NEWS OF THE WORLD.

POTASH IN AGRICULTURE.

The important part which potash plays in the production of crops is pretty well understood; but comparatively little is known of the means which are now available to restore this valuable element to worn-out soils.

The great source of potash for the world's agriculture is what is known as the "German potash salts," the product of the great Stassfurt Mines in the north of Germany.

In the course of borings for rock salt undertaken by the Prussian Government in 1839, and extended at various times until 1857, a deposit of calcareous potash was found, consisting largely of potash and magnesia compounds, which were then considered worthless, but which are now known to be of inestimable value.

The supply of potash is believed to be practically inexhaustible, and the needs of the soil in this industry is bound to assume enormous dimensions. In 1892, Germany alone used in the agriculture of the Empire 412,025 tons of crude potash salts, besides a large share of the output of refined potash from the Stassfurt factories.

The Hawaiian plot is thickening. The petition of the Hawaiian Patriotic League, representing 8,000 voters, has been received by congress. It is an appeal to the United States for justice, and denounces the provisional government, ex-Minister Stevens and others concerned in the overthrow of the monarchy.

Civilization will rejoice in the fact that the Queen of Hawaii has decided to adopt European dress. A fashionable firm in London has forwarded to Her Majesty four costumes. The material in each case is wool.

LECTURE ON ELECTRICITY.—The lecture on electricity with experiments, delivered by Mr. A. E. Morrison manager of the A. A. Telegraph Co. in St. James' Hall last evening was very successful.

PERSONAL.—The death is announced at the parish of St. Raymond, near Quebec, of Mrs. Mary Barnes, a native of Kilkenny, Ireland, aged 108 years.

TEACHERS' INSTITUTE.—Meeting of the Teachers' Institute in the Y. M. C. A. this evening at 7.30. Dr. Torrey and Prof. Robertson will be present.

It is said that Lord Dunsen intends to add at least one thousand square feet to the Valkyrie's stretch of canvas before opening the yachting season.

The total value of the crops of the United States during 1893 is estimated at \$2,000,000,000, of which the largest item is \$750,000,000 worth of hay.

St. Petersburg is expecting another assassination because "the ghost of Alexander II recently appeared, dressed in full uniform, standing before the altar in the cathedral in that city."

The marriage laws of Australia are becoming quite strict. A marriage there has been declared void because the bride had deceived the husband by stating that she was fifteen years younger than her age.

There is a club in Berlin called the Giants, every member of which is six feet tall. Vienna has a Lazy club, no member of which does anything for a living, and London a Half-headed club, where nothing but polished skulls are seen.

The great Brooklyn Bridge is a paying enterprise. Since it was opened to traffic it has paid to New York and Brooklyn a total of \$2,076,000. The surplus earnings for the six months ending November 30 were \$270,000, or about \$1,300 per day.

Temperance women of Norway asked the public authorities a short time ago to make it unlawful for women or girls to serve in public houses. The request has been granted, and at present an ale-house keeper cannot employ any other woman than his own wife.

The Bible has been printed, either wholly or in part, in 354 languages or dialects. Up to April, 1892, there have been more than 27,000,000 copies of Bibles, testaments and portions of scripture printed; those printed by private publishers cannot be estimated.

A second edition of the Siamese twins now being exhibited at Hong Chow, are two nice looking boys about 8 years old, bound together by a ligament of flesh near the middle of their sides.

The supply of gold in South Africa is said to be inexhaustible, and it can be very easily mined. During the year 1893 the total amount of gold mined out there was not far from \$30,000,000, and this year it will be twice as much.

Sarah Bernhardt had a narrow escape from death by poison at the rehearsal of her new piece, "Lila," in Paris on Friday last. Her new Bohemian servant, Kerim, who attended her at rehearsals, poured some lanthanum into her cup of tea by mistake.

Dr. Willis a Mohre, a specialist on therapeutics, who is a member of the staff of the West Side German clinic, in West 62nd street, New York, has discovered that permanent potash is an antidote for morphine poisoning, and that it will counteract, within a reasonable lapse of time, the effects of any of the salts of opium.

The Seventh-Day Adventists immersed 200 converts in the baptisms at Battle Creek, Mich., on Sunday. There are 200 more to be baptized. All the Adventists have exchanged their gold watches for silver, believing that it is against God's wish to wear gold.

A curious lawsuit has just been concluded at Brussels. A widow named Moens died intestate, leaving a large fortune. A dispute at once began among her relatives and a lawsuit to settle the various claims was instituted.

DR. McLEOD'S LECTURE.

Dr. McLeod's lecture last evening was (as everyone expected it would be) a rich treat. The audience was the largest which has greeted any of the speakers in the Y. M. C. A. course of "Practical Talks" this winter, a goodly portion being ladies. Dr. Taylor occupied the chair.

In opening, Dr. McLeod stated that he could only touch on a very small portion of what is included in the term "Biology"—a term which had been given to the talk by others than himself. His remarks, however, covered a wide range of thought, and he succeeded in explaining a number of obscure points clearly and in such a manner as to carry the audience along as though he were talking individually to each one alone.

Starting at the start, protoplasm, he showed that from the lowest form of animal life, the jelly-fish, with its single ganglion, through all the innumerable gradations of the Animal Kingdom up to man, with his intricate, delicate and complex nerve system, his cultured and developed mind, that intelligence and organic or structural development go hand in hand.

At the conclusion remarks were made and questions asked by Messrs. A. McNeil, W. P. Doull and James McDonald. A hearty vote of thanks was tendered to the doctor for his able and instructive lecture. The next talk of the course will be given next Friday evening by Mr. W. P. Doull, on "Static Electricity," with experiments.
