two-year-old called Gladstone, that recently ran half-mile heats in 4-1/4, 48).

The latest purchase by J. H. Shults, the mill-mare New York breeder of trotters, is that of the seven-year-old mare Lizette, for \$4,000. This mare trotted a mile last season in 2:27, and about ten days ago was driven to the Parkville track for the first time this season, and at the first time of asking stepped a quarter in 30 seconds. Mr. Shults was an interested spectator of the performance, and gave the above mentioned price for Lizette on the strength of it. This mare is a trotting-bred one on both sides, her sire being the old time campaigner Voltaire, 2:20, and her dam the famous litter trotter Susie, 2:21, by Hampshire. It is understood that a better record than 2:30 will be given Lizette, after which she will join the ranks of the brood mares at Shults farm.

Capucine, the fastest French-bred trotter, and one that can go a distance with the best of them, defeated the American trotter Misty Morning a few weeks ago in a three-mile dash, the rate being about 2:42 to the mile. Of course this does not look like a creditable performance for a young and well-bred mare that made a record of 2:21 in 1887, as was the case with Misty Morning; but it should be remembered that in France the races are trotted over a rough course, sometimes little better than a ploughed field, and that in the present instance it was unusually bad on account of the fact that a detachment of artillery had been drilling on it the previous day. It seems strange to read about trotting races under such conditions, but the French have never been able to secure a good track for their trotters, although they are fond of the sport.

The Value of Public Schools.

New York Tribune says: No country in the world can show a prouder spectacle than our free school system, or one more pregnant with hopefulness for the future of liberty. Almost everywhere throughout the country the common schools bore a conspicuous part in the celebration. The national songs were sung; the grand events of the period, the close of which is now commemorated, were recited; and the lesson of patriotism were installed into hundreds of thousands of youthful hearts. In Chicago, the hotbed of imported anarchy, our flag floated for the first time over every schoolhouse. The common school system is a great engine, not only for the diffusion of intelligence, but for the infusion of patriotism. The seeds had been sown long before Washington was born; but as a defined system it has grown up almost entirely since he died. This is one large item to be remembered in the count for progress.

A New Alimant From Wheat.

According to Le Genie Civil, Dr. Dujardin-Beaumez recently exhibited at the Paris Academy of Medicine a new alimentary substance—"fromentine"—which is obtained from wheat by the aid of special millstones. Fromentine is the embryo of wheat reduced to flour and deprived of the oil which it contains. The substance contains three times more nitrogenous substance than meat, and a strong proportion of sugar. Thus, the amount of nitrogenous matter in it is 51 per cent., while that of the richest meat, mutton, is but 21 per cent., and the proportion of digestible substance reaches 87 per cent. of the total weight. Hence it would appear that it might advantageously replace powdered meat as a concentrated food. It can be used for making soups, and even for making biscuits, the taste of which would not be disagreeable.

The wheat germ employed are a by-product in the Schweitzer process of manufacturing a flour which can be kept for a long time without deteriorating.

Two of a Kind.

(Special to the St. John Sun.)

FREDERICTON, May 7.—Hattie Richardson, a girl of about 14 or 15 years of age, arrived here from St. Stephen the early part of last week, to be placed under the treatment of Miss Whitlock, the Christian scientist. Her case is a curious one, and is said to have puzzled several physicians who have been consulted. About three months ago, the patient recovered from a fever, but, with the disappearance of that affection came, the loss of her appetite, since when she is said not to have eaten a single morsel of food. It is certain that since her arrival she has eaten nothing. The girl is quite fleshy and seems as bright and lively as one enjoying perfect health.

Personal.

RICHMOND, P. Q., May 7.—A young lady named Mary Josephine Bedard, 18 years old, has been discovered by the doctors at Tingwick, near here, and who has not taken a mouthful of food for eight years. She is in good health, and is nothing short of a walking wonder.

Miss Sophie M. Almon of Halifax has issued a small volume of poems for private circulation. The Halifax Herald says that these poems are such as to meet the strictest demands of poetic correctness, and, if we except the blank verse, exhibit a mastery of some of the most difficult forms of English versification.

Cardinal Laviger, in a speech made at Algiers, related this conversation between himself and the Pope. The Pope said:—"So you like the English?" "Yes," replied the Cardinal, "I like the English Christians, Holy Father, on account of their innate virtues, of the nobleness of their lives, and of their having retained much more of the Roman Church than other Protestants; but especially on account of their sincerity; which allows us to hope as to many of them that if we are externally separated we are internally united in the soul of the same Church. How desirable it would be to see these hopes realized!" "I desire it as much as you," rejoined His Holiness; "repeat it to your English friends when you have an opportunity."
