### A Wonderful Lightning Freak.

Glen Sutton, P. Q., was visited the other day by about the liveliest and most versatile streak of lightning we ever heard of. During a heavy shower there, the lightning struck a house owned, we believe, by a man named Larock, and occupied by a Mr. Odette. At the time of the shower Odette was sitting at the dinner table, and there were five or six persons besides in the house. The lightning struck the chimney first, tearing it away down to the first floor, and scattering the bricks and plaster in all directions; it disjoined all the rafters on one side of the roof, struck a clock in the room, tore the insides all out of it, melted the link connections of a watch-chain which hung, with the watch, under the clock, threw the watch into another room, knocked a saucer from Odette's hand, and burned a hole in the table cloth just in front of him, took a prop-stick from an upstairs window and carried it through a down-stairs room, tore a big stone out of a cellar wall and knocked a pork barrel into splinters, besides making itself conspicuous. Strange as it may seem, no one in the house was hurt, though Odette was considerably astonished; and the school teacher who was there at the time was so shocked that she fainted after the lightning had finished its capers and withdrawn. Altogether, it was a wonderful performance, such as occur seldom.

### American Ladies in London Society.

The marriage of the Marquis of Anglesey, on Saturday last, with Mrs. Wodehouse, was a surprise to every one, and not the least, I suspect, to the noble Marquis himself. It appears to have been a sudden thought, acted upon with great promptitude and dispatch on both sides. The new Marchioness of Anglesey is an American by birth, and as "Minnie King" was one of the brightest stars in the imperial Court at Paris. Subsequently, she married the Hon. Henry Wodehouse, brother of Earl Kimberley. He was in the diplomacy, and died of typhus fever at Athens. For some years after her widowhood Mrs. Wodehouse resided in London, and was highly popular; at one time it was currently reported she intended to make her home in "Jerusalem the Golden," but, fortunately for English society, she has elected to settle down as an English Marchioness, and she will, no doubt, be warmly welcomed on her return. The American element in high society has now received a powerful addition—already it was very predominant. Many of the handsomest and most popular among the leaders of fashion hail from the other side of the Atlantic. Viscountess Mandeville, Mrs. Arthur Paget, the Hon. Mrs. W. Carington, Lady Randolph Churchill, and now the Marchioness of Anglesey, form a galaxy difficult to match, both for looks and social charms. —London World.

The Roman Catholic hierarchy throughout the world comprises 7 patriarchs of the Latin and 5 of the Oriental rite; 139 Archbishops of the Latin and 26 of the Oriental rite, and 666 Bishops of the Latin and 50 of the Oriental rite. The Patriarchs are those of Constantinople, Alexandria, Antioch, Jerusalem, Venice, the West Indies and Lisbon, of the Latin rite; and Antioch (of the Melchites), Antioch (of the Maronites), Antioch (of the Syrians), Babylon (of the Chaldeans), and Cilicia (of the Armenians), of the Oriental rite. Of the archbishops 139 are of the Latin rite, of these 12 being immediately subject to the Holy See. Of the 26 archbishops of the Oriental rite, 3 (one each Armenian, Greco-Romanic and Greco-Ruthenian) have ecclesiastical provinces; of the remaining 23, who are under Oriental patriarch, 15 are Armenian, 4, Greco-Melchite and 4, Syrian, Syro-Maronite and Syro-Chaldaic. Of the bishops of the Latin rite, 6 have suburban sees; 84 are immediately subject to the Holy See, and 572 are in ecclesiastical Provinces. Of those of the Oriental rite, 12 are Armenian; 9 Greco-Melchite; 3 Greco-Romanic; 7 Greco-Ruthenian; 1 Greco-Bulgarian; 8, Syrian; 7, Syro-Chaldaic, and 3 Syro-Maronite. Besides the dignitaries above mentioned, there are 36 archbishops and 128 bishops in *partibus infidelium*. In addition to these, there are under the direction of the *Congregatio de propaganda fide* 107 vicariates, 5 delegations and 29 apostolic prefectures.

The Charlottetown, P. E. I., EXAMINER has published for the last few weeks the names of passengers who have returned by the Boston line of steamers to Prince Edward Island. The number returning largely exceeds for some weeks that of the passengers for the United States. Patriotic Islanders will doubtless extend a welcome to their fellow-provincials, but the Grit, Anti-Confederate, Annexationist organs, which have so energetically advocated an "exodus," will look upon their coming home as a "return to the flesh pots of Egypt." —Ottawa Citizen.

The Moncton, N. B., Times notices the return by the American boats of provincialists to St. John, and puts some very pertinent questions to the St. John Telegraph and Globe, as follows:—"It is a well known fact that the American boats from Boston to St. John are crowded with provincialists who are returning home, satisfied that they have no business away from the provinces, and are better off while in them. But why is it that the St. John Grit papers are not making a note of the fact? Why is it that the reporters of the Telegraph and Globe no longer haunt Reed's Point Wharf, nor scan the passenger lists of the City of Portland and the New York?" Has the enterprise of 'ye local' departed, or what is the reason?" —Ottawa Citizen.

