Awarded first place with a won top honors in Class 223, Choral of 85, the New Glasgow, P. Reading, Church Schools, under Miss Helen Yeo at Notre Dame Convent Auditorium Friday morning.

Maine Right On Schedule In Moving Potato Crop

STATISTICAL ANALYSIS OF THE DISPOSITION OF THE 1956 PRODUCTION OF POTATOES IN MAINE. The Maine Potato Marketing Committee has reported that the 1956 potato crop is being marketed at a profit. The committee estimated that 915 carloads will move to market in April of this year. This compares very favorably with the 912 carloads shipped to the domestic market in April of 1956. "While we actually had a reported movement of 10,452 carloads accounted for over 1,000 carloads of April volume through April 15 the April estimate of the committee that a maximum of 60 per cent of remaining stocks could go to market is apparently well founded, as the certified seed deal is practically over. For the period from April 1 through April 15 Maine shipped 4734 carload equivalents, 3000 by rail and 834 by truck. After projecting shipments for the balance of the month on the basis of recorded commercial movement from April 16 through April 22, the committee estimated that 915 carloads will move to market in April of this year. This compares very favorably with the 912 carloads shipped to the domestic market in April of 1956. "While we actually had a reported movement of 10,452 carloads accounted for over 1,000 carloads of April volume through April 15 the April estimate of the committee that a maximum of 60 per cent of remaining stocks could go to market is apparently well founded, as the certified seed deal is practically over. For the period from April 1 through April 15 Maine shipped 4734 carload equivalents, 3000 by rail and 834 by truck. After projecting shipments for the balance of the month on the basis of recorded commercial movement from April 16 through April 22, the committee estimated that 915 carloads will move to market in April of this year. This compares very favorably with the 912 carloads shipped to the domestic market in April of 1956. "While we actually had a reported movement of 10,452 carloads accounted for over 1,000 carloads of April volume through April 15 the April estimate of the committee that a maximum of 60 per cent of remaining stocks could go to market is apparently well founded, as the certified seed deal is practically over. After projecting shipments for the balance of the month on the basis of recorded commercial movement from April 16 through April 22, the committee estimated that 915 carloads will move to market in April of this year. This compares very favorably with the 912 carloads shipped to the domestic market in April of 1956. "While we actually had a reported movement of 10,452 carloads accounted for over 1,000 carloads of April volume through April 15 the April estimate of the committee that a maximum of 60 per cent of remaining stocks could go to market is apparently well founded, as the certified seed deal is practically over. For the period from April 1 through April 15 Maine shipped 4734 carload equivalents, 3000 by rail and 834 by truck. After projecting shipments for the balance of the month on the basis of recorded commercial movement from April 16 through April 22, the committee estimated that 915 carloads will move to market in April of this year.
