### EDUCATIONAL.

The following is the course of studies for candidates preparing for teachers' licenses:—

#### THIRD CLASS.

(Examination January, 1881.)

English.—Parsing and Analysis of passages from the 6th Royal Reader, pages 154-175. Currie's Grammar. Reading. An abstract of a narrative.

History.—Outlines of English History. History of Prince Edward Island.

Geography.—Geography of the Dominion. Outlines of general geography.

Arithmetic.—Smith's smaller Arithmetic, throughout. Smith's Advanced Arithmetic to the end of Decimal fractions.

French (optional)—Same as for second class.

#### SECOND CLASS.

(Examination, June, 1880.)

English.—Paradise Lost, Book I. 386-795. History.—The Roman and Saxon periods.

Geography.—Geography of the Dominion minutely. Great Britain, Europe. (Campbell's Geography.)

Arithmetic.—Smith's Advanced Arithmetic or Greenleaf's new Practical Arithmetic.

Algebra.—Colenso to the end of simple equations of one or more unknown quantities.

Geometry.—First three books of Euclid with exercises.

Chemistry.—Kemshead's: Chapters 1, 2, 3, 7, 8, 9.

Latin.—Bryce's first reader, Part I; Caesar's Gallic War, Book I.

Book-keeping.—Eaton & Frazer's.

French.—Grammar; Telemaque, Books I and II; Hall's First Course.

School Management.—Morrison's.

Note.—Book-keeping of French may be omitted.

#### FIRST CLASS.

(Examination, June, 1881.)

English.—Brooke's English Literature, throughout; Shakespeare's play of Coriolanus; Currie's Grammar. A special exercise in composition will be given on the subject matter of the Play, or on the English Literature, (Brooke's.)

History.—British History—the Roman and Saxon periods; Smith's smaller Roman History to the death of Augustus.

Geography.—Lawson's Elements of Physical Geography.

Arithmetic.—Smith's (advanced) or Greenleaf's new Practical Arithmetic.

Geometry.—Six Books of Euclid, with exercises.

Chemistry.—The first nine chapters of Kemshead's Inorganic Chemistry.

Natural Philosophy.—Simpson's Natural Philosophy, first and third divisions.

Latin.—Grammar; Cicero's First Oration against Cataline; Virgil's Aeneid, Book VI. (416-901) Arnold's Prose Composition, Ex. (1.44).

Algebra.—Colenso's to the end of Quadratics.

Greek.—Bryce's First Greek Reader, part I. Xenophon's Anabasis, Book I.

French.—Grammar; Hall's Second Course, to page 78. L'Avare (Moliere.)

Trigonometry and Practical Geometry.—Hanna's Trigonometry, chapters 1, 2 and 3; Chamber's Practical Mathematics, solution of plane triangles; heights and distances.

School Management.—Morrison's.

Music.

Note.—Females may omit Greek, Trigonometry and Practical Geometry.

FIRST CLASS HONORS (Academic Class.)

The examination for this class will be open to all first-class Teachers of two years' experience, who have obtained first rank in professional work.

Latin.—Arnold's Prose Composition, Part I. Horace, Odes, Book I. Livy, Books XXI, chaps. 1-37.

Greek.—Arnold's Prose Composition. Homer, Iliad, Book I. Herodotus, Book I, chaps. 1-42.

French.—Moliere, Le Bourgeois gentilhomme. Racine, Iphigenie. French Composition.

Mathematics.—Algebra, Colenso's Students Algebra (throughout.)

Geometry.—Euclid (with exercises), solid Geometry, and Geometrical conic sections.

Trigonometry.—Plane and spherical Trigonometry, with practical examples from Chamber's Mathematics.

English and English History.—The History and Literature of the 19th century. An acquaintance with the principal works of the period required. English language (Angus').

Candidates, in order to obtain the grade of license sought, must make 50 per cent. of the whole number of marks obtainable; 50 per cent. in English, 50 per cent. in arithmetic; and, also, not less than 20 per cent. in each of the other subjects.

The examination for third class licenses will be held in January and August of each year. Candidates for this grade of license must, after passing the non-professional examination prescribed by the Board of Education, attend one term in the Training Department of the Prince of Wales College for professional instruction, and pass a satisfactory examination therein, after which they shall receive third class licenses.

The examination for second and first class licenses will be held in June of each year. No one will be allowed to take this examination who has not attended a term at the College and Normal School, unless he had previously obtained a license for the third class under the Public Schools' Act, 1877.

D. MONTGOMERY,  
Sup't. of Education.  
Education Office, Ch'town, Aug. 7, 1880.

Rarus trotted a second heat in 2.13½ in Hartford, Conn., on the 23rd August, 1878.

