

THE 4-H CAVALCADE PAUSES ON THE CABOT TRAIL

MODEL OF THE FIRST PLANE IN EMPIRE

Eight P.E.I. 4-H Calf Clubs Motor Around The Cabot Trail

Approximately 42 members of eight P.E.I. 4-H Calf Clubs returned this week from a tour of the Cabot Trail in Cape Breton Island.

The group, headed by Keith Clay, Director of the 4-H Calf Club for P.E.I., left Friday in nine motor cars, some by way of Borden and some by Wood Islands, and returned home Sunday evening.

During the trip around the 150 mile Cabot Trail they visited many historic sites including the home of Dr. Alexander Graham Bell and an historical museum outside of Baddeck.

Those making the trip were: Kensington Club: Sharon Clark, David Clark, Douglas Johnson, Edwin Johnson, Murry Mayhew with Ross Woodside driving.

Cape Wolfe Club: Adele Shaw, Verna MacWilliams, Garfield MacMillan, Wayne Locke, Joan Bulger with Mr. Shaw driving.

O'Leary Club: Sheldon McLean, Gerald McIsaac, Ellen Smallman, Elaine Palmer, Eric Phillips with Thern Ellis driving.

Malpeque Club: Carol Pickering, Joan Cruthers, Clair MacNutt, Roger Cousins, Robert Bryant with Everett Donald driving.

Bedouque Club: Joop Plomp, James McCardle, Carl Wright, Mary McCardle, Elaine Green, with Keith Clay driving.

Freetown Club: Douglas Proffitt, Thane Bernard, Wilton Gardner, with Allan Palmer driving.

Brackley Point had two clubs: Howard McKay, Norma McKay, Myrna Docherty, Ruth MacCallum, Isabel MacCallum with Dave MacLean driving and Myron Ford, Stanley Skeffington, Sterling Mac-

Sawn Lumber Production Drops

OTTAWA (CP)—Canadian production of sawn lumber and ties decreased to 694,502,000 board feet during March from 730,372,000 in the corresponding period last year.

Production for the first quarter of the year dropped to 1,926,574,000 board feet from 1,986,865,000 in 1955, the bureau of statistics reported Tuesday.

Only three provinces showed increased production in the first quarter over last year. They were New Brunswick where production rose to 82,474,000 board feet from 70,101,000; Quebec, 204,530,000 from 189,039,000; and Ontario, 103,655,000 from 91,281,000.

Urges Major Precautions To Meet Radiation Threat

WASHINGTON (AP)—Major precautions to meet the threat caused by increased exposure to radiation in this atomic age were recommended Tuesday by the U.S. National Academy of Sciences.

It warned that radiation from any source—atomic reactors, x-rays or natural environment—is "often harmful" to life.

Stressing possible widespread danger to generations yet unborn unless control of radiation is assured, the academy called for these steps as heretofore precautions:

1. Establishment of a national system for keeping a record of every American's exposure to radiation from any source throughout his whole lifetime.
2. Limiting the amount of man-made radiation reaching people's reproductive organs. The limitation would be on the amount beyond that encountered naturally from cosmic rays and radioactive deposits in the earth.

The academy called for step No. 2 to be undertaken "by whatever controls may prove necessary."

The academy gave its initial findings from a year-long and continuing study of the effects of atomic radiation on man and his environment. It said that so far, tests of atomic weapons have presented a smaller genetic hazard than have medical uses of radiation such as x-ray.

And the group's 62,000-word report declared that as yet there is no hazard to present generations from potentially cancer-producing radioactive strontium in test bomb "fall-out."

But, in both instances, the academy warned that any intensified testing of weapons beyond the present rate would increase the genetic hazard, and might bring the strontium hazard to the critical point throughout the world.

The academy stressed that any amount of radiation, however small is potentially hazardous from the genetic, or hereditary standpoint. It said the problem is to assure that world-wide exposures are kept below a level that might affect the whole.

Declaring that when a world-wide atomic power industry becomes fully developed, its accumulated radioactive waste products "may represent more radiation than would be released in an atomic war."

"In a few decades . . . radioactive waste products from atomic power plants will represent an enormous potential source of contamination (of the environment.)"

