HOGAN, Sec'y.-Treas.

What's news at Inco?

INCO NICKEL HELPS SAVE LIVES BY PROTECTING THE PURITY OF DRUGS. AN AMERICAN RESEARCH SCIENTIST arrived in Bolivia where a typhus epidemic was raging. He had 200 grams—the total world's supply—of a new and untested drug called Chloromycetin. There was just enough to treat 22 patients. All were seriously ill—some with signs of certain death. A death certificate had already been made out for one typhus victim. Forty minutes after receiving Chloromycetin, he asked for a drink of water. Within a few hours after the drug was administered, many of the 22 showed marked improvement. All recovered! Chloromycetin went into full production. Inco research and development teams in cooperation with industry have been in the forefront of the world's metallurgical developments since 1921. The knowledge and experience gained are among Inco's greatest assets. Inco research points the way to Inco's future! "The Romance of Nickel", a 78-page book, fully illustrated, will be sent free on request. Bulk copies supplied Secondary School teachers.
