In Chancery In The Rolls Court

DAVID P. IRVING & others, Complainants and MARGARET IRVING & others, Defendants

In pursuance of an order of this Honourable Court, made hereon, on the 28th day of March, A. D. 1899, notice is hereby given that all persons having claims against the estate of George Irving, late of Orwell Cove, Lot or Township number 57, in Queen's County, deceased, intestate are required to come in and prove the same before me at the Prothonotary's office, in the Law Courts Building, in Charlottetown, on or before Monday, the twenty-second day of May next, A. D. 1899, and all persons neglecting to come in and prove their said debts and claims by that time are to be excluded from the benefit of said order.

Dated this 29th day of March, A. D. 1899.

Of Special Interest to our Farmers

Care of the Colt.

In Farming of April 18th, J. H. Grisdale, the agriculturist of the Dominion Experimental Farms, speaking on this subject, says:

"To the skilful breeder the destiny of a given colt is practically under his own control. Too many of our farmers consider that their part is done when they have bred the mare to a sire whose type they admire or whose breeding suits them. The colt comes in due time and is relegated with the dame to some remote pasture; or worse, even, it is forced to follow the mare aimlessly from one end of the soft ploughed field to the other in a weary trudge. Then, as the mare is permitted to rest once in a while to cool down, the colt seizes the opportunity to drink and draws from the foaming udder the over-heated milk, turned from a life-sustaining to a death-dealing fluid.

The future usefulness of the colt depends upon nothing so much as the feed during the first year of its life. To be useful in any way a horse must have good bones, and, above all, good joints. Bones are built, like the rest of the body, from the feed consumed by the young animal, and if the food does not contain the elements essential to the growth of bone it is evident that there will be a weakness in this part of the organism. The milk from the dam contains a large proportion of the most necessary mineral substances, such as lime, but the colt seems to require much more in a short time and may be seen trying to supplement this limited supply by taking occasional mouthfuls of soil. Probably no materials at the farmer's disposal contain more mineral or bone forming material than bran and oats, and the colts should have plenty of these and good clover hay from the start. It is quite safe, as a rule to give as much as two quarts of these concentrates mixed per diem as soon as the colt can be taught to eat them, and this may be gradually increased. The colt's temperament and character should be closely studied, however, and the ration gauged accordingly. These concentrated food and clover hay, being rich in protein or flesh forming material, induce rapid development of muscle sinew and tendon, as well as bone, and such are the great desiderata in colts. Feed liberally of the right kind of feed, and nature will do the rest so far as bodily development is concerned.

Yet, nature must be given every opportunity and all her forces allowed to do their part of the work. Let the colt have lots of good pure air. Give it all the sunshine it requires. Stint it not where good pure water is concerned. Be careful to permit it to lie down frequently and comfortably. Do not over-exercise; yet err not on the other side and give too little. The well-fed colt requires more exercise than the average or poorly fed one. As the weaning time approaches, the colt should be encouraged still more to eat hay, oats and bran. By careful feeding he will scarcely know that he has lost a part of his ration, and will unwittingly substitute that which is provided to replace it. Some people forget to provide a sufficiency of a suitable substitute. Better not to forget. The same ration may be used during all its

colthood days, but remember ever that larger animals require larger rations.

The last number of the co-operative Farmer says; "It is a hopeful omen of the future of Prince Edward Island that its people are taking up the matter of practical agricultural education in earnest. We note with pleasure that not only has a traveling dairy inspector and instructor been arranged for, but also that the Provincial Fruit Growers' Association is arranging for a traveling orchardist, who will give practical lessons on fruit growing and spraying for the various enemies that attack the trees and fruit."

Food Value of an Egg.

Six large eggs will weigh about one pound. As a flesh producer, one pound of eggs is equal to one pound of beef. About one third of the weight of an egg is so id nutriment, which is more than can be said of meat. There are no bones and tough pieces that have to be laid aside. Practically an egg is animal food, and yet there is none of the disagreeable work of the butcher necessary to obtain it. Eggs at average prices are among the cheapest and most nutritious articles of diet. Like milk, an egg is complete food in itself, containing everything that is necessary for the development of a perfect animal. It is also easily digested, if not damaged in cooking.—Presbyterian Banner.

WOODSTOCK WONDER.

A Crippled Rheumatic Restored by Dodd's Kidney Pills.

Woodstock, Ont., May 22.—Never, in the social history of this town since the B. Hall trial, has such great interest been shown as the "Cutmore Case" has caused.

Mr. C. J. Cutmore, 91 Main Street, was crippled by Rheumatism and Lumbago during five years. He couldn't stand straight, and had to be helped from his room.

