"Covers Prince Edward Island Like The Dew"

AMHERST HOSE COUPLERS

A crack Amherst fire department team of hose couplers are seen participating in the event at Summerside yesterday afternoon in the Maritime Firemen's Tournament. (Story on page 2).

New Coal Use Urged By MP

OTTAWA (CP) — Government moves to bolster the Nova Scotia coal mines should be centred on developing industry at the pit-head, J. W. Pickersgill (L.—Bonavista-Twillingate) said Friday in the Commons.

The Newfoundland MP said this would be the constructive way to improve the industry, rather than spend large sums in transporting coal to central Canadian markets.

Mr. Pickersgill, former Liberal immigration minister, suggested these moves:

1. Use of coal at the pithead for industry.

2. Acceleration of research on a very large scale to find new uses for coal, "as we should have done when we were in office."

Steel Strike Cuts Deeper

PITTSBURGH (AP)—The effects of the three-day-old U.S. steel strike cut deeper into the economy Friday with more layoffs, walkouts and soaring production losses.

In Washington, President Eisenhower conferred on the steel situation with Labor Secretary James P. Mitchell. The White House declined to provide any details.

Elsewhere public officials got ready for an avalanche of relief requests; defence plans were hurried in at least one installation; and \$200,000,000 worth of construction work in steel plants was halted.

The strike of 500,000 steelworkers already has made idle 30,000 workers in railways, coal mines, great lakes ore carriers, trucking and other industries.

Each day the strike continues the production loss amounts to 300,000 ingot tons of steel with huge wage losses running \$70,000,000 a week.

Yanks Want Control Of Atomic Stockpile

By HAROLD MORRISON
Canadian Press-Staff Writer
WASHINGTON (CP) — The United States has made clear it is ready to stockpile atomic weapons in Canada if Canada so desires, but full control and custody in Canada must rest with the U.S.

This was spelled out by Gen. Herbert Loper, an assistant to defence secretary Neil McElroy, in testimony before the joint congressional committee on atomic energy.

The committee last week gave its approval to new U.S. nuclear pacts with Canada and six other North Atlantic powers and then made public a censored report on hearings that took place in June and earlier this month.

Unless vetoed by a joint resolution of the House of Representatives and Senate, the agreement with Canada will go into effect next Friday. Other agreements with Britain and France already are in effect. All the pacts are expected to be operational this month.

For most countries, the agreements will allow the U.S. to give

Queenly Sunburn Is 'Lobster Pink'

By DAVE MCINTOSH
Canadian Press Staff Writer
VICTORIA (CP) — The Queen has a sunburn, not lobster red but salmon pink.

The burn was shown markedly Friday when she wore a dress more open at the neck than the one she had on Thursday for the 30-mile drive in an open car from Nanaimo to Victoria.

The line of the sunburn at the neck is etched clearly but it does not appear to cause the Queen any discomfort.

The weather has been clear and hot ever since the Queen entered British Columbia.

FOUR OUTFITS

The Queen wore four different outfits Friday.

For her morning visit to the veterans' hospital and presentation of colors to two regiments, she wore a raven-blue satin dress with the skirt softly draped to the centerpoint. The veiled hat was of pink orchids and organza petals.

At a luncheon given by the B. C. government in the Empress Hotel, the Queen wore a spotted auntie organza full-skirted dress and hat of white

veiling with crown and brim swathed and draped.

For the garden party at Government House, she wore a tulip-shaped dress of rose, pink and green printed taffeta. The hat was a small toque of lime green rose petals veiled with tulle.

The Queen wore an evening gown for dinner. Saturday she was to be back in travelling clothes for her flight to Whitehorse, Northwest Territories.

Disregarding the strict times set out in her schedule, the Queen arrived 10 minutes late at the veterans' hospital and chatted with a number of bed-ridden patients. Prince Philip too had a number of chats with the patients, smiling often and making the patients smile.

A number had their beds placed outside on the walk and towels had to be draped over their heads to protect them from the sun.

The Queen then went to Beacon Hill Park where she presented colors to the 1st Battalion, Princess Patricia's Canadian Light Infantry and a guidon — a pennant — to the King's own Calgary (14th armored) Regiment.

Berlin Settlement Discussed Again

By JOHN EARLE
GENEVA (Reuters)—The Big Four foreign ministers Friday discussed a Berlin settlement at the first private meeting they have held since their conference resumed on Monday.

Western officials said

no progress was made. They were frankly pessimistic of reaching an agreement.

On the other hand, a Soviet spokesman said the U.S., British, French and Soviet foreign ministers had a "good and substantial" discussion. He said there is no reason for pessimism.

It was agreed to meet again privately Monday. A formal session will be held Tuesday at Soviet Foreign Minister Andrei Gromyko's request.

