### How To Choose The Right Tire

Tires are now quality graded on the basis that new car original equipment tires equal "100-LEVEL". This makes it easy for you to select the right tire for your job.

100-LEVEL—Same quality as used on new cars (1st time). Rayon cord construction.

120-LEVEL—"DuPont" Nylon Cord, strongest construction.

130-LEVEL—C-m (100,000 mile DuPont Nylon Cord Body) with natural rubber tread for greatest possible safety and long service.

90-LEVEL—Standard quality, somewhat lighter than original equipment.

80-LEVEL—Light Duty Economy Grade, for those wanting a new tire at the lowest possible price.

## NEW STORE HOURS
