ALL WATCHES ARE COMPASSES.

"A few days ago an American gentleman, being asked which point was the North, pulled out his watch, looked at it, and at once pointed to the North. To explain, he said: Point the hour hand to the sun, and the South is exactly half way between the hour and the figure XII on the watch. For instance: Suppose it is 4 o'clock. Point the hand indicating 4 to the sun and II on the watch is exactly South."—Extract from London Truth in Jeweler's Guide.

If you have not a good Watch to prove the above, call and get one of our ROCKFORD, WALTHAM or ELGIN WATCHES; and if you cannot see the figures on the dial distinctly, a pair of our best Spectacles might aid you.