GROMYKO'S SURPRISE
At a formal session last Monday, Gromyko surprised the Western ministers by demanding that, at all future private meetings, the East and West German delegations be invited to attend.

This fitted in with the Soviet aim of raising East Germany's international prestige.

The Western powers, who do not recognize the Communist East German regime, refused.

A formula for resuming the private Big Four talks which were held during the first half of the conference was worked out at a luncheon Thursday between Gromyko and British Foreign Secretary Selwyn Lloyd.

Icebergs Persist In Spite Of Heat

ST. JOHN'S, Nfld. (CP)—Warm July temperatures have failed to stop the flow of Arctic icebergs that pass southward along the east coast of Newfoundland.

Capt. R. J. Randell, district marine agent for the transport department, said Friday bergs will likely be present along the coast for the rest of the summer.

Trip IS Starting

By DAVE MCINTOSH
Canadian Press Staff Writer
VICTORIA (CP)—The Queen leaves today for the land where it's noon at midnight.

It will be the first journey by a monarch into the Canadian Arctic where Sam McGee was over-looked and Dan McGrew was shot because of a doll by the name of Lou.

The Queen is scheduled to leave here at 10 a.m. for Whitehorse, Yukon Territory with a brief stop en route at Terrace, B.C.

The Queen will stay at the RCAF station at Whitehorse, the capital of the Yukon, founded in 1896 at the height of the Klondike gold rush.

She will drive around Whitehorse in the afternoon and in the evening may appear at the annual Klondike Night if officials consider the celebration isn't too boisterous by that time.

FLY TO DAWSON

The Queen and Prince Philip will worship at Anglican Cathedral Sunday morning and after the service will fly 250 miles north to Dawson City, once the capital of the Yukon but now with a population of only 1,000, compared to its one-time 30,000.

At the old miner's home, several elderly gold-dusters who came up the trail of '98 and never went "outside" again, will be presented to the Queen.

On Monday, the Queen will fly on to Yellowknife, in the Northwest Territories, a community of 3,500 founded 32 years ago on gold and later uranium.

92 OPERATIONS FOR CANCER

CHICAGO AP — A 92nd cancer operation for Dr. Emil H. Grubbe, 84, who pioneered x-ray therapy for cancer, was postponed Friday.

Doctors at Swedish Convent Hospital said the surgery, to remove the index and small finger of Dr. Grubbe's right hand will be rescheduled next week. The delay was ordered after Dr. Grubbe suffered a systemic shock Thursday in a fall.

In his long fight to stem the ravages of the disease Dr. Grubbe has lost portions of his nose, jaw and left hand.

Strawberry 'Raiding' Said Industry Menace

A threat to the future of the strawberry industry on the Island is seen in what is termed by some processors as "raiding" of New Brunswick truckers of Island strawberry patches, making it difficult or impossible for processors to fulfill contracts.

It is reported that due to a shortage of the crop in New Brunswick trucks have been coming over and offering farmers higher prices than they had contracted for with the strawberry exchanges.

It is said that these truckers are interested only in supplying the weekend trade of New Brunswick stores and for at least two days of the week the exchanges are left without sufficient fruit for running their plants.

Processors point out that the strawberry exchanges of the Island have been responsible for keeping a profitable price under the fruit since their establishment and farmers who fail to live up to commitments by selling berries at a temporary high price are using a "very short sighted policy."

It is even predicted that some outfits may have to close their operation as a result of this raiding and they point out that this could have disastrous results in future years, if there is no outlet for the crop.

They recall the circumstances that existed before the exchanges came into being when a glut on the market sent prices into a dive and growers were obliged to sell at 8 cents per box.

The Prince Edward Island Frosted Food plant reports that they have been able to secure very few berries when they are equipped to handle 1,000 crates per day.

Mount Stewart Exchange too has felt the effect of the squeeze but are hoping for a re-adjustment in market trends as the new crop comes in.

CHARLOTTETOWN EXCHANGE
Charlottetown Exchange on the other hand say they are not affected. They claim their members are fulfilling their contracts 100 per cent.

One processor in commenting on the situation sees it this way: "It may be a little disconcerting to a grower to see his neighbour get a higher price for his berries from a New Brunswick trucker, but the picture must be considered from a wider viewpoint. Their willingness to accept less now,

Canadian Wheat Exports Seen At 290,000,000 Bus.

Roads To Resources Money Said Assured

"If the provincial government were as sure of its money payable to it as it is of receiving whatever roads-to-resources payments that may now be due from Ottawa, its financial worries would be considerably less," Heath Macquarrie, M.P. for Queens said yesterday.

