

**Walter Baker & Co. Limited.**  
The Largest Manufacturers of  
**PURE, HIGH GRADE  
COCOAS AND CHOCOLATES**  
in this country. Have received  
**HIGHEST AWARDS**  
at the  
**Industrial and Food  
EXPOSITIONS  
IN EUROPE AND AMERICA.**

**Caution:** In view of the many imitations of the labels and wrappers on our products, consumers should be careful to purchase only those pieces of material, in printed on each package.

**SOLD BY GROCERS EVERYWHERE.**

WALTER BAKER & CO. LTD., DORCHESTER, MASS.

**WOOD'S PHOSPHORINE.**  
The Great English Remedy.  
Six packages contained to promptly and permanently cure all forms of Nervous Weakness, Rheumatism, Spasmodic, Indigestion, and all effects of Abuse or Excess, such as Headache, Dizziness, and all other ailments of the system. It is the only reliable and honest medicine. Ask Druggists for Wood's Phosphorine; if he offers some worthless medicine in place of this, include price in letter, and we will send by return mail. Price, one package, 25c; six, \$1.50. One will please, six will cure. Send to any address.

The W. L. Duggan, Ltd.,  
10, St. James Street, S. E.,  
London, England.

Sold in Charlottetown by Geo. E. Hughes  
Druggist. Orders are promptly filled.

**DR. J. C. HUGHES' KIDNEY PILLS.**  
CURE  
CONSTIPATION,  
BILIOUSNESS,  
DYSPEPSIA,  
SICK HEADACHE,  
REGULATE THE LIVER.

ONE FILL THE DODDS MEAT CO. LTD.  
100, QUEEN STREET, W. TORONTO.

**Mortgage Sale.**

To be sold by Public Auction, at the Court House in Charlottetown, in Queen's County on WEDNESDAY, the fourth day of September, A. D. 1895, at the hour of twelve o'clock, noon.

All that tract, piece or parcel of land situate, lying and being in the City of Charlottetown, in Queen's County, Province of Prince Edward Island, bounded as follows, that is to say—Being the lot numbered Eighty, in the Fourth Hundred of Town Lots in Charlottetown, having a front of forty-two feet on Fitzroy Street, bounded on the east by Town Lot eighty-one, on the north by Fitzroy Street, and on the west by Hillborough Street, together with all buildings and improvements thereon.

Also—All that other tract, piece or parcel of land situate, lying and being in Charlottetown aforesaid, and being part of Town Lot Number Eighty-one in the Fourth Hundred of Town Lots in Charlottetown aforesaid, bounded as follows, that is to say—On the north by Fitzroy Street, on the east by Hillborough Street, on the south by that part of the said Town Lot purchased by James Hays, and on the west by Town Lot Number Eighty, and measuring eighty-four feet on Fitzroy Street and thirty-six feet on Hillborough Street, together with all buildings and improvements thereon.

For further particulars apply at the office of Thomas Campbell, Solicitor in Charlottetown, at this office on July 24, A. D. 1895.

THOMAS CAMPBELL,  
July 20—law (2) Mortgagee.

**PUTTNER'S EMULSION**

**WILL RESTORE  
Pale, Weak and Emaciated  
CHILDREN**

to a normal condition of HEALTH and STRENGTH, and bring back the BLOOD OF YOUTH more quickly than any other medicine.

**As a Flesh Restorer,**  
Puttner's Emulsion has no equal, giving substance and tone to the wasted muscles.

All Druggists keep it. Price 50 cents per bottle.

**Farm for Sale.**

Within one mile of St. George's Cheese Factory, four miles from Carleton Place. Convenient to mills, schoolhouses and churches. This farm contains 100 acres of good land, one-half in good condition, the remainder easily cleared. Part well wooded—comfortable buildings. Will be sold cheap. For particulars apply to

P. GAIN,  
New Perth, July 29—way 3.

**THE MEN OF MARS.**

As we all know, a very large man is much more unwieldy than a very small one. An elephant refuses to hop like a flea; not because he considers it ungracious to do so, but simply because he cannot take the step. If we could, we should all jump straight across the street, instead of painfully padding through the mud. Our inability to do so depends partly on the size of the earth, and partly on the size of our own bodies, but not at all on what is at first seems entirely to depend on the size of the street.

To see this, let us consider the very simple case, that of standing erect. To this every-day feat opposes itself the weight of the body simply, a thing of three dimensions, height, breadth and thickness, while the ability to accomplish it resides in the cross section of the neck of the knee, a thing of only two dimensions, breadth and thickness. Consequently, a person half as large again as another has about twice the supporting capacity of that other, but about three times as much to support. Standing, therefore, three times as tall, he would be able to stand at all, but would have to lie down. You shall see the same effect in quite inanimate objects. Take two cylinders of paraffin wax, one made into an ordinary candle, the other into a gigantic facsimile of one, and then stand both upon their bases. To the small one nothing happens. The big one, however, begins to settle, the base actually made viscid by the pressure of the weight above.

Now apply this principle to a possible inhabitant of Mars, and suppose him to be constructed three times as large as a human being in every dimension. If he were on earth, he would weigh 27 times as much as a human being, but on the surface of Mars, since gravity there is only about one-third of what it is here, he would weigh but nine times as much. The cross-section of his muscles would be nine times as great. Therefore the ratio of his supporting power to the weight he must support would be the same as ours. Consequently, he would be able to stand with no more fatigue than we experience. Now consider the work he might be able to do. His muscles, in the length, breadth and thickness, would all be 27 times as effective as ours. He would perform 27 times as much work, and could accomplish 27 times as much as we could. He would further work upon what required, owing to decreased gravity, but one-third the effort to overcome. His effective force, therefore, would be 81 times as great as ours, whether in digging canals or in other bodily occupation. As gravity on the surface of Mars is really a little more than one-third that at the surface of the earth, the true ratio is not 81, but about 90; that is, a Martian would be, physically, 10-fold more efficient than a man.

