

New Service Station For Summerside Motors Is Modernly Equipped

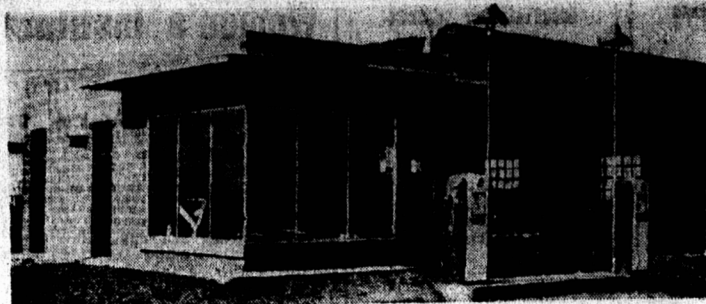

The opening of a new service station by Summerside Motors on Water Street, Summerside, is an important advancement in the services available to the motoring public. Mr. Wm. Moase, the proprietor, is to be congratulated on the very fine new building and modern equipment which compose the new station.

Located on the waterfront near the east end railway crossing this service station makes a great improvement in this area which formerly was a bit of an eye sore. The building is 43 by 30 feet and is constructed of concrete blocks, manufactured in Summerside by P. E. I. Concrete Products Company. The building is divided into wash room, service room, show room, office and wash rooms for men and women. The building is of the modern functional type of architecture and two sides of the show room consist entirely of glass supplied by Hobbs Glass Ltd. of Moncton. The other two interior walls are finished in plywood veneer.

Fluorescent lighting fixtures have been installed throughout by Wright and Bell Ltd., who had the contract for all the electrical installations. The forced air heating system was installed by R. T. Morrison and Co., who also had the contract for the plumbing. The general contractors were Morrison and Harris of Summerside and a great deal of the equipment was supplied by Batt & MacRae Ltd. of Charlottetown.

The overhead doors for the wash room and service room as well as some hardware and paint were purchased from the Summerside Hardware Company. Most of the lumber, doors and door-frames and other materials were supplied by R. T. Holman Ltd.

British-American oil and gasoline products will be handled exclusively and the tanks are the new "shortie" type with pull-out hose.—S.

BUILD WITH THE BEST — THE MODERN WAY WITH CONCRETE BLOCKS

We congratulate Summerside Motors on choosing concrete blocks as the main material for the exterior of their new service station. It is a fine building and their choice of material is well justified.

- * USE CONCRETE BLOCKS
- * SAVE ON INSURANCE
- * LOWER COST
- * FIRE-PROOF BUILDING