Fellow Conservative John A. Macdonald, M.P. for Kings, said the latest House of Commons discussion was a follow-up to the hot debate which, during last Saturday afternoon during consideration of the estimates for the Northern Affairs department, saw Liberal and CCF members call attention to the "seemingly outrageous" treatment of Prince Edward Island under the program.

Both Island representatives were commenting on statements made recently in the House of Commons by Northern Affairs Minister, Alvin Hamilton.

Mr. Hamilton is reported as saying that the Island Province already had spent \$2,500,000 on the roads-to-resources project, and would be reimbursed one-half that amount as soon as the roads concerned were completed.

All roads-to-resources projects are initiated by the Provinces concerned. Mr. Macquarrie declared.

Provided that each unit fell within the over-all design envisaged by the enabling legislation, normally federal approval was automatic, he added. However, in order to better achieve the purpose of the plan, federal authorities sometimes suggest minor alterations in one or another provincial project.

The federal government does not dictate the terms of these agreements which are basically the responsibility of the participating Provinces, he said.

HELD FOR DECISION
Formal signing of the agree-

Dr. MacKenzie Is Appointed

The appointment of J. Wendell MacKenzie, M.D.C.M. as medical advisor to the Hospital Services Commission of Prince Edward Island was announced yesterday by the chairman of the Commission, Dr. L.E. Prowse.

As Commission advisor, Dr. MacKenzie will be required to insure adequate utilization of medical and hospital facilities so as to provide the highest standard of care in hospitals.

SCHOLARSHIP
Judy Millar, daughter of Mr. and Mrs. Robert G. Millar, Ellerslie, P.E.I., has been awarded the George Douglas Steele scholarship by Mount Allison University. This scholarship is open to graduates of Prince of Wales College, Charlottetown. Miss Millar obtained honour standing during her four years at Prince of Wales and intends to study for a Bachelor of Science degree in home economics.

Scotia Adds Trip On Ferry Run

MONCTON—The Northumberland Strait ferry service operated by Canadian National Railways is to be further increased.

D. V. Goudier of Moncton, vice-president and general manager of the CNR's Atlantic region, has announced that starting Friday July 24, the S.S. Scotia II will make an additional return trip daily between Borden, P.E.I. and Cape Tormentine, N.B.

The Scotia II was placed in summer operation between the Island terminal and the New Brunswick mainland July 2, augmenting the regular service provided by the S.E.V. Abegweit and S.S. Prince Edward Island.

Since then the Scotia II has been making three round-trips daily, leaving Cape Tormentine 9:15 a.m., 1:30 p.m., and 6:45 p.m. and departing from Borden 10:45 a.m., 2:55 p.m., and 8:10 p.m.

Commencing Monday, under the new schedule the ship will operate from Cape Tormentine 9:15 a.m., 1:30 p.m., 4:25 p.m. and

8:20 p.m. and from Borden 10:45 a.m., 2:55 p.m., 5:50 p.m., and 9:40 p.m. All times mentioned are Atlantic Standard.

Mr. Goudier said the additional service has been made possible by the complete and helpful cooperation of the general public. This public understanding has permitted all three ships in the P.E.I. service to maintain their combined schedule of 13 round trips daily and has enabled the operation of the two additional daily crossings by the Scotia II.

This vessel will continue to accommodate trucks, and passenger automobiles will be handled by the Scotia only if there is space available after all waiting trucks have been taken aboard.

The Abegweit and Prince Edward Island are reserved for passenger automobiles, but trucks are handled if space is available after all automobiles have been loaded.

The schedules of both the Abegweit and Prince Edward Island remain unchanged.

Carryover Of Wheat Said 510 Million Bus.

By STAN McCABE
Canadian Press Staff Writer
WINNIPEG (CP) — Canadian wheat exports are expected to pass the 200,000,000-bushel mark but fall short of the 300,000,000-bushel target for the 1958-59 crop year, a wheat board spokesman said today.

The spokesman said in an interview that the carryover of wheat into the 1959-60 crop year probably will be about 510,000,000 bushels, a drop of about 100,000,000 bushels from July 31, 1958.

All of the decrease will come in farm-stored grain which totalled 204,000,000 bushels at the end of the 1957-58 crop year. The reduction will be due partly to a smaller crop in 1958 than in 1957 and increased livestock feeding on western farms, factors which offset the decrease in exports.

The spokesman said that this could have been a "great" year for the grain trade if it were not for factors such as the Longshoremen's strike last fall on the Pacific coast and confusion in the Great Lakes shipping caused by the St. Lawrence Seaway opening.

As it is, the year ended July 31 will be classed as a good one, he said.

