### Creamer President Backs Gov't Policy

John Simmonds, president of Central Creameries Ltd., Thursday hailed the provincial government's plan to offer for sale to Island producers at cost top quality bred heifers as "the most progressive step ever taken for Island dairying".

He said that at the present time many farmers could receive much greater returns for their efficient high production animals were introduced into their herd.

The announced program will allow producers to purchase, at reasonable cost, bred heifers from high production blood lines and therefore if properly fed will give them more return for the same money he said.

Commenting on the potential market for greater Island milk production he said that the Maritimes is very deficient in milk and that any increase will find a ready market. He urged all producers to take advantage of what he called "this sound and ambitious program".
