Dredging Contract Let For Graham's Pond Project

OTTAWA — The Federal Public Works Department has awarded a contract for $32,930 to Maritime Dredging Ltd., of Charlottetown, for dredging two areas of Graham's Pond, P.E.I., John A. MacDonald, (P.C., Kings) disclosed Monday. Specified completion date for the project is March 15, 1959.

The two areas requiring dredging are the eastern and western ends of the pond which measure 500 feet by 370 feet and 260 feet respectively. Work involves the removal of about 37,000 cubic yards of silt, sand and clay.

"Due to lack of ice last winter," Mr. MacDonald pointed out, "Many of our fishing harbours silted up far more than usual. Graham's Pond harbors possibly more boats than any other in the province. It is hoped the dredging project to be carried out will provide a longer body of water within the harbors and thus greatly assist in keeping the run clear and in providing space for the boats of the many fishermen in the area."

Test Drug To Treat Diabetes

BOSTON (AP)—Testing of a new anti-diabetes drug taken by mouth, and used principally for older persons, was reported to the Massachusetts Medical Society Tuesday by Dr. Howard F. Root, diabetes authority at Boston's Joslin Clinic.

He said the pill, called chlorpropamide, seems most promising in treating the older patient whose diabetes is not acute and who is not suffering serious complications. In this respect, it resembles orinase, the only real anti-diabetic compound now on the market.

The mysteries of Easter Island!

Thor Heyerdahl of Kon-Tiki fame has been probing into the past of Easter Island. For centuries scholars have been puzzled by the huge sun-god statues that dot this Pacific island. How did the primitive natives hew these stone giants—some of them up to 69 feet in height and 100 tons in weight? There was no metal for tools, no apparent method of transportation. The story was lost in the mists of time, for suddenly around A.D. 1500 this Inca-like cult stopped its eerie carving ritual and disappeared.

Read Thor Heyerdahl's explanation of these strange facts in the Star Weekly.