"How much of this radioactivity will actually reach the population depends on how successfully it can be kept out of the great network—ocean and air currents, food and water supplies—which connect man to his surroundings."

FOOD CONTAMINATED

The report said "radiation from fall-out inevitably contaminates man's food supply."

"At present the contamination is negligible. But the maximum tolerable level is not known. There is not nearly enough information about the long-term biological effects on man or animals from eating radiation-contaminated food. Research in this area is urgently needed."

Among other major recommendations in the report, which was prepared by 100 of the top U.S. scientists and approved by the academy as a whole:

1. Further improvement in techniques for monitoring world-wide fallout.
2. Establishment of a national agency to "control and keep records of all dumping of radioactive material in the ocean."
3. Establishment by an international body of "safe standards for the marine and air disposal of radioactive materials as soon as pos-

Contract Signed At Corner Brook

CORNER BROOK, Nfld. (CP)—A new two-year contract called "the best this year in Canada" by union leaders has been signed between Bowaters Newfoundland Pulp and Paper Mills, Ltd., and four mill unions.

The unions received an across the board increase of 12 cents an hour effective June 1 and an automatic five per cent general increase effective June 1, 1957. The new basic rate of laborers is \$1.65.

The midnight-to-8 a.m. shift differential was increased from six to eight cents and the 4 p.m.-to-midnight shift will get five cents in-

stead of the present four. Fringe benefits include an additional floating holiday and automatic payment by the company of pension and group insurance premiums for workers on extended sick leave.

Unions involved are Local 64, International Brotherhood of Pulp Sulphite and Paper Mill Workers; Local 242, International Brotherhood of Papermakers; Local 1567, International Association of Machinists; and Local 404, International Brotherhood of Electrical Workers. All are AFL-CLC affiliates.

ATOMIC BLAST

The British atomic test explosion at the Monte Bello islands in 1956 was heard 235 miles away on the Australian mainland.

65 Rounded Up In Probe Of Boy's Slaying

MONTREAL (CP)—Provincial police Tuesday rounded up 65 carnival workers in Montreal North and took them to headquarters for questioning in connection with the slaying of nine-year-old Robert Jones, whose battered body was found Sunday in a clump of bushes in the Montreal North area.

The 65 carnival men were held on a corner's warrant.

Detective-Lieut. Ubald Legault, head of the provincial police homicide squad said the carnival was preparing to move to Thetford Mines, Que., and the wholesale roundup was made because some of the workers may become scattered.

Police action came shortly after a coroner's inquest had opened formally and then adjourned.

Police, meanwhile, continued to hold Jack Kaminsky, 43, as a material witness into the boy's death while they checked his alibi. Kaminsky, Russian born balloon hawker, surrendered to police Monday after hearing, he said, that he was wanted for questioning.

3 WEEKEND SLAYINGS

The Jones lad disappeared Friday, telling his parents he was going to sell balloons for a man at the carnival.

The inquest was the third of the day in connection with Montreal's three week-end slayings.

Paul Machabee, 30-year-old accountant, was arraigned on a murder charge, accused of the hammer-and-knife slaying early Monday of 23-year-old Aldea Levesque whose nude body was found in her apartment.

Earlier a coroner's jury found Machabee criminally responsible for the woman's death.

Another coroner's court jury found Gerald Arkinson, 16, of Suburban Ville Lasalle criminally responsible for the death Sunday of 14-year-old Yvon Lafrance, who was pushed or thrown into the St. Lawrence river.

Church Urges Increase For Old Age Pensioners

TORONTO (CP)—The Presbyterian Church Tuesday night approved a resolution calling for more government aid to old age pensioners despite the protests of one minister who said venturing into politics is a "monstrous thing which goes against all the traditions of the church."

Heard verbal exchanges were caused by the resolution at the church's 82nd general assembly.

Rev. Frank S. Morley of Calgary was one of the most outspoken delegates against the resolution. He said: "I object very strongly to this excursion into political life. This is a monstrous thing our Presbyterian church has brought in and it goes against all the traditions of our church."

"It seems to be a very doubtful thing that the best way of helping the aged is by a pension alone. Here is a church sliding out of its responsibilities by saying to the government 'Take care of these people.'"