Twenty days before that he went a third heat in 2.13½ in Buffalo. On the 25th of last October, the California wonder, St. Julien, did a first heat in 2.12½ over the course at Oakland, Cal., but these three great performances were all in races against time. The 2.13½ of Maund S., at Chicago last Saturday, is the best time ever made by a trotter in a race against a trotter.

### Correspondence.

We do not hold ourselves responsible for the statements or opinions of our correspondents

To the Editor of the Examiner.

Sir,—A go-as-you-please match took place on the day of the Railroad Picnic, between the excursion train and Fred Bevan, for five miles. It appears that Master Fred was just in time to be too late, for the excursion train—who were nearly all on board for home at the time Fred arrived at the station.—When off the train went, leaving him behind, and as the train was going to stop some time at County Line, Fred thought that he would catch her there. So, off he went by the main road at the speed of a deer, when to his great surprise and astonishment she had just left him again, so he came to the conclusion to give up the chase, and lay off for the Express, that was shortly expected. It appears Fred went to the picnic to combine business with pleasure, as it was arranged that a 30 minute, go-as-you-please match was to take place, but when his opponents saw Fred in such good condition for the race, and dressed in his gay running costume, they one and all backed out—leaving him master of the track. We understand that Fred is now preparing himself for the Caledonia match, and will no doubt give a good account of himself on that day. His younger brother Job, a coming runner and pedestrian, took first purse at the Railway Picnic race that day, as well as the first prize at St. P's T. A. and B. S. picnic race, held at Mr. Handrahan's grounds on Wednesday last, against seven competitors. This same young Bevan made extraordinary running in the Skating Rink, among the men in the five-mile race—he having made the distance in the short time of 37 minutes, despite the mean attempt of one or two of the mean young men who tripped and threw him several times, while in the race. If young Bevan only takes care of himself for the next three or four years, he will, with a little training, make one of the swiftest runners of the age. We wish the young fellow much success.

SPECTATOR.

### A Husband's Discovery.

ANIMATED NIGHT SCENE IN THE HOUSE OF A MONTREAL CITIZEN.

A few days ago a young French Canadian gentleman, well known and highly esteemed as a man of honor, a resident of St. Hubert street, had occasion to go into the country for a time on a pleasure excursion, leaving his wife and children at home. He returned home hastily the same evening, and upon trying the door found it locked. He rapped, and waited for a time, expecting his wife to go down and admit him. He noticed at the same time a light in his bedroom. At length it flashed upon him that burglars might be in the house, and without more ado he burst in the door and rushed to his room. He could see no one, but the light was turned on and the bed had been recently vacated. He tried one door after the other, and then came to the wardrobe. Pulling open the door, he discovered, to his utter bewilderment, a man and woman in a semi-nude state. The woman was his wife, the man a doctor well known in French Canadian circles. But a still greater horror awaited him, for upon dragging the man into the light he discovered that he had in custody his wife's uncle. The wife screamed, and the doctor implored mercy, "Pour le bon Dieu!" The enraged and outraged husband seized a rifle and demanded which of them he should kill first, as both should die. They fell upon their knees and implored mercy for their conduct; the woman adding that, if only for their children's sake, her husband would not place his own freedom in peril. This appeal stayed the hand of the husband, and bundling the pair into the streets as they stood, he locked the door, and informed the nearest police that there were to be found at a certain street, in a gateway, a man and woman who wanted some clothes to cover their nakedness. The husband is a military man, and he has seen service in Italy and France.—Toronto Globe.

### A Chilean Vessel Blown Out of the Water.

ONE HUNDRED AND FIFTY PERSONS KILLED BY THE EXPLOSION.

The Chilean transport Loa was blown up in the harbor of Callao by a Peruvian torpedo boat set afloat by Peruvian officers on the 3rd of July. The boat was an ordinary one with 300 pounds of dynamite in a false bottom, which carried considerable fruit, etc., and was so arranged that any additional weight would explode the dynamite. The Loa's crew discovered it and towed the boat alongside, when the explosion occurred. The Loa was almost lifted out of the water and sank in a few minutes. Every house in Callao was shaken to the foundation, and other ships shook as if an earthquake was taking place. About 150 men perished. Forty were picked up by boats, but many died. The second commander was wounded, and the surgeon and one engineer were the only officers saved. The condition of things in Lima is daily becoming worse. One decree follows the other in rapid succession, and the purpose of nine tenths of these appears to be to divert the attention of the people from the actual condition of affairs. In the meantime the Chileans are recruiting actively, and by the first of October they expect to begin the siege of Lima. By that time the foreign element remaining will be greatly reduced, and but few will be left as spectators of the final
