DO NOT FAIL TO REMOVE ANY PROBABLE CAUSES OF FIRES

A North American home is destroyed by fire every two minutes.

These fires, most of them preventable, are responsible for about Sixty-Five Hundred deaths each year and almost one-third of the fatalities are children.

We emphasize the need for disposing of rubbish that accumulates in attics, closets, barns, basements, etc.

IN OUR OPINION THE CAUSE OF MANY FIRES OF UNKNOWN ORIGIN IS FAULTY FLUES WHICH HAVE NOT BEEN THOROUGHLY INSPECTED AND REPAIRED.

What makes these interior fires so much more tragic is the fact they could be so easily prevented.

We therefore make the following suggestions for the welfare of you and your children:

- 1. Inspect your flues for defects, semi-annually. 2. Do not smoke in bed. 3. Do not leave lighters or matches within reach of children.

The above information and advice is prepared by Prince Edward Island Mutual Fire Insurance Company with Head Office at Summerside and Branch Office at Charlottetown.
