

WEATHER OUTLOOK

The United States weather bureau predicts that much of Canada is in for below-normal temperatures and above-normal rainfall during the July 15-Aug. 13 period.

These maps, based on the bureau's 30-day outlook, show that temperatures are expected to average below normal seasonal readings from the Great Lakes almost to the foothills of the Rockies while precipitation is expected to be heavy in Eastern Canada and much of Western Canada's grain-growing areas. Figures given with each map show normal temperatures, and normal precipitation in inches of rainfall for various cities across the country during the 30-day period. (CP Newsmag)

Bullocks Generate Electricity In India

NEW DELHI (AP)—A device launched Friday may revolutionize the life of rural India. It is an electric generator and pump powered by bullocks, India's main motive power for generations.

With Prime Minister Nehru looking on, a pilot unit went into operation in Khanpur village, 18 miles south of Delhi.

The project was brought about under joint auspices of the Ford Foundation and India's community development ministry. It cost \$5,000, but mass production is expected to cut this to \$3,000.

The unit can pump water to meet the needs of villages and irrigate 100 acres. And the generator can deliver 4 1/2 kilowatts of power.

The unit is the result of research by Leigh S. Stevens, 67, of Yemassee, S.C. He developed the idea after touring this country in 1954 as an industry member of an international study team on small industry development.

NEHRU SHOWS INTEREST

Friday he heard Nehru express keen interest in the potentialities for India's 700,000 villages—the homes of more than four-fifths the population.

For centuries Indian cattle have pumped water by the Persian wheel, trudging in a small circle and forcing up a maximum of 100 gallons of water a minute. The new unit triples the amount of water. When a switch is thrown the bullocks go on working—but producing electric power which can be used immediately or stored.

Eight bullocks, four to a side, pull the pump. Tests will determine the best number to use.

N.Y. Stocks In New 1958 High

NEW YORK (AP)—The stock market bulled ahead to successive new 1958 highs last week on the heaviest volume of the year. It was the market's fifth straight weekly rise. Prices were at their best average level since Aug. 5, 1957.

The Associated Press average of 60 stocks rose \$4.60 to its latest 1958 peak of \$182.70.

The Dow-Jones industrial average pierced the 500 barrier, making its new high of 501.76 for this year.

Turnover swelled to 18,561,325 shares, the biggest total since the week ended Oct. 26 when a rapidly falling market climaxed its descent with volume of 20,804,199 shares.

Previously neglected chemical stocks drew trading interest and went ahead for gains. Late in the week distilling issues were boomed by a favorable action on liquor bonding taken by the Senate finance committee.

Among heavily traded gainers were Schmeley up 4%, Burroughs 3%, Hooker Chemical 3%, Monsanto 3 1/4%, General Electric 2%, American Cyanamid 2 1/2% and U.S. Steel 2%.

The five most active issues on the New York Stock Exchange this week were: American Motors, up 2% at 14 1/2 on 408,400 shares; Crucible Steel, up 1/4 at 24 1/4; Avco, up 1/2 at 7 1/2; Bethlehem, up 1 1/2 at 45 1/2; and Olin Mathieson, up 2 at 36.

Auto Firms In Market For Steel

CLEVELAND (AP)—Increased activity by automobile manufacturers and, to a lesser degree, the Middle East crisis helped last week to sustain the steel industry's slow recovery, Steel Magazine reports today.

Furnaces operated at 56 per cent of capacity last week, up half a point from the previous week.

A desire to get 1959 automobile models into production and low steel stocks prompted Chrysler Corporation and General Motors Corporation to order steel for August and September delivery. Ford Motor Company is expected to start ordering soon.

A reversal of consumers' policy of keeping inventories at a minimum may result from the Middle East crisis, Steel says. Fear of a shortage may cause some consumers to step up orders.

One oil drum manufacturer, Steel observers, guessed more drums would be needed to airlift oil to the Middle East.

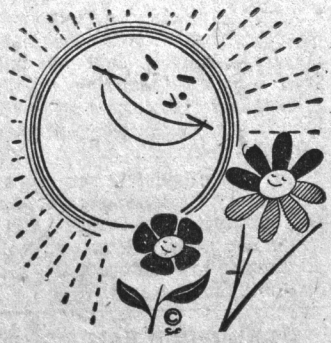

Scrap prices continued a four-week climb last week. The magazine's composite price on prime grade scrap rose one dollar to \$37.67.

MILK YIELD RISES

OTTAWA CP—Canadian milk production in June totalled 2,140,000,000 pounds, about 5.6 per cent more than in June, 1957. The bureau of statistics Friday also reported total production for the first six months of this year at 8,504,000,000 pounds.

HOT WEATHER IS WONDERFUL

BUT! IT PLAYS HAVOC WITH FOOD . . .

Spoiled food is wasteful and costs Extra Dollars . . .

