Former Minister And Organist At Trinity Sunday

Trinity Church next Sunday morning will be welcoming back not only one of its former ministers but a man who for years presided at the console of the organ. Rev. H. E. D. Ashford, D.D., will occupy the pulpit while Mr. W. E. Fletcher will play the organ and direct the choir.

Mr. Ashford is presently general Secretary of the Missionary and Maintenance Fund of the United Church of Canada with headquarters in Toronto. He was minister at Trinity from 1949 until 1951.

Mr. Fletcher was well known in Charlottetown musical circles while he occupied the position of organist and choir master here. In addition to his regular duties he composed several numbers. At the present time he is organist in a church in Lindsay, Ont.

FREMONT ARCHER LIFE KINSMAN

Fremont Archer, City, was a honored at a recent meeting of the Charlottetown Kinsmen Club. He was presented with a life membership by President S. B. Robison for his interest and work in all club activities. Mr. Archer is a past president of the club and was also on the national executive of association of Kinsmen Clubs.

Report Bones In Incinerator Were Not Human

DARTMOUTH, N.S. (CP)—Police investigating reports that a human body was seen among garbage at the town incinerator Thursday said that bones taken from the chamber were not human. Police raced to the scene when incinerator superintendent Lawrence Smith reported seeing what he thought was a body among garbage. Bones were later taken from the chamber and sent to the provincial pathological laboratory but a report from the lab Thursday night said they were not human.

All the residue from the furnace chamber was sifted by police after the first report was received.

their homes in Charlottetown after visiting in Point de Roch, guests of Mr. and Mrs. John D. MacGinnis.

Mr. and Mrs. Leon Zaleski, King's Park, New York, with their children Pamela and Brian are spending their vacation with Mrs. Zaleski's parents, Mr. and Mrs. Joseph Power.

Family Reunion After 46 Years

Allan McCabe, retired Captain of the Prince Edward Island Highlanders and one of the leading rifle shots in Canada, the proprietor of a grocery store on Great George Street in the City, was the host last night to a family reunion, the first in forty-six years. The 15 relatives, who hail all the way from Long Beach, California to Tracadie, Cross, P. E. I. arrived in the City Tuesday night.

Resolutions Feature Of W.I. Sessions Yesterday

Climaxing two days of vigorous activity interspersed with social diversions, the 43rd annual convention of P. E. Island Women's Institute terminated late yesterday afternoon with a visit to Mrs. Gordon MacMillan's Country Garden at Cornwall where followers in profusion and variety made a thrilling impression on ladies who know and love beauty in the garden.

At the morning session, presided over by Mrs. W. E. MacKinnon, Convenor of Health and Home Economics, F. W. I. C. the report of the committee on farm products and picnic nooks. A picnic nook does not necessarily mean a tourist attraction. Think of how nice it might be for mothers with small children and no family car. An outdoor meal at a nicely arranged picnic nook could be just as thrilling as a long drive to a famous park or beach.

The report, while favourably commenting on the general improvement observed in the surroundings of churches, homes and schools, went on to say "There is much that might be done by way of roadside improvements and picnic nooks. A picnic nook does not necessarily mean a tourist attraction. Think of how nice it might be for mothers with small children and no family car. An outdoor meal at a nicely arranged picnic nook could be just as thrilling as a long drive to a famous park or beach."

Mrs. Harold Laird, reporting on United Nations exchange programs admonished the members to learn about the United Nations and its specialized agencies, especially those which institute members have a special interest in "and so learn whether or not we as rural women are pulling our international weight in this fearful and wonderful world."

The report urged the various institutes to arrange for special programs on United Nations' Day Oct. 24.

Reporting on Home Economics, Mrs. MacGregor urged a greater consumption of farm products especially milk by the children. She was amazed at the number of farm school children's lunches which fail to carry milk as their drink. No other food contains so many factors that build good health," the report stated.

Mrs. William Alyward, publicity convener, urged the appointment of a press chairman in every Institute with a view to taking full advantage of the opportunity presented by the press for prompt coverage on important matters.

"I ask all Institutes to make more use of the press when space in our papers is so generously given free of charge."

HEALTH AND WELFARE Health and welfare was reported on by Mrs. Philip Matheson who described the importance of National Health Insurance meetings where it was developed that "on a National basis it would cost, for hospital care, medical care and diagnostic services approximately \$20 per person and that the Federal Government would pay 50 per cent of the cost up to a certain cost, and above that we would be on our own."

"There are so many preventive measures now to safeguard our children's health that they are very easy to ignore and do not avail themselves of the opportunity of having their children vaccinated and inoculated. It is the wrong, who do not believe in it, that are a menace to those who do."

