THE DAILY EXAMINER

THE LEADING DAILY NEWSPAPER OF P. E. ISLAND,

Is issued every afternoon, from the office of THE EXAMINER PUBLISHING COMPANY, in the London House Building, Queen Street.

RATES OF SUBSCRIPTION.
(IN ADVANCE)

ONE YEAR.....$4.00
SIX MONTHS.....2.00
THREE MONTHS.....1.00
ONE MONTH.....0.35

Sent post paid to any part of Canada or the United States.

ADVERTISING RATES.

For small advertisements which are ordered for only one or two weeks the charge is 5c cents per inch for the first insertion, and 20 cents for each continuation. Rate cards are furnished on application at the office. Special contract prices at a reduced rate are quoted for advertisements four inches in size or larger, which are to run for three months or longer.

No special notices inserted unless paid for at the rate of 10 cents per line, and under no circumstances will such paid notices appear in the local column.

Special discounts made on all advertisements connected with Church Fairs, Bazaars, Picnics, etc. No notices will be inserted with the same unless the regular rate of 10 cents per line is paid.

That THE EXAMINER is considered by our Merchants and Manufacturers to be the leading newspaper in P. E. Island, and consequently the most valuable advertising medium through which to make their announcements public, is abundantly proved by the fact that in order to accommodate our advertisers we have been compelled to enlarge the paper to its present size.

THE DAILY EXAMINER is for sale by the following agents:—
R. H. Mason, Post Office, Charlottetown
J. McIntyre Malpeque Road, "
C. Paul, Lower Spring Park Road, "
W. M. Coffin, Grafton Street, "
S. Grey, cor. Water and Prince St. "
D. Chappell, Prince Street, "
Bazaar Store, Queen Street, "
Geo. Carter & Co., Queen Street. "
S. Gray, News Stall, P. E. I. Railway, and on the trains.
M. & T. J. Walsh, Eclectic Bookstore, Summerside.
Harry McFarlane, Souris.
Hon. D. Gordon, Georgetown.
D. A. Egan, Mt. Stewart.
G. M. Clarke, Alberton.
Chas. A. Gillis, Orwell Cove.

The Weekly Examiner

Is issued every Friday morning from the publishers' office. It is made up of matter which has appeared in the Daily editions, and is a first-class weekly newspaper—interesting and full of the latest news.

The subscription for THE WEEKLY EXAMINER, post paid to any part of Canada or the United States, is one dollar per year.

Advertising rates on the same scale as given above for THE DAILY EXAMINER.

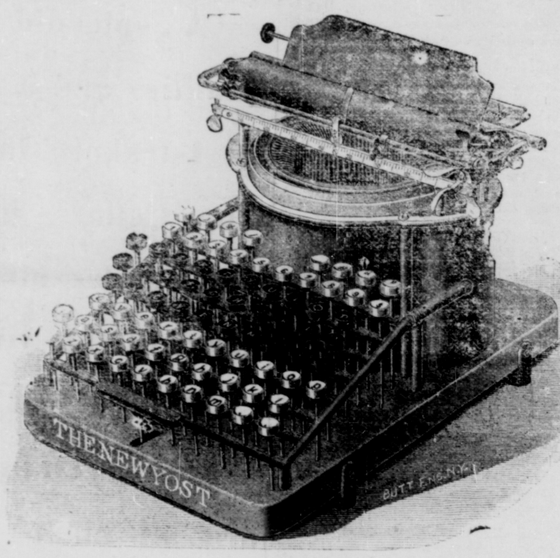
NEW SERIES. CHARLOTTETOWN, P. E. ISLAND, TUESDAY, NOVEMBER 28, 1893. VOL 33.—NO. 128

The Yost Typewriter.



THE NEW YOST

the only Perfect Writing Machine. The Ribbon, the Shift Key and other antiquated devices discarded.

NEW MACHINE,
NEW MANAGEMENT
NEW PRINCIPLES,
NEW PATENTS,
NEW MEN,
NEW LIFE,
NEW BRAINS,
NEW METHODS,
NEW CAPITAL,
The LATEST and BEST.

WHAT MUST GO:—Bad alignment, illegible work, foul ink ribbons, bothersome shift keys, double scales, etc., are no longer to be tolerated or pardoned. The NEW YOST has abolished them, and no other can retain them and live.