Exports of wheat up to July 9 had reached 275,000,000 bushels. Exports for the whole of the 1957-58 year totalled 316,000,000 bushels. The target for this year was set lower because Canada did not have the same supplies of low-grade wheat to meet the demand of European countries such as the Netherlands, whose purchases have dropped sharply from 1957-58.

Commercial stocks of wheat in elevators at the end of this year are expected to be about the same as the near-capacity 411,000,000 bushels in store July 31, 1958. Oats may be down a little from last year's 47,000,000 bushel total but barley may be up slightly from last year's 60,800,000 bushels.

The wheat board spokesman said commercial stocks could be the highest since 1941-42 when there was 46,000,000 bushels including temporary storage at the Lakehead.

Fidel Castro Has Resigned

By HAROLD K. MILKS
HAVANA (AP) — Fidel Castro resigned as prime minister of Cuba Friday night, accusing President Manuel Urrutia of "an attitude bordering on treason."

He also accused the president, a former judge he personally put in office earlier this year, of "immobility and of failing to discharge his duties."

This in turn, Castro told a television audience, has created "discrepancies of moral order."

He did not immediately elaborate.

This is the second time within the last two weeks that the bearded rebel leader has accused close associates of treason or near treason. The other was the case of former Cuban air force chief, Maj. Pedro Luis Diaz Lanz, who accused Castro of being a Communist.

Stratford Trip Nears For Island Students

Four Prince Edward Island high school students will leave Tuesday morning for Stratford, Ontario, where they will spend three days visiting the Stratford Shakespearean Festival in company with approximately 180 teenagers from all parts of Canada.

Chosen by a special committee through the recommendations of their teachers and school principals, the Island representation consists of Harry Callaghan, St. Dunstan's University, Brenda Large, Prince of Wales College, Janet Campbell, Montague High and Anne Ramsay, Kensington High.

Mr. Callaghan is a son of Mr. and Mrs. J. Pius Callaghan, 66 Bayfield St., Charlottetown; Miss Large is a daughter of Mr. and Mrs. Robert F. Large, 54 Fitzroy St., Charlottetown; Miss Campbell is a daughter of Leonard Campbell and the late Mrs. Campbell, Montague; and Miss Ramsay is a daughter of Mr. and Mrs. William Ramsay, Hamilton.

SPONSORED BY COUNCIL
Sponsored by the Canada Council, which is paying their travelling expenses, meals and accommodation, the students representing all 10 provinces, the Yukon and Northwest Territories, will spend part of Wednesday and all day Thursday and Friday seeing the festival from both the audience- and the backstage viewpoints.

Some of the students will travel miles to the railway that will bring them first to Toronto and then to Stratford. Some will even board the trains at wayside crossings where there is no normal stop. They will come from as far as Dawson City and as close as hand as Scarborough. All of them, it is hoped, will return to their homes with an appreciation of Southwestern Ontario hospitality.

Billeting was one of the major problems in setting up the programme for the visit since Stratford is already filled with tourists in the course of the normal festival season. The Festival accommodations office, however, has

Waitress Kills Golfing Pro.

WATERTOWN N.Y. (AP) — A shapely young waitress admitted Friday night, a site police reported, that she shot and killed a handsome young golf professional on the St. Lawrence University campus early in the day.

District Attorney Charles F. Bowers of St. Lawrence County said the woman, Miss Theresa de Francesco, 23, would be charged with first-degree murder.

The golf pro, Richard Smith, 27, was found shot to death in his car.

Thomson Control Said 80 Percent

TORONTO (CP)—Kenneth R. Thomson, president of Thomson Newspapers Limited, Friday disclosed that his father, Roy, controls 8 per cent of the new overseas company merging Kemsley newspapers, Scottish television and Scotsman publications.

"The new company formed in Edinburgh is called Thomson Scottish Associates Limited. The name Thomson will in due course be applied to the Kemsley newspapers."

In London after completing the merger, Roy Thomson placed a \$75,000,000 valuation on the United Kingdom property which comprises the newly-acquired Kemsley newspapers, the Scotsman

group with which he entered overseas newspaper operation and Scottish TV which he has been operating for almost two years.

Asked to place a value on the entire Thomson operation, in Canada and United States as well as in the United Kingdom, Kenneth Thomson said: "That would take a weekend of figuring but off-hand you could use \$100,000,000 and not be far wrong."

He said his father is expected to come to Canada perhaps later this month. He is entertaining the Canadian and British Medical Associations next Monday, July 20, at Parliament Hall, where the old Scottish Parliament used to meet.

POOCH ALMOST TRIPS QUEEN
This doleful canine almost trip B.C. during whistle-stop train cover. Prince Philip insisted Queen Elizabeth at L'Anse-au-Loup, ride between Kamloops and Vancouver. Same dog followed the train.