Today he is straight and strong; sound in every limb, thanks to Dodd's Kidney Pills. Other remedies were used, but did no good. Dodd's Kidney Pills cured him, and Dodd's Kidney Pills ALWAYS cure Rheumatism and Lumbago.

Ascension day, was the anniversary of the death of Mr. Gladstone, and a private memorial service was held in Hawarden parish church, Miss Helen Gladstone, daughter of the deceased statesman, represented her mother, who was unable to attend.

Dr. Chase Cures Catarrh after Operations Fail.

Toronto, March 16th, 1897. My boy aged fourteen, has been a sufferer from Catarrh, and lately we submitted him to an operation at the Central Hospital. Since then we have resorted to Dr. Chase's Catarrh Cure, and one box of this medicine has made a prompt and complete cure.

H. G. FOHL, Foreman, Cowan Ave. Fire Hall.

Mihard's Liniment Lumberman's Friend

Build Up.

When the system is run down, a person becomes an easy prey to Consumption or Scrofula. Many valuable lives are saved by using Scott's Emulsion as soon as a decline in health is obtained.

The statement from Manila that Admiral Dewey is in greater dread of the reception in store for him when he shall set foot on his native land than he was of his reception at Manila when he visited that port in the early morning of May 1, 1898, without asking permission of the commanders of the Spanish forts and fleets, is probably correct. The lion hunters, souvenir collectors, hero-worshippers, etc., are preparing for a vigorous campaign.

To all who find themselves with health gradually slipping away, Kidneys and Liver so disorganized that they are incapable of keeping the system free from poisonous waste material, Stomach Disordered, Bowels Constipated, Head Aching, Back Pain, take Dr. Chase's Kidney-Liver Pills. The quick way they help you back to health will surprise you.

The books of W. A. Weeks & Co., will be placed in the hands of their attorney for the collection of all unpaid accounts, on the fifteenth of May. Save expense by calling at our office and settling before that date—W. A. WEEKS & Co.

Ask for Mihard's and take no other.

Croup Quickly cured.

Mrs. J. Sims, Mt Pleasant, Vancouver, B. C. writes:—If there ever was a never-failing remedy for a disease, it is Griffith's Menthol Liniment for croup. We have frequently administered it to our children, even the baby, and never knew of its failure to cure in a few minutes. No home should be without it. 25 cents at drug stores.

Ladies, see our Dongola Shoes, regular \$1.00 quality, our price Saturday 75c—J B Macdonald & Co.

Chronic Eczema Cured.

One of the most chronic cases of Eczema ever cured is the case of Miss Gracie Ella Alton, of Harland, N. B. On a sworn statement Mr. Alton says: "I hereby certify that my daughter Gracie Ella was cured of Eczema of long standing by using four boxes of Dr. Chase's Ointment. William Thistle, Druggist, of Harland, also certifies that he is four boxes of Dr. Chase's Ointment which cured Gracie Ella.

Minard's Liniment is used by Physicians.

Artificial Teeth on Metal Plates

A dentist who knows his business, and one that has any regard for his patients will always advise them to have a metal plate.

PROF. MELVILLE B. BUCKLEY, Instructor Boston Dental College, Boston Mass

In view of the vast amount of injury done to the mouths of wearers of rubber or vulcanite plates, by the retention of undue heat, owing to the non conductivity of rubber, and as aluminum is now so cheaply produced, and making as it does a rigid, light, clean, unobjectionable plate there seems no reason why any person should wear a rubber or vulcanite plate. Not only this, but better results in fit and adhesion are obtained in difficult cases, than in the use of rubber.

L. P. HASKELL, D. D. S. Chicago Ill Dental School

The above quotations are from hundreds by eminent dentists whose close observation in many years experience in plate work has learned them the many advantages of metal over rubber.

Many persons who are compelled to wear artificial teeth on a plate find that the ordinary plate causes heating of the mouth, bad taste, sore lips, sore throats, and sore throats, and caused directly from the wearing of an ordinary plate.

We recommend a metal plate either of Gold, Platinum, Aluminum.

It is a conductor of heat and cold, it is non-irritating, and is thinner, lighter, and stronger than any other plate.

We have testimonials from persons for whom we have made metal plates—not one would wear an ordinary plate again. You can have your impression taken, and a metal plate made same day, fully guaranteed because we make them ourselves, and know all about the material used. Call and see specimens of our work.

Every piece of work done by us must give entire satisfaction to the patient, else we will not allow it to leave our office.

See our artificial teeth without plates.