Dr. Morley recommended establishment of church homes and more personal assistance for pensioners.

Rev. J. S. McBride of Montreal commented: "The Presbyterian Church isn't in any position to go into the business of caring for the aged. It's a far bigger thing than this church can handle. It's a matter for the government."

WEEK-END EXTRA SPECIALS AT SHAMA'S

- GRAPEFRUIT JUICE, 48 oz. 29c
 - APPLE JUICE, 48 oz. . . . 27c
 - PREM, tin 35c
 - YORK CORN, 20 oz., 2 tins 37c
 - YORK PEACHES, 20 oz., 2 tins 51c
 - PERFECTION MILK, 6 tins 79c

What a wonderful gift for your family . . . and yourself!

A New Brownie Movie Camera by Kodak . . . only \$36.95!

Imagine being able to take home a real Kodak movie camera for only \$36.95! It's a handsome, rugged, precision-built camera with a fast f/2.7 lens—at the lowest price in Brownie movie history! A camera that makes beautiful color movies of family fun—indoors and out—on inexpensive 8mm Kodachrome film!

And this new camera is so easy to use, it's almost impossible to miss getting good movies right from the start. Make one setting—a simple guide on the camera tells how. Then aim and shoot. It's just about as easy as the box Brownie you grew up with!

Start this weekend to save the good times in action and full color. See the new Brownie Movie Camera at your near-by Kodak dealer's. Ask him about small down payments, easy terms.

Another great new Brownie Movie Camera brings you

3-lens range at a 1-lens price!

It's Kodak's new Brownie Movie Camera, Turret £/L9

This exciting new camera gives you all three movie views—regular, wide-angle and telephoto—plus the ease and simplicity you expect in a Brownie. Just flip the handy revolving turret to the range you want . . . and shoot. You get the versatility of cameras costing many dollars more. Most Kodak dealers offer convenient terms—complete with all three lenses.

\$98.25

If it's made by Kodak, you know it's good!

Canadian Kodak Co., Limited
Toronto 9, Ontario

Comments On Cancer Causes

QUEBEC (CP)—A French doctor who specializes in the treatment of cancer says "alcohol as well as dust and gas in the air may be responsible for lung and other forms of cancer."

Dr. Antoine Lacassagne, director of the Radium Institute of the Pasteur Institute in Paris, is one of the French delegates attending the Canadian Medical Association annual meeting here.

In an interview, Dr. Lacassagne said lung cancer and leukemia (cancer of the blood) are on the increase in Europe as well as America.

He said he does not think cigaret smoking is the "sole" cause of cancer of the lung. Lung cancer is caused in general "by products of combustion," he said.

"It is quite possible that large amounts of alcohol contribute to lung and other forms of cancer," he added.

Radio-active material was also a cause. There was a danger that the expansion of uranium mining could lead to a further upsurge in cancer of the lung within 10 years.

Three Killed By Terrorist Mine

NICOSIA, Cyprus (Reuters)—Three British servicemen were killed and seven others injured when a terrorist mine was electrically detonated in a village near Limassol Tuesday night.

The men were travelling in a military vehicle near Berengaris a garrison village on the outskirts of Limassol.

Two Greek Cypriots passing by on a motorcycle also were injured.

BARGAIN OFFER!

6 PIECE FOOD SAVER SET

only **75¢** when you buy Swift's Premium Canned Meats

regular \$1.50 value

Each container holds a full 16 oz.

A must for your kitchen . . . handy for picnics too!

Today, buy delicious Prem, Swift's famous canned Ham, savoury Beef Stew or any of the many other top quality Swift's Premium Canned Meats—ideal for meals-in-a-minute, and unexpected guests. Then clip off the label or last inch of keystrip and send for your bargain food saver set!

SWIFT'S PREMIUM CANNED MEATS

SWIFT'S PREMIUM CANNED MEATS, FOOD SAVER SET, BOX 1575, TORONTO, ONT.

Please send me a 6 piece food saver set. I enclose 75¢ in cash or money order, and one label or the last inch of one keystrip from a tin of Swift's Premium Canned Meats.