Natural activities were dealt with by Mrs. Margaret Ramsay who said "Those of you who have programs which have as their guiding philosophy to help people to help themselves in their leisure time activities are playing a most important part in adult education."

She urged membership in music and drama groups and entries in the Provincial Drama Festival. The importance of group entries in handicraft at the Provincial Exhibition, the sponsoring of Red Cross swimming classes, drama, music and art by the schools and other activities were stressed.

"Never forget this inescapable fact: We may build schools and colleges until our sky lines are crowded with them.

"We may provide endowments and scholarships and salaries that will be the envy of the world. We may put the best resources of church and state alike behind our efforts to have the finest schools, the most skilled teachers, the last word in equipment.

"But if the education planning we begin and end acknowledging that the healing of the world's ills depends on a return to the home, to the responsibilities of the home on every level of

Law Relaxes For Visit In Unusual Case

NEWCASTLE, Eng. (AP)—Harold Mercer sat with tear-dimmed eyes at the bedside of his dying wife Sarah Thursday and talked of the future he knows she will never have.

Gray-haired Sarah, 49, patted his hand. "It's nice to see you again, love," she murmured.

She did not know that her husband, also 49, had been in jail on a charge of attempted murder—her murder. She did not know that behind the hospital door stood two warders from Durham jail, watching him. She did not know that behind the happy reunion lay the combined efforts of two members of Parliament, a petition by her neighbors—and the humanity of Leonard Newcombe, governor of the jail.

Mercer came to the hospital room there. He is awaiting trial Monday on charges of trying to kill his wife with 13 sleeping pills to relieve her suffering. She has cancer.

He also is accused of attempted suicide. He had pleaded guilty to the suicide charge, but not guilty of attempted murder.

Sarah knew nothing of this. She believed that her bricklayer husband had finally collapsed from the strain of nursing her for four years and that he had been in a hospital too.

The visit lasted an hour and 40 minutes. The minister came out. From a little wide window, his daughter, Connie, and her husband watched.

"He was crying with happiness," Connie said.

As Mercer drove back to his lonely prison cell, Sarah smiled through her tears. She said: "I'm so glad he's better."

Gives Report On Coal-Fired Gas Turbine

OTTAWA (CP) — Mines Minister Prudham said Thursday the experimental coal-fired gas turbine engine developed at McGill University now is undergoing test runs for efficiency and soon will be shown to private industry.

The minister, plotting his spending estimates through the Commons, asked another \$100,000 for the project this year. This will bring to \$650,000 the total expenditure on the project, begun in 1953.

Mr. Prudham said a decision on what will be done in the future on the project will depend on evaluation of results from its test runs. It was hoped that by the end of 1956 his department's fuels division could hold a symposium at which the new type locomotive would be shown to private industry.

The object was to build an engine that would compete with diesel power on the railroads and provide a market for Canadian coal.

STILL KINKS Clarie Gillis (CCF)—Cape Breton South cautioned that false hopes should not be raised about the

life. VISIT GOVERNMENT HOUSE Yesterday morning a courtesy visit was made to Government House by Mrs. Alice M. Berry, O. B. E., J. P., President of the Associated Country Women of the World, where she was graciously received by His Honour Lieut. Governor Prowse and Mrs. Prowse.

Mrs. Berry was accompanied by Mrs. Murdoch McGowan, President, Mrs. Allison MacMillan, Past President, Mrs. Julian Herring, Past President and Miss Virginia Matheson, Home Economics Student.

Tea was served during an enjoyable period of conversation.

SHAPE HEADQUARTERS REPORTS

Russia Increases Sub, And Air Force Strength

PARIS (Reuters)—Russia has increased her submarine forces and the Communist air forces have grown stronger in recent months despite professed reductions in armed forces, Atlantic Pact headquarters reported Thursday.

The report appraising latest east European strength said Russia and her satellites today have 4,500,000 men in ground forces, more than 1,000,000 in air forces and 500,000 in her navies. The report was released by the SHAPE headquarters of the North Atlantic Treaty Organization in Europe.

The Russian Army alone has 3,000,000 men, the report said. Russia could marshal 20,000 operational aircraft, many of 'jets' and the satellite countries 2,500. Russia now has 450 submarines, compared with 400 last year. NO EVIDENCE OF CUT

A SHAPE spokesman said of the recent Russian announcements of reductions in armed forces, "We have as yet no evidence of any reductions being carried out."

The report said that although the numerical strength of Soviet ground forces has remained constant since 1947 at 175 divisions, their mobility and fire power had increased through the introduction of improved weapons and equipment.

The satellites had doubled the number of their divisions since 1947, and now have 80. The report said: "The USSR has a ready-made spearhead for a rapid advance into western Europe." This was made up of 22 Soviet divisions now in East Germany, most of them armored, with a full complement of tanks and self-propelled guns.