USE those WASTED DOLLARS to buy a new 1958 Refrigerator

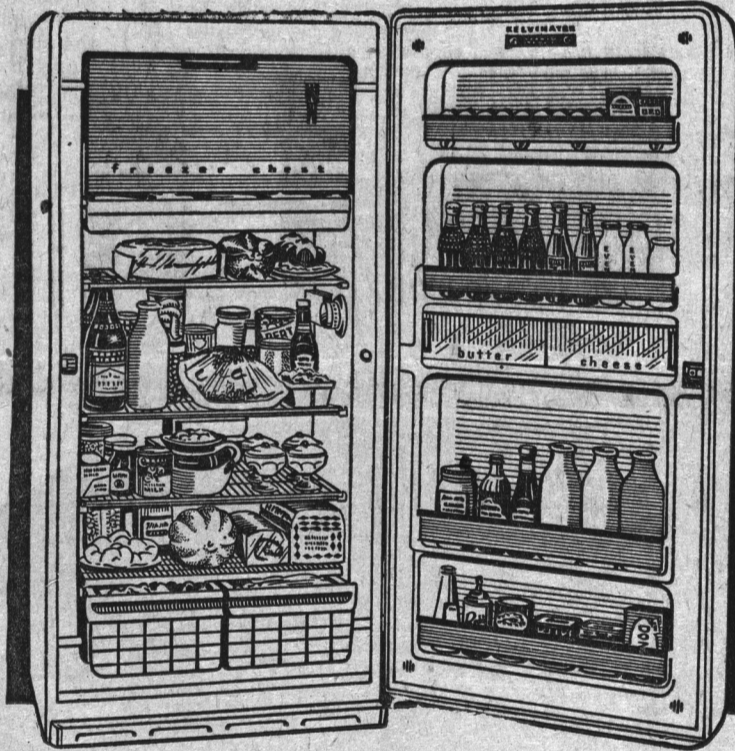

BUY THE FINEST NAME IN HOME REFRIGERATION ---

KELVINATOR

at Crockett and Storey Ltd.

Extra Specials for One Week Only

11 Cu. Ft. \$44⁴⁵ SAVE

Family Size --- 11 cu. ft.

1958 MODEL REFRIGERATOR

Meticulously engineered and designed for maximum capacity and conveniences with minimum size. . . .

- Only 28" wide. 30" deep
- Holds 52 lbs. Frozen Food.
- Meat tray holds 15 lbs. Additional.
- Large capacity twin crispers.
- Heavy door with easy cleaning door shelves.
- Trouble free Latch Mechanism.

Regular \$344.50 **\$299⁹⁵**

Special—this week only

13 cu. ft. Deluxe
31" Wide—30 3-4" deep.
Regular \$499.95

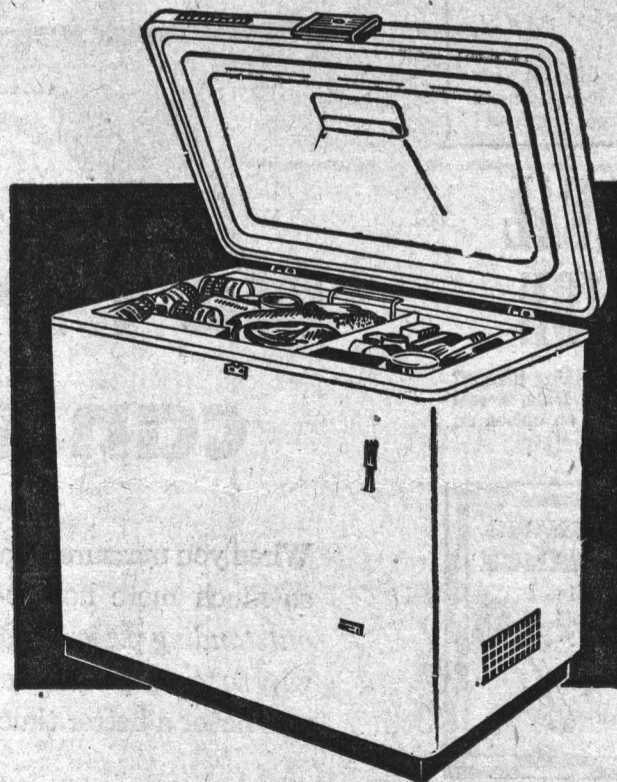

SPECIAL 429⁰⁰

10 Cu. Ft. Freezer
SAVE \$80⁰⁰

IMAGINE! your own "fresh-frozen" fruits vegetables, meats, fish, game birds etc—and you can put up and preserve for use in the long winter months with a KELVINATOR FREEZER.

MODEL 10 cu. ft. **\$319⁰⁰**
Reg. 399.00 for

MODEL 15 cu. ft. **\$359⁰⁰**
Reg. 479.00 for

8.5 Cu. Ft. \$44⁵⁰ SAVE

Utility Size --- 8.2 cu. ft.
1958 MODEL REFRIGERATOR

Kelvinator is proud of its achievement in producing this utility sized refrigerator incorporating finest engineering features, design and conveniences at such low cost.

- Only 24" wide—28 3-4" Deep.
- Holds 52 lbs. Frozen Food.
- Heavy door with easy cleaning shelves.
- Trouble free latch mechanism.