THE NEW YOST combines the life-long experience of the inventor, G. W. N. Yost, who invented the "Remington" in 1873, the "Caligraph" in 1880, and the "Yost" in 1889; the latest and best improvements have been added during 1892, making the New Yost an ideal, perfect typewriter. The New Yost prints direct from steel type; its work is never blurred, but is clean cut and beautiful. The alignment is absolutely perfect and permanent. The paper is an ideal success, the best ever applied to a typewriter. The line spacing absolutely perfect.

CABBAGE A PAYING CROP

HOW TO CULTIVATE IT AND HOW TO STORE THE HEADS.

A Suggestion for Growers—Cows That Eat a Great Deal More Profitable Than "Easy Keepers"—Cut Straw and Ground Grain as Cattle Food.

Experiments made in New Jersey this season with ordinary late Flat Dutch cabbage, and the use of about 400 pounds of mixed fertilizer per acre, show that by supplying an abundance of plant food, and the use of the best seed, cabbages can be made an important crop. One plot of 350 cabbages now average 12 inches across the heads, some of them being 15 inches. It is plain that such cabbages will bring at least 10 cents each later in the season, and as from 4000 to 5000 can be grown on an acre (according to the distance planted), a large profit should be obtained. It does not pay to grow inferior cabbage.

CULTIVATION.

The land was plowed with a two-horse plow and well harrowed. Early dwarf peas were planted, harvested and the ground again plowed for cabbage, the fertilizer broadcasted, but a small proportion was withheld for use around each plant. The rows were four feet apart, the plants being about three feet apart in the row. They were cultivated once with a one-horse cultivator, and then with a hand-wheel hoe during the remainder of the season. The plants were set out the middle of July, and in the proportion of 3500 plants per acre. A slight sprinkling of fertilizer was applied around each plant for a few days after they stood up. For a while the season was very dry, but not sufficiently so to do much injury, as the location is somewhat damp. The plants were worked after each rain, so as to keep an inch of the top soil always loose. The size of the heads make the crop three times as large, by weight, as was ever before grown on the land, the secret being the liberal use of fertilizers, good seed, and keeping the soil stirred and loose.

STORING THE CROP.

The cabbages will be stored away roots down. The usual custom of burying the heads in New Jersey is that they become sealed up when frost is in the ground, and they then rot when the frost leaves. Last winter (a cold one) the cabbages were placed in a row, roots in the ground and heads out; then another row close to the first, and so on, the whole forming a compact mass of cabbages, which bed of cabbages was covered with six inches of salt hay, stalks placed on the hay and a few boards (to shed water) placed on the stalks. When cabbages were wanted the hay was removed, the heads cut from the stalks and the hay replaced. They could be had at any time, and were always green and fresh-looking. Not one rotted, although they were frozen. The hay prevented sudden thawing. When the cabbages were gone the hay was removed, and the stalks produced early greens. By this method the cabbage plant is kept over winter alive, as the sprouting of the stalks in the spring demonstrates. Cabbage growers should try it.

ALL FOR THE FARMER.

The World's Fair Dairy Tests—Green Food and Steamed Grass.

The dairy test at Chicago showed that, while some cows were capable of producing more milk and butter than others, the cost of the product for each cow also differed. The cow that the farmer should have is not the "easy keeper," but the one that can eat a large quantity of food and convert it into milk and butter. It matters not how much the cow eats, provided she produces correspondingly.

Green food that has been preserved, such as ensilage, differs greatly from that which has been first dried and then steamed. When the water is evaporated from grass there is a rearrangement of the particles, and no amount of water added afterward will restore it to its original condition. The natural juices are solvent that cannot be replaced by any artificial methods. Ensilage contains the juices of the plants at the time of harvesting, and is therefore, more easily digested than corn fodder that has been moistened or steamed.

The man who manages the dairy will sometimes complain of his failure to secure a profit, and ascribe his lack of success to his stock, when he is at fault in lacking knowledge of his business. Years spent in following old methods are sometimes wasted. It is the man who is not afraid to learn, and who does not "know it all," who succeeds.

