

# We Are Proud and Happy

to be a part of the economy of Prince Edward Island

Our first impression of this Province was one of beauty and the further impression that this is an ideal place in which to grow and process the high type of food products that Canadians have come to expect of us.

As we built our plant we found a new experience—the complete support of an excellent group of men who formed our construction crew. Many of them will remain with us and become a permanent part of the Langley family.

But beyond all of this has been our experience in working with officials of the Government of Prince Edward Island, the Town of Montague and its people and a host of Island suppliers who have helped us with the materials we needed to build our plant.

From the beginning this has been a many-sided cooperative venture. Had any one segment failed to play its part our plant would not be in existence today and ready to operate.

We are proud of our new plant and we are happy it is located in Prince Edward Island. To the Government, the Town of Montague, and to all who have given us their help and friendliness we say, "Thank you." The best of our venture together is yet to come. Men and women will be manning our plant. Island farmers will be supplying our raw product needs. We will be needing many of the special services that are required for a plant such as ours. And as we grow there will be many occasions when the Government of Prince Edward Island and the Town of Montague will be working closely with us.

Together we have come a long way. Together now we will all realize the benefits of our mutual effort.
