

### YOUNG SEALS ARE CAUGHT

The Matthews' sealing party returned to Alberton on Sunday bringing back two live 49-pound seals, shown above with Glen Matthews, for air shipment to Ocean Park, California, about 3,000

miles were landed by the Alberton group since sealing got underway on March 6 at North Cape. Two trichloroethylene were being reaped yesterday for shipment to Halifax. Sealing has been abandoned at

St. Peters owing to dangerous ice conditions. For seal hunting next spring, Matthews plans to obtain helicopters instead of the light planes used this spring.

The Guardian, Charlottetown, Tues., Apr. 8, 1962.

## The Ponds in Hazard

Fishermen who were anxiously waiting for the opening of the season on April 15 so they could re-visit their favorite fishing spot may be in for some disappointment. A number of dams in the province have been washed out as the result of torrential rains and melting snow over the weekend.

Dams known to have been washed out include Bonshaw, Sturgeon, Hestherdale, and Elmisdale.

The dam at Gordon's pond near Alberton overflowed for a time Sunday night but was not damaged. The dam at North Cape was also washed out but the loss of the dam at Bloomfield, N.H. is also reported to be holding.

A heavy flow of water was threatening the old Shaw MacNeil by-pass dam at Alberton. Water had overflowed the top of the structure and was cutting two wide and deep channels in the face of the dam.

and Monday it was announced the dam was past. Reports from the Befecore area said that a dam had withstood the flood waters fairly well and all danger is thought past.

In southern Kings Montague reports of washed out culverts, bridges and highways continued to come in at a late hour last night.

It is felt that it will be some time before the full extent of the damage is ascertained.

Dams reported in danger but still holding include Ross' dam at Bridgetown, the Valleyfield dam, Knox's dam, all dams at Moore's factory, and the dams at Murray River; all were reported in dangerous condition.

# A Railway Lines Reported Intact

A close vigil on all island railway lines has apparently prevented any serious damage from flooding, the CNR reports. The CNR dispatcher at Charlottetown said so far there have been no reports of any serious washouts on any of the lines in the province.

Heavy ice pressure coming up against some of the subverts under the track in widely scattered locations caused a few anxious moments. Track crews were rushed to the location and were successful in breaking up the ice, preventing the culverts from being washed out.

The dispatcher said that since early Sunday all track crews maintained a 24-hour watch on all lines. In the course of their vigil, they came across a number of spots where the track bed started to soften and the water

was quickly diverted before the softening reached the proportions that would hamper the passage of trains.

All passenger trains were operating on a schedule, the track crews will continue their constant patrolling of the lines, as reports indicate that in those areas where tracks run through wooded areas, the water was rushing out in torrents yesterday.

Left unwatched, these streams could cause serious track damage.

## Parliament At A Glance

By THE CANADIAN PRESS MONDAY, APR. 2, 1962. Agreement by Hong Kong to maintain quiet for cotton exports to Canada was reported by Maurice Allard.

A bill forcing corporations and unions to disclose certain financial statistics in Turkey, second reading—approval in principle.

The Comm on a meets at 2:30 p.m. to debate government financial statistics in Turkey. The Senate meets at 8 p.m.

## ST. PETERS

(Continued from Page 1) yesterday morning when flood waters and heavy ice tore the concrete deck and wooden pilings from under the structure. The concrete-decked span collapsed and left only a short piece of one end standing.

Raging torrents of water poured under other bridges on the road. The major bridge on the road at Motel had no open water under it yesterday. There had not been any movement of ice.

Insurance were available for professional training of island residents in health.

"That program has been in effect for years," he said, "and that section gives the impression that the previous minister of health did nothing to establish a better training staff."

He said that the former Sherrill Elizabeth Smith of Glen Falls, N.Y., said "we'll be so happy. We'll be together and near America. David doesn't have to go back to Turkey."

He told reporters Canada had provided visas for him and his American wife, who is expecting a child in the fall.

"This is really wonderful," Ebeoglu said. "My wife and I will be able to go together and it will not be two far away from me."

He had protested his deportation because, he said, "there is no nuclear science in Turkey. U.S. immigration officials originally ordered Ebeoglu to leave the country because, however, he was granted an extension to receive his degree from RPI in June."

Ebeoglu will teach and do research in Canada.

(Continued from Page 1) which was the only possible road leading to the eastern section of the province, left before curfew and returned to Charlottetown yesterday, completely isolating that section from the rest of the province with the exception of impassable clay roads. This washout cut the banks of the river back to a distance of forty feet.

In addition to numerous washouts on the shoulders of paved roads in the Southern Kings area, dirt and gravel roads also had severe damage from washouts. In places the worst of these were filled in during the day to permit the easier flow of traffic.

Today the department of highways will continue to repair curbs on the province, it is reported that road machines will commence scraping and working on clay roads.

## Canada Offers Sanctuary To Scientist Challenge Unanswered

TROY, N.Y. (AP) — Canada has opened its doors for David Ebeoglu, a nuclear scientist who has fled Turkey to escape the United States in accordance with the terms of his admission to the country.

