

WOOL MARKETING

Wool will be received at the Reid warehouse at the foot of Prince Street, Charlottetown, after May 15th. Wool shipped by rail or truck should be carefully tagged and addressed to the Wool Grading Station, Charlottetown, "Freight Collect". Payment of freight by truck will be on the basis of rail rates only. Truckers must present a proper warehouse receipt before truckage will be paid. An advance payment will be made promptly on receipt of wool and a final payment as soon as wool is graded.

In shipping, each fleece should be tied separately with paper string and packed in old, but clean sacking. Use one large sack if at all possible, as this aids in checking. A number of old, clean sacks sewed together will suffice. Large sacks may be secured from the Sheep Breeders' Association, Charlottetown, for lots of over twelve fleeces. EACH SACK SHOULD BE TAGGED WITH THE NAME AND ADDRESS OF THE OWNER WRITTEN IN CLEAR LETTERING WITH INK, ONE TAG TO BE SECURELY ATTACHED TO THE OUTSIDE OF THE SACK AND ANOTHER PLACED ON THE INSIDE. No responsibility will be accepted for sacks without tags. A deduction of one cent per pound will be made for wool tied with binder twine or other unsatisfactory string. Shipping tags and proper paper twine are available at the Provincial Department of Agriculture free of charge.

It is in your interest to see that wool is properly prepared for market. Growers should

1. Remove all tags and dung locks before tying each fleece.
2. Any burry, chaffy, or straw portions of wool should also be removed and shipped separately.
3. Sheep should be shorn when dry, and wool should be stored in a place free from dampness.
4. If there are any black fleeces mark it on shipping tag.

All wool should be delivered between May 15th and July 15th. Do not sacrifice your wool and market it carelessly through unreliable sources. Market it through Canada's finest Co-operative Producer Association, the Canadian Co-operative Wool Growers, Limited, whose representative is the P. E. I. Sheep Breeders' Association. Do not forget that patrons selling wool through these Associations have always received the top of the market. Furthermore these Associations are working in your interests in supplying sheep producers with equipment, parasite remedies, and services at reduced prices. Some of these materials such as Phenothiazine for internal parasites and Cooper's sheep dip for external treatment are now being distributed at reduced rates at our Sheep Field Days, and direct from the Department of Agriculture. In addition the Association is doing everything possible in the purchase and distribution of rams to assist the industry.

Co-operate with your Association and support it by marketing your wool co-operatively this year. Remember we pay the freight and you get the most out of your product.

THE PRINCE EDWARD ISLAND SHEEP BREEDERS' ASSOCIATION, CHARLOTTETOWN.

Garden Topics

By GORDON LINDSAY SMITH

Continued from page 2

their gladiolus in rows in the vegetable garden. Then, they are more easily cultivated and dusted, and in most parts of Canada it is very necessary to dust or to ward off thrip.

Humus
One doesn't read much about gardening or listen to many talks before one is advised to use "well rotted manure". It sounds fine, but the trick for the city and suburban gardener is to get such a thing. Manure well rotted or otherwise is scarce. Undoubtedly it is the finest sort of fertilizer, but we have a very good substitute in humus. This is simply the refined and garden name we give to well rotted vegetable matter such as leaves, grass clippings, weeds and even clean garbage, like orange rinds, potato peelings, carrot tops, corn husks, etc. The experienced gardener never throws these in the garbage pail or incinerator. He piles these in a heap at the back of the garden behind some shrubbery, over each new layer he spreads some fine soil. Once in a while he will fork the pile over to mix thoroughly and he will wet thoroughly. The vegetable matter soon ferments and rots and the whole mixture becomes fine rich loam, which is a wonderful material to dig into any type of soil and especially heavy clay or light sand. If there is no place for a humus pile one can simply bury all this refuse directly in the garden. The old gardener will not throw anything away that will rot.

Cultivation

Destroying weeds is only one of the reasons for cultivation. The big gain is the improvement in the texture of the soil. Cultivation lets in air, breaks up the clay lumps, makes the soil more open, or as the experts say, more friable. Porous, loose soil will absorb and hold more moisture and will dry out much more slowly in dry weather.

Chemical Fertilizers

With manure scarce, gardeners have turned more and more to chemical fertilizers. These are clean, easy to use and powerful. They are made up of three main elements, nitrogen, phosphoric acid and potash, with the proportions of each expressed in formulas of three figures, thus 4-8-4. The first of these boosts the green growths above the ground and is especially valuable for lawns, lettuce, cabbage and other leafy vegetables. The phosphoric acid encourages the growth of starch and sugars, flowers and seeds. Potash balances the other two and helps maturity. When vegetables are stunted or misshapen it is usually a sure sign that the soil is deficient in potash. Commercial fertilizers should be used carefully according to directions and worked into the soil close to but not actually touching the plants or roots.

Next Week: Paths, Protection, New Homes and Gardens.

