Expect Details Of Wheat Agreement

OTTAWA, (CP)—New light on some puzzling aspects of proposals for a new International Wheat Agreement may be shed by Trade Minister Howse next Monday, particularly on the position of the United Kingdom, key world wheat buyer.

The minister is expected to make a statement in the Commons on the terms tentatively agreed to by a majority of the 46 negotiating countries. Britain, the world's biggest wheat importer, has declined to sign.

There are some doubts in this capital whether a new agreement can work without Britain's participation.

Some experts believe that many important countries which signified preliminary approval of terms for a new pact will reconsider their stand and decline to ratify the agreement if Britain does not sign eventually.

At the same time there is a feeling that Britain can be persuaded to change her mind and enter the pact, possibly after a direct appeal by Canadian, American and Australian governments to Prime Minister Churchill. France is the other major exporter.

U. S. To Halt Border Patrol

WASHINGTON, (AP)—The Eisenhower administration has decided to wipe out the 11-plane air patrol now being used to guard United States borders against illegal immigrants.

The decision became known with the release of recent justice department testimony before the Senate appropriations committee on a department money bill.

Several senators expressed concern at the action and an immigration service official testified he was "astounded" by it.

This official, Willard F. Kelly, an assistant immigration commissioner, told the committee "to wipe out our entire air patrol which is so vital to many of our border patrol operations is simply incomprehensible."

Senator Margaret Chase Smith (Rep-Me.) said she was worried about it "because of our long wooded border between Maine and Canada."