He has been named assistant professor of physics at Dalhousie University, Halifax, at a starting salary of \$10,000 a month, Ebeoglu said Monday.

The 27-year-old Turkish exchange student, ordered to leave the U.S. by the end of June, will assume his new position July 1, two days after he becomes the first person to receive a doctorate in nuclear science and engineering from Rensselaer Polytechnic Institute.

He told reporters Canada had provided visas for him and his American wife, who is expecting a child in the fall.

"This is really wonderful," Ebeoglu said. "My wife and I will be able to go together and it will not be two far away from me."

He had protested his deportation because, he said, "there is no nuclear science in Turkey. U.S. immigration officials originally ordered Ebeoglu to leave the country because, however, he was granted an extension to receive his degree from RPI in June."

FARM FOR SALE AT CLINTON

75 acre Ellen Woodside Farm located on the north side of the New Canada road, about 5 miles from Kensington and 5 miles from Clinton Village. Beautifully located with swimming and recreation area for boats, etc. on North side of farm which has water frontage. Farm in high state of cultivation. Ten room house, oil heated (space heater), pressure water system throughout buildings which are in excellent condition. 80 foot by 100 foot concrete driveway, 100 foot by 100 foot concrete driveway, 60 foot long water can be used for private place which can land on 1800 foot runway. Licensed driver, Department of Transport, 1946-61. The farm is offered complete including a summer place at the shore and may be purchased with machinery and livestock. Donations will be considered with interest of five per cent.

For further particulars apply: F. A. LARGE, Q.C., 140 Richmond Street, Charlottetown, telephone area code 965-891-3544 or 891-4928

# RCMP Band to Attend S'ide Lobster Arrivals

SUMMERSIDE — The directors of the Summerside RCMP Band and Livestock Exhibition met Sunday night to discuss the band's participation in the lobster arrivals in Summerside.

Members ranging from ordering places at the opening of the RCMP band were discussed. It was suggested several meetings be held to discuss the arrangements so that one form of advertising the carnival would be to make use of place-mats in restaurants.

After discussion last evening it was decided to contact leading restaurants in Summerside and to have the band perform at the opening of the RCMP band.

President Johnson revealed that a major objective is to be formed in Summerside right away under the tutelage of Miss Ann Bell who has had several years experience in this field. So far 14 girls have joined the corps which will perform at the carnival.

Dieck Wedge told the meeting the newly organized Summerside Junior Chamber of Commerce are interested in taking part in the carnival. Amos H. Hubley said he thought this "is a wonderful gesture." He said they need support by this organization. Suggestions were put forward and it was decided that some project would be arranged for the Joyce group.

Plans were also made for the president and manager to meet with Blyden Willis, secretary-manager of the Foremen's Club regarding racing matters. Discussion also centered on placing carnival ads in mainland newspapers but this matter was left to the committee, headed by Gordon Simmonds, after several suggestions were put forward.

## LATE NOTICES

(Also see announcements in columns adjoining Classified Advertising section.)

NEILL—At the P.E.I. Hospital, Charlottetown, Monday, April 2, 1962, William H. Neill of Millis in his 92nd year. Resting at the P.E.I. Hospital, Charlottetown, until noon Wednesday, then to the home of his son, Arnold Neill, 1000 Main Street, Charlottetown, Thursday, April 5, from Fairview Baptist church, service commencing at 2:30 p.m. Interment in Lorne Valley cemetery.

## AT TYNE VALLEY

A dam at Tynes Valley was threatened by a heavy flow of water. Although the flow of water is receding, the threat of washouts still exists in all these areas.

Daniel MacPhee at Heathersdale said the postman was the worst rush of water on the river since 1926.

Conservation and fishing dams in Eastern Kings were reported largely intact but some ponds in southern Kings and Queens also are reported to have been damaged.

A report from Souris last night, which could not be confirmed, said that popular fishing spot known at Whitlock's dam had washed out near Dundas.

passes and overpasses at Summerside. The investigation committee, Attorney-General McQuaid said "My department is not a committee, fully investigating all department traffic accidents. In every case where there is the slightest suspicion of blame—that is investigated. A coroner's inquest can be called not only when we think someone to blame but if for no other reason, to free persons from blame in case court action is later taken. We will continue to investigate all fatalities."

Harold Smith (4th Queens) asked if the attorney-general had called off an inquest last year.

Mr. McQuaid said he said, "That was the case," he said, "where three young men, including the driver of the car were killed. Two other passengers escaped injury after full investigation by the RCMP. I was decided that there was no one to absolve of blame. Having an inquest would have served no purpose other than recall to the parents. Our practice, however, is to call an inquest."

TAKEN EXCEPTION Dr. Bennett's objection to a paragraph in the report in which the committee stated that it was a committee of doctors and not the commission, that decides on such matters.

Dr. Bennett said that a few years ago federal government may offer another trans-Canada highway in the province. If that happens then we should have undertaken it."