### News Comments.

A preacher at Chicago advocates the introduction of lady ushers in church to make the young men attend.

It is now asserted that Dr. Hammond, of New York is egging Dr. Tanner on his forty-day fast. But what sort of a fast is it when run on Hammon' eggs?

The Herald gives a diagram of the house in which Dr. Tanner is performing his fast. It might leave one page blank to represent the condition of the doctor's stomach.

An international congress for the examination of questions relative to alcoholism will be held at Brussels, under the patronage of the King of the Belgians, from the 2nd to the 7th of August next.

THE NEWFOUNDLAND RAILWAY.—The Commissioners have appointed Messrs. Kiniple and Morris, of London and Greenock, engineers in chief of the road. They were engineers of the water works in St. John's, N. F., and of the graving dock works in Quebec and at Esquimaux, etc.

A TASTE FOR WATER.—The Toronto Mail says: There is an American lady in the city who dislikes Canadian water so much that she has caused two large casks filled with water from a well at her native place to be sent to her. They arrived at the Grand Trunk sheds a few days ago, and were forwarded to her address.

The Italians of the United States are making preparations for celebrating the anniversary of the occupation of Rome in September next in a manner worthy of the occasion. A notable and praiseworthy feature in it will be the institution of a fund for the relief of such Italian immigrants as may be temporarily in destitute circumstances.

Bell's Life is of opinion that in Trickett Hanlan will find his match all right, that the best on record over the Thames championship course will be reached, and a mark set for Englishmen to aim at. The Hanlan-Trickett race is a fixed event, and will take place from Putney to Mortlake on the Thames in November next.

It is rumored that the Duke of Argyll, Lord Privy Seal in the Gladstone Cabinet, proposes to follow Lord Landsdowne and Lord Listowel in resigning because of his opposition to the Compensation-for-disturbance bill. Perhaps Mr. Gladstone's amendment to that bill may be designed to prevent the Duke's resignation.

In London 68,400 women are employed as milliners and dressmakers, 26,375 as shirtmakers and seamstresses, 14,780 as tailoresses, 10,724 as machinists, 5,272 as book-binders, 4,609 as boot-makers, 4,300 as artificial florists, 3,718 as box-makers, 2,852 as upholstresses, not to mention a large number in various other industries.

Chicago has now a pork corner. Messrs. Armour & Co., of that town, have been operating on a grand scale, having bought, since last fall, well on to half a million barrels. The operators are likely to fare better than their brethren of the wheat corner, prices having gone up about thirty per cent. There ought to be some way of punishing heartless creators of artificial scarcity of the necessities of life.

POISON ON A PICNIC GROUND.—A number of the children attending the F. C. Portland Baptist Church picnic at the Day place, at the foot of Long Reach, on Tuesday last, were poisoned by the mercury weed, which grows in great quantities on the place, some of them having their heads or faces painfully swollen. Mr. George McBeath and his son, who assisted Mr. Day to clear the place for the picnic, were so badly poisoned by it as to necessitate medical attendance, Dr. Christie being the physician consulted. —St. John Sun.

The Prince Edward Island Government appears to be trying to do what it can for the improvement of farming. This is its best policy. Farming must ever, by all odds, be the little Island's great industry, and a splendid industry it is likely to become. The Island soil is easily cultivated, and much of it is of good quality. Then, the Island farmers have, in the mussel mud within their reach, an almost inexhaustible store of a rich fertilizing article. Some of these days the little Province will be the garden of North America. —St. John News.

How many thousand dollars was it that Mr. Forepaugh carried off, by means of his show, from Ottawa? It doesn't matter much for present purposes whether it was \$7,000 or \$10,000—the proprietor always minimizes the profit if he can, so as not to frighten people. But the point is this, are we so very poor after all, when we can afford to subsidize a circus to the tune of \$7,000 or \$10,000 and expenses, for two days show? Add the money spent on other entertainments during the summer, and say, are we poor at all? —Citizen.

HALLUCINATION.—Professor Maudsley remarks, in a recent lecture, that one striking feature observed by medical men who have had cases of hallucination under their charge, is that the patients cannot be convinced that the objects they see, the sounds they hear, and the smells they perceive, have no real existence, and that the sensations they receive are the result of their excited nerves; it frequently happens, too, that a person who suffers from hallucination in respect of one sense has the others unaffected, and is on all other matters perfectly normal. Hallucination may arise either from an idea on which the mind has dwelt, appearing as something exterior, or from excitement of the sensory ganglia. It is said that Newton, Hunter, and some others of equal professional eminence, could, at will, picture forms to themselves till they appeared to be realities.
