HORSESHOEING.

HAVING secured the services of MR. WILLIAM TUCKER, a native of this Island, who has had nine years' experience as a Horse-shoer in the United States, I am prepared to supply a long-felt want in this line. Mr. Tucker has reduced horse-shoeing to a science, and is prepared to perform all classes of work in a common-sense and scientific manner. I need not inform the intelligent horseowner that the gait of the horse and condition of the feet must be understood to weight a horse properly and to successfully operate thereon. Numerous patrons already admit the merits of the work performed, and recommend his system of shoeing.

Customers can always depend on prompt attention and entire satisfaction.

W. J. FRASER.

"Nothing Injurious."

Dr. Brown-Sequard's method is only a more rigid and elaborate form of a very well-known practice, viz. that of daily bathing in cool water. It will, no doubt, be useful if the person is not aged or weak. Such methods, however, seem after a time to lose their efficacy.—Medical Record.

The Purity of Mid-Atlantic Air

In the course of an address on the action of micro-organisms on surgical wounds, Prof. F. S. Dennis, of New York, states that during his last trip across the Atlantic he made some experiments to test the purity of the air about 1,000 miles of land. He employed capsules of sterilized gelatine, and exposed them for fifteen minutes. One capsule was exposed in the stateroom upon the main deck of the steamer. Within 18 hours over 500 points of infection had developed. Two capsules exposed in a similar manner in a cabin on the promenade deck, where the circulation of air was free, showed five or six points of infection ten days afterward. A capsule exposed over the bow of the ship was found to be entirely uncontaminated. These experiments are on the same lines as those of Pasteur and Tyndall upon the mountain air of Switzerland, and so far as they go, they show the germless condition of mid-oceanic air, and also the need for much more efficient ventilation in the staterooms of even the first-class American liners.—Lancet.

Contains Nothing Injurious.

Where There's Drink, There's Danger.

Write it on the liquor store,
Write it on the prison door,
Write it on the gunshop line,
Write, oh! write the faithful line,
Where there's drink there's danger.

Write it on the workhouse gate,
Write it on the schoolboy's slate,
Write it on the copybook
That the young may at it look,
Where there's drink there's danger.

Write it on the churchyard mound,
Where the drink slain dead are found,
Write it on the gallows high,
Write it for all passers by,
Where there's drink there's danger.

Write it underneath your feet,
Up and down the busy street,
Write it for the great and small,
In the mansion, cot and hall,
Where there's drink there's danger.

Write it on our ships which sail,
Borne along by steam and gale,
Write it in large letters plain,
O'er our land and past the main,
Where there's drink there's danger.

Write it in the Christian home
That sixty thousand drunkards roam,
Year by year from God and right,
Proving with resistless might
Where there's drink there's danger.

Write it deep on history's page,
Write it patriot, scholar, sage;
Write it in the Sunday School;
Write, ah! write the truthful rule,
Where there's drink there's danger.

Write it in the house of God,
Write it on the meeting sod,
Write it on the hill and glebe,
Write it with a blood-dipped pen
Where there's drink there's danger.

Write it on the rising youth,
Write it for the cause of truth,
Write it for our Fatherland,
Write, 'tis duty's stern command,
Where there's drink there's danger.

Write it for bright Heaven above,
Write it for the God of Love,
Write it near your own fireside,
Write it too for Christ who died,
Where there's drink there's danger.

How to Prevent a Cold.

Under this title Dr. Brown-Sequard makes a contribution to the Societe de Biologie which will be read with interest. Everybody catches cold more or less often, and nearly wishes to do so; hence Brown-Sequard's "method" ought to be popular. Under the name of a "cold" are included a number of acute catarrhal inflammations affecting the nasal, pharyngeal, laryngeal, tracheal, bronchial mucous membrane. In this country we even apply the term to acute affections of the middle ear, the stomach, intestines, or bladder. The cause of these so-called "colds" is the influence of cold, damp air upon sensitive portions of the body, producing thereby a disturbance of the vascular equilibrium. The result is a congestion which settles down, perhaps with the help of microbes, as the late Dr. Austin Flint believed, into an inflammation.

The most sensitive parts of the skin, according to Dr. Brown-Sequard, the catarrhal genic areas, are the neck and the feet. In order to prevent "colds," therefore, one has only to harden these areas and destroy their sensitiveness. This is done by daily allowing a stream of cool air, by means of an elastic bag, upon the neck, and by immersing the feet in cool water. The air is at first only slightly cool, but is each day made colder, until the neck can stand an Arctic blast with impunity. The feet are immersed in water which is at first at a temperature of about 90 degrees Fah., and this is gradually reduced to 38 degrees Fah.

Dr. Brown-Sequard's method is only a more rigid and elaborate form of a very well-known practice, viz. that of daily bathing in cool water. It will, no doubt, be useful if the person is not aged or weak. Such methods, however, seem after a time to lose their efficacy.—Medical Record.

The Purity of Mid-Atlantic Air

A Golden Nugget.

A COMFORTABLE LITTLE FORTUNE ALL IN ONE CHUNK.

There is at present on exhibition in Wells, Fargo & Co.'s bank at San Francisco a bit of auriferous rock that any individual might be glad to possess. It might be a little cumbersome as a "specimen" scarfpin, but when the wearer reflected that it was braced up to making the extra exertion. The nugget is one of the finest ever unearthed in California, both in size and richness. It is irregular in shape, and about the size of a regular Derby hat. That there is very light rock and a great deal of gold in it may be determined by its weight, which is 35 pounds troy. Quartz of this sort is usually valued at \$200 per pound, and, allowing the large margin of \$1,000 for rock, the nugget would be worth \$35,000. The exposed rock and great gobs of gold that hang out of its sides so as to nearly hide all other composition, and make it appear almost as melted metal, are not jagged or rough, but, on the contrary, are smooth and polished in a manner that only water is capable of. The proprietors of the nugget are Messrs. Hays & Stelleman, of Sierra City, and they have left it on exhibition before disposing of it. At the bank it attracts much attention, but the employes could furnish no information concerning it beyond that it came from Sierra County and near Sierra.—San Francisco Examiner.