Past President Of Dairy Honoured

The officials and directors of the New Glasgow Creamery met at the home of their past president, Mr. Cecil Laird, on the evening of April 28, to honour him and to let him know in a small way, how much his valued services were appreciated. In the capacity of president, he had served faithfully and well for the past number of years.

Mr. Herbert Stevenson, president elect, capably presided, and called on Mr. Howard Ling, who read a fitting tribute, the composition of Mr. Vernon Hill, secretary of the association, while a presentation of a beautiful lazy-boy was made to Mr. Laird.

Mr. Laird, although overwhelmed with surprise, expressed his thanks and gave a short history of the New Glasgow Dairy, which started in a small way but today it has grown to one of the largest creameries, under the skillful work of Mr. Morton Larkins, who won the lowest count for yeast and mold as a provincial buttermaker. He is assisted by Mr. Harold Stevenson.

The retired directors as well as the wives of each and Mr. and Mrs. Carl Woolner were in attendance. The latter is a niece of Mr. Laird.

Speeches were given by a number of gentlemen. The ladies, assisted by the hostess, Miss Elsie Laird served beautiful eats which were enjoyed to the full. Then all departed for their respective homes, wishing Mr. Laird health and happiness, and as honorary president his wise counsel will often be sought.

South Rustico and Vicinity

Mr. and Mrs. Jack Wilson and Mrs. Abram Peters of Charlottetown motored to South Rustico and Brackley last week. Mrs. Peters has just returned from a two month's visit to friends in New York and Saint John, N.B.

Rev. Ronald McKenna of Ceylon, Sask., was a welcome visitor to South Rustico and vicinity recently. Father McKenna accompanied the remains of the late Rev. Jos. Walsh of Regina, Sask., to his former home in Elliotdale, P.E.I. His burial, Father McKenna who was for many years resident doctor of Oyster Bed Bridge where Father McKenna spent most of his boyhood days. Dr. McKenna now resides in Ceylon, Sask. On his return Father McKenna will visit his brother, Dr. Reginald McKenna and Mrs. McKenna of Moncton, N.B.

Mr. A. P. Gallant, merchant at South Rustico, has returned from a business trip to Saint John, N.B.

IN MEMORIAM

MR. WILLIAM STORDY
There passed peacefully away at his home in Westmoreland on Thursday, April 15th, 1952, William Stordy at the advanced age of 79 years.

Although suffering from heart ailment for several years it was only a week before his death that he was confined to his bed.

The deceased was born at Tryon and was the son of the late George and Margaret (Rogerson) Stordy. Besides his widow, the former Leona Gamble, there are left to cherish his memory one son George at home, two sisters, Mae, Mrs. Frank Robblee, Tryon, Grace, Crapaud and two brothers Ernest and Roy, also of Crapaud, two brothers and three sisters predeceased him.

The funeral was held from his late residence on Thursday the service being conducted at the house and grave by Rev. W. G. Killam.

The pall bearers were Messrs John Gamble, Orion Gamble, Kenneth Robblee, George Robblee, Hallett Rogerson, and James Moore. Interment was in the Crapaud Cemetery.

Card Of Thanks

The family of the late William Stordy wish to thank their friends and neighbors for cards, messages of sympathy and for their many acts of kindness shown to them during their recent sad bereavement.

MUSTARD
IS THE
Flavour Secret
OF THIS DELICIOUS
Mayonnaise Dressing

Into the well-beaten yolks of 2 eggs stir:

- 2 teaspoon Colman's Mustard
- 1 teaspoon salt
- 1 teaspoon powdered sugar
- 2 tablespoon lemon juice
- 1/2 to 2 cups salad oil

Add oil gradually while beating. If mixture thickens too quickly, add little more lemon juice than remainder of oil.

PORT RADIUM
NORTHWEST TERRITORIES

THIS SAFE, together with everything from bank notes to pen nibs, was recently flown from Edmonton, 1100 miles due north to Port Radium, on the fringe of the Arctic circle. It is part of the equipment for a new branch of The Royal Bank of Canada, just opened to serve the men who work one of the world's greatest known deposits of uranium, on the shores of Great Bear Lake. This is the "farthest-north" bank in Canada.

Up B.C.'s rugged coast a giant new aluminum development is taking form. Since last November we have operated a branch at Kemano, site of the power house. Three sub-branches have since been opened to serve other construction crews at isolated inland points in the area.

Up north at Churchill on Hudson Bay — at the international airports of Goose Bay (Labrador), Gander (Newfoundland) and Montreal's Dorval — the Royal Bank brings modern banking services to military and civilian personnel, and to airlines and air travellers from every corner of the globe.

Pioneer camps and towns are springing up in areas of Canada which a few years ago were known only to trappers and prospectors. The Royal Bank of Canada carries on business in many of these isolated communities. Whenever and wherever the need arises, the Royal Bank heads north with the men who are establishing Canada's new frontiers.