As the reader will observe, there is nothing particularly about this deduction whatever. It expresses an abstract ratio of physical capabilities, which must exist between the two planets, quite irrespective of whether there be denizens on either, or how other conditions may further affect their forms.

Let us now apply this principle to a possible inhabitant of Mars, and suppose him to be constructed three times as large as a human being in every dimension. If he were on earth, he would weigh 27 times as much as a human being, but on the surface of Mars, since gravity there is only about one-third of what it is here, he would weigh but nine times as much. The cross-section of his muscles would be nine times as great. Therefore the ratio of his supporting power to the weight he must support would be the same as ours. Consequently, he would be able to stand with no more fatigue than we experience. Now consider the work he might be able to do. His muscles, in the length, breadth and thickness, would all be 27 times as effective as ours. He would perform 27 times as much work, and could accomplish 27 times as much as we could. He would further work upon what required, owing to decreased gravity, but one-third the effort to overcome. His effective force, therefore, would be 81 times as great as ours, whether in digging canals or in other bodily occupation. As gravity on the surface of Mars is really a little more than one-third that at the surface of the earth, the true ratio is not 81, but about 90; that is, a Martian would be, physically, 10-fold more efficient than a man.

As the reader will observe, there is nothing particularly about this deduction whatever. It expresses an abstract ratio of physical capabilities, which must exist between the two planets, quite irrespective of whether there be denizens on either, or how other conditions may further affect their forms.

Let us now apply this principle to a possible inhabitant of Mars, and suppose him to be constructed three times as large as a human being in every dimension. It expresses an abstract ratio of physical capabilities, which must exist between the two planets, quite irrespective of whether there be denizens on either, or how other conditions may further affect their forms.

**HEART-BEATS.**

The Reason Why the Heart Flutters, Palpitates, and is Oppressed, and How to Relieve it.

The heart has a hard old time of it and within itself does not excite much sympathy, but is very often called upon to display the troubling symptoms of palpitation, fluttering, labored breathing, oppression, etc., on account of diseased Kidneys offering increased resistance to the passage of the blood through their defective secretory structures, causing a morbid change in the blood unsuited to the minute arteries resist the passage of this foul blood, resulting in the muscular walls of the arteries and the ventricle of the heart becoming partially paralyzed, and from this cause results much of the so-called heart disease, which is owing to wasting Kidneys not being able to perform their functions. In order to relieve heart trouble remove the cause in the Kidneys with Chase's Kidney-Liver Pills. They relieve the blood of poisonous deposits, it goes on its way a stream of health, relieving the heart and imparting strength to every tissue of the body. When your heart is in trouble Chase's Pills quickly remove the causing condition, the big one, however, begins to settle, the base actually made viscid by the pressure of the weight above.

Now apply this principle to a possible inhabitant of Mars, and suppose him to be constructed three times as large as a human being in every dimension. If he were on earth, he would weigh 27 times as much as a human being, but on the surface of Mars, since gravity there is only about one-third of what it is here, he would weigh but nine times as much. The cross-section of his muscles would be nine times as great. Therefore the ratio of his supporting power to the weight he must support would be the same as ours. Consequently, he would be able to stand with no more fatigue than we experience. Now consider the work he might be able to do. His muscles, in the length, breadth and thickness, would all be 27 times as effective as ours. He would perform 27 times as much work, and could accomplish 27 times as much as we could. He would further work upon what required, owing to decreased gravity, but one-third the effort to overcome. His effective force, therefore, would be 81 times as great as ours, whether in digging canals or in other bodily occupation. As gravity on the surface of Mars is really a little more than one-third that at the surface of the earth, the true ratio is not 81, but about 90; that is, a Martian would be, physically, 10-fold more efficient than a man.

As the reader will observe, there is nothing particularly about this deduction whatever. **FORCE OF HABIT.**

London People Have Become USED TO The Great Specific Remedy.

LONDON, Aug. 19.—The despatch from Detroit with reference to the cure from Bright's disease and blood poisoning of Mr. Langley, of this city, by the use of Dr. H. K. Langley's Kidney Pills, has recalled the wonderful facts of the case to the citizens, among Mr. Langley is well known. It has reminded them that Mrs. Langley among others also made an equally wonderful recovery. The use of the pills however has become so universal here, and there have been so many instances in which they have been used with beneficial results that a similar case would hardly excite as much interest now as it did then when the medicine was less known.

The Children's Enemy.

Scrofula often shows itself in early life, and is characterized by swelling, abscesses, hip disease, etc. Consumption is scrofula of the lungs. In this class of diseases Scott's Emulsion is unquestionably the most reliable medicine.

For Over Fifty Years.

AN OLD AND WELL TRIED REMEDY.

Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays the pain, cures the colic, and is the best remedy for Diarrhoea. Is pleasant to the taste. Sold by Druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.—m. w. f. wily—1 y

**The Mutual Reserve Fund Life Association of New York**

Had a larger business in Canada in 1894 than any other Company.

Since its organization in 1851 has paid its policy holder for death claims over a twenty-two million dollars.

Is now paying at the rate of over a quarter of a million each month.

Has 90,000 policies, and \$200,000,000 of Insurance in force, attest the popularity of the Company, its system and the confidence of the public.

IT IS THE PEOPLE'S INSURANCE, and is sold at about half the rates charged by old system companies. During the first 12 months of 1895 it was thoroughly examined by the Insurance Departments of New York, Illinois, Ohio, Texas and South Dakota, and pronounced to be sound to the very foundation.

For rates and other particulars apply to
