

The Need of Sleep.

Dr. Mains, in a recent lecture at Birmingham, said that the brain requires twelve hours of sleep at four years, gradually diminishing by hours and half-hours to ten hours at fourteen, and thence to eight hours when the body is full grown and formed.

The Congo Region.

Imagine an area about the size of the United States, rich in soil teeming with natural wealth, traversed in every direction by great navigable rivers, and sustaining a swarming population, and we get a faint idea of the importance of the Congo question.

To the Electors of the First District for the King's County for the Legislative Council.

GENTLEMEN.—At the earnest request of a number of you, I offer myself as a candidate to fill the vacancy in the Legislative Council, occasioned by the death of the late Lawrence Kirkham, Esq.

I solicit your suffrages on the present occasion in the interest of the Liberal Conservative party; although, if elected, I shall support the present Administration in such measures only as I consider to be for the good of the country. I will not promise to support the present or any other Government, unless I believe them to be administering the affairs of the Province so as to keep down the taxation, secure Provincial rights, and promote the general welfare of the people.

Owing to the bad state of the roads at this season of the year, it will, I fear, be impossible for me to make a personal canvass of the entire District; but I trust to be able to meet you at public meetings before the election, when I can more fully give you my views on questions affecting your interests. Respectfully soliciting your votes, I remain, gentlemen,

Your obedient servant, CHARLES McEACHEN, Bayfield, Lot 46, April 29, 1885.
