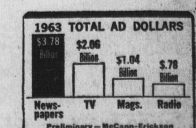
In the big romance between clothes and the girl ...the newspaper is the go-between

Every woman loves clothes, period. She loves to look at the newspapers to see what's in, what's out, who's wearing what. When she reads the fashion ads, she feels she's in the store. And quicker than you can get there checking ad response, chances are she will be in the store. Because newspapers are the ideal medium to tell the clothes story; they tell where to buy, and in their detailed sketches or photographs, they can give a woman the essential buying information. (Just as true in foods, home furnishings, cars, and everything else.) No wonder newspapers are the No. 1 advertising medium, with more dollars invested than all other major media combined.



MORE MONEY IS INVESTED IN NEWSPAPERS THAN IN ALL OTHER MAJOR MEDIA COMBINED!