The report said full credit has to be given the east European bloc for having developed a strong capability in atomic, chemical and biological warfare, as well as in the field of guided missiles. TO BUILD SMALL BASES

A senior NATO official meanwhile disclosed that the Atlantic Allies will build new simplified airfields less vulnerable to atomic attack and boost the number of their bases from 174 to 250.

U.S. Gen. Cortlandt Van R. Schuyler, chief of staff to the SHAPE, a former commander, made the disclosure at a correspondents meeting.

The present NATO fields—174 of which are to be in operation by Jan. 1—are designed to handle air force wing, about 75 planes. The newly designed "squadron type" field would handle about 25 planes.

About 10 kilometres (seven miles) from the new style field, the airman would be put up in tents. Workshops also would be in tents.

This is planned so that the personnel would be in less risk of injury if the airstrip were bombed. The smaller fields are to be scattered around the big bases to give the air force greater possibilities for dispersal.

Under excellent weather conditions, the Women's Auxiliary of the Canadian National Institute of the Blind, held the annual picnic for the blind yesterday in the National Park at Stanhope. Lending assistance to the women in carrying out the picnic program were Bill Reid and Bill Wainwright. The park authorities placed one of its largest shelters at the disposal of the Auxiliary, and a chartered bus transported most of those who attended to the Park. Others arrived in private cars. After the games and athletic events were over the eighteen blind people present, had an appetizing lunch in the open air. The very fine array of food was supplied by the women of the Auxiliary.

The athletic events and games started at three p.m. and were much enjoyed by the competitors. Lunch was served at five o'clock and at six the picnicers boarded the bus enroute to their homes. Winners of the athletic events were as follows:

Standing Broad Jump—John Pippy. Hop Step and Jump—John Pippy. Soft Ball Throw—Edgar Doucette. Shot Put—George Haines. Fifty Yard Dash—Phillip Bower. (2) Fifty Yard Dash—Peter MacGarry. Sixty foot minute race—Girls — Ida Alchorn. Sixty foot minute race—Men — Edgar Doucette.

Spool Game—Elizabeth Gallant and Edgar Doucette. Mrs. W.J.P. MacMillan, Charter Member and Past President of the Auxiliary and Mrs. S.G. Peppin, its President, presented the prizes. Other members of the organization assisting in the day's activities were: Mrs. Allan J. MacDonald, Mrs. J.S. Morris, Mrs. J.F. Morris, Mrs. A.J. Coffin, Mrs. H.F. MacPhee, Mrs. J.M. Garburn, Mrs. Dan MacDonald, Mrs. J.T. Rodd, Mrs. Gordon Webb, Mrs. A.W. Hyndman, Mrs. Wm. Teed, Mrs. J.P. Proude and Mrs. John E. Murley.

Mr. P.C. Bower, Field Secty for the C.N.I.B. for P.E.I. and his assistant Miss S. Ith took an active part in arranging the sports programme and also competed in the events. The co-operation of Mr. Browning, superintendent of the National Park was very helpful in making the day a success.

Earlier Mr. Howe tangled with A. M. Nicholson (CCF—Mackenzie) over the possibilities of increased grain shipments out of the northern Manitoba port of Churchill.

Mr. Nicholson maintained that if the present stepped-up storage were doubled, shipments also might be doubled to some 13,000,000 bushels a season. He said there are authorities who believe the port could be capable of shipping 50,000,000 a season.

Mr. Howe, who built the first elevator at Churchill long before he entered politics, said those authorities "are just nuts." He doubted whether the port could handle any substantial increase.

Under the agreement, Russia agreed to take a minimum of 400,000 tons of Canadian wheat annually for a three-year period. She would boost this to 500,000 tons if she made progress in selling goods in Canada. A ton contains 37 bushels of wheat.

Mr. Sharp, chief Canadian negotiator in the 1956 trade pact with Russia, was called before the committee to outline some of his impressions on Russian trade.

training in the field from the capable staff of Major J.M. Mulligan of Halifax.

In his speech of welcome Brig. Bennett reminded the future militia officers that they will get as much out of the program as they put into it. He emphasized the benefits to be gained from a sustained period of 24 hours a day soldiering.

He ended his address by pointing out that militia officer cadets are vitally important to the defence of the country and a most important point of contact between the army and civilian life.

possibilities of the turbine. He said illusions have been built on the assumption the new engine is interchangeable with diesel engines now being adopted by Canadian railways. It was not special locomotives would have to be built to use the turbine and the railways were not going to write off their huge new investment in diesels to make the switch.

There still were kinks in its development. The difficulty had been to find a cooling system to prevent the gas from burning off the turbine blades.

If it were ever perfected, it might be a good marine engine or thermal power plant for generating electricity. But it would be a long time before the railways would switch from their diesels.
