ARCHIBALD SCOTT, ETC.

SIR, I beg to inform you that I have become a member of the Agency of the Fire Insurance Company, I beg to bring under your notice my PATENT FIRE-RESISTING SLATE. This composition has been approved of by the Government in New Brunswick, Newfoundland and Prince Edward Island, and is used extensively for covering shingled roofs, as you will perceive by the accompanying circulars of certificates. It is a most valuable and necessary article for fire proof buildings under most extraordinary circumstances; so much so, that I am of opinion that it is the best material for covering roofs, and is applicable to all kinds of wood building (where the roof would be so exposed to the weather, as to be liable to decay, or to the fire, or to the city, or to the house, or to the barn, &c., &c., &c.) by lowering the price of insurance on such buildings as are covered.

I have the honor to be, Sir,
Your obedient servant,
Halifax 12th July, 1853.
SIR, In answer to your note of the 12th inst. I consider the use of my "Fireproof Slate" on shingled roofs, as greatly diminishing the risk against fire. It has frequently reduced the premiums on Buildings in this country, upon its application.
I am, Sir, your obedient servant,
ARCHIBALD SCOTT, Insurance Agent.

PRINCE EDWARD ISLAND AND THE MAINE LAW.

Mr. Editor,—I have just returned from a visit to the island of Prince Edward, where I have been endeavouring to impress the friends and enemies of the good cause with the expediency, propriety, justice and necessity of adopting the *Maine Law*, as the proper regulator of the deadly traffic in liquor here.

You will have some idea of the difficulty of maintaining that position, when I inform you that the Premier of the Island, is also Premier of the trade, i. e. head distiller and brewer. It may, perhaps, be as well, however, to remark, that he is spoken of as an estimable man; the main-liquor he brews here and distills whiskey; and how far that may lessen his claim to high morality and respectability will depend very much upon the views of those who judge in such matters. One thing, however, is certain, that in the great public eye, the title of *Honorable* does "cover a multitude of sins," as it very devoutly and prayerfully sith the Honorable gentleman in question, may be led to abandon the bad business of destroying the grain designed for man's food, and convert it into a deadly poison, or else forfeit the high position he now occupies, in which his double influence may certainly be the means of perpetrating and covering up all manner of atrocious and heinous crimes, and the power of the Devil's most subtle agents, and intoxicating drinks. Pity it is that his fair land should be smutted all over with the soot of distillery chimneys. Pity it is, too, that he should be so ignorant.

A word about the land itself. But let me promise, that I am a very indifferent hand at describing scenery; and hence, I may convey a very imperfect and feeble notion of its worth. Approaching Charlotteville in the steamer "Fairy Queen," at an hour sufficiently early to observe the dew-drops, and the mists of the morning, and the sun, under the rays of the morning sun, an infinity of minute pearls, on a ground of purest green, and a scene of such beauty, that every *viewer* were bringing us to her own dominions, and about to introduce us to creatures of a higher order than might be supposed to exist upon our own planet. Smiling fields, yet rich with the harvest treasures, spread out in tranquil beauty, everywhere met the eye; while the whole country appeared to be a garden of Eden, and lovely meadows, and gentle undulations, with parks and lawns, and cottages, and mansions of greater pretensions, church spires, and—all I may not mention, but all so beautiful, and so truthful. "Between the sublime and the ridiculous there is but a step."—*Church spires and distillery chimneys!* Ah, ah! what an awful contradiction! The Temples of the Temples of God, and the Temples of—who?

In sober truth and humble prose, Prince Edward Island is a lovely land, and a worthy and noble one to be proud of. Its people, too, are worthy. I had heard that they were characterized by urbanity of manners, and genuine hospitality, and I realized the truth of it, when I was here.

But I am admonished that this epistle must not be too lengthy; and you will wish to know what I have been doing there. I have been, and I have seen, a great number of things, and on each occasion was listened to throughout with patient and unbroken attention. I opened—allow me to assume somewhat of a disclaimer, for I am not a doctor of small arms, as so to drive in the enemy's advanced guards. Then I discharged a concussive volley at the main body, producing some little confusion, and I have seen a great number of their ranks. Selecting a certain battalion in white uniforms, and carrying curious weapons, evidently stolen from a sacred altar, I fired a volley, and they returned their stolen arms upon their own ranks, and endeavouring thus to show them, that their position was unsafe and their ground untenable. And, lastly, I had some bonny shells, rockets and chain-shot at distilleries, taverns and grogshops, and left the battle, myself without a wound, and the ranks of the total army promising a successful issue. In the morning, when all were preparing for breakfast, a fellow-traveller accosted me, saying, "My dear fellow, I have the nature of the complaint which you spoke of, and I can be cured without any medicine." "The nature"—I replied, "I have a little nonplussed for answer." "Yes sir; I never heard of such a disease." "I thought, said McVicar, brightening up, "I would give you one law. It is a disease of long standing." It first appearance in America was during the Revolutionary War, when it took the form of the best man our country ever contained. At the battle of New Orleans, it was confined to an epidemic; and since the arrival of Kosciusko in this country, it has broken out afresh in many places.

"Indeed said that stranger. I confess I have never heard of it." "Perhaps not," said McVicar, "it is generally gone by another name." "And what might that be?" "Rappinism," said he, as he turned away to arrange his belt for breakfast."

favour, and dignified by reference to the same committee, to whom was committed the duty of rendering a report. Since then, a general election has taken place, and the result, although far from being a triumph to our side, such as we could desire, is nevertheless sufficient to indicate, that it will not be safe for the claimants of the people's suffrages again to trifle with the united influence of the patriotic band who are so warmly engaged in the de- tested traffic. The people only want light on the momentous subject, and a trusty agent is now in the field, employed by the State, for the purpose of diffusing that light; and after Brother J.