The manure from a horse or cow, according to experiments made at Cornell University, is estimated at about eight cents per day, or $29.20 per year. In estimating the receipts from each animal the value of the manure should be included, and it may change a supposed loss into a profit, as the manure is as valuable as the crops.

A point not to be overlooked in the World's Fair Dairy test, was that a large number of cows were rejected as lacking in constitutional vigor. They were capable of producing more than the average amount of butter, but could not stand the test of feeding at the Fair, owing to close in-breeding and the hot-house condition under which they had been kept.

Try irrigating a small plot next year, by way of experiment. The windmill will supply the water. It will, at least, teach something, and may even lead to a revolution, especially in the cultivation of small fruits and vegetables.

The sources of fertilizers are inexhaustible. A few years ago the suggestion that a valuable fertilizer would be obtained from rain would have been received with doubt, but basic slag, one of the richest substances in phosphoric acid, is now derived from the iron furnaces.

Home-made manure is more valuable than any other because it contains a greater variety of substances than commercial fertilizers, but its quality depends upon the materials of which it is composed, and their preservation in the heap. No two loads of manure are alike, and unless it is of the best quality the manure may not pay for the cost of hauling to the fields.

To Dispel Colds.

Headaches and fevers, to cleanse the system effectually, yet gently, when costive or bilious, or when the blood is impure or sluggish, to permanently cure habitual constipation, to awaken the kidneys and liver to a healthy activity, without irritating or weakening them, use Syrup of Figs.

HUNDREDS of ladies in ill health have been or are being restored to health and trength by the use of Hawker's Tonic. t has become the great and popular amily remedy. .....

MISSING LINKS.

The golden-crested wren is the smallest English bird.

The surface of Lake Superior is 600 feet above the ocean's level.

On an average there are 10,000 advertisements a week in the eleven London morning papers.

Electric light is being used as bait by fishermen who ply their calling along the Pacific coast.

Of the 200,000 persons who entered the Cherokee strip on Sept. 16 more than one-half have left it.

Of the officials in one Helena, Mont., church, the president, secretary and treasurer are saloon-keepers.

The only woolen mill in South Africa is at Natal. It produces an average of 1800 yards of cloth per month.

A pie factory in New York runs from 2 a.m. to 2 p.m. six days in the week and turns out 20,000 pies a day.

Central Park, New York, contains over 10,000 building lots, valued each at about $20,000, or in all over $200,000,000.

The property owned by New York City is estimated to have been in value from $277,000,000 in 1874 to $559,000,000 in 1893.

One of the early Washington coins, of which only two specimens are known to exist, bears the legend: "Washington the Great, D.G."

The greatest jumper is the common flea. If a man could leap as far proportioned to his size and weight, he could go from Chicago to St. Louis in two jumps.

The world's hop crop this year is estimated to be 7,600,000 pounds less than last year, although the United States crop is 4,000,000 pounds greater than last season.

London has a big appetite. It devours every year over 400,000 oxen, 1,600,000 sheep, 500,000 calves, 700,000 hogs, fowls innumerable, and consumes 9,800,000 gallons of milk.

Upward of 60 per cent. of the earthquakes that have been recorded have occurred during the six coldest months of the year, the maximum number in January and the minimum in July.

Maps for the use of farmers, describing the chemical qualities of the land in various parts of the country and naming the best manures for each section, have been proposed in France.

Out of seventy-six Irish kings who ruled between A.D. 4 and 1172 no fewer than fifty-two died violent deaths either in battle, by murder or by thunderbolts (by the latter three were slain).

Old authorities taught that an English peer, if he wasted his property so as to be unable to support the dignity, could be degraded by the king; it is now held that degradation can only be affected by vote of his peers.

Highness is an old title that was first used by the later Roman emperors, then by bishops, then by the princes of Italy. Thence its use spread to Germany. It is now applied to princes who are vassals of an empire.

Emperors and Empresses, kings and queens write to each other as brother and sister; reigning grand dukes also enjoy this privilege when addressing kings, but sovereigns not possessing royal honors are designated as cousins.

The discharge of a river is the volume of water it pours into the sea within a given time, usually expressed as so many feet per second. It is estimated by finding the breadth, the average depth and the rate of a river at its mouth, and multiplying.

A New Jersey man claims to be "the chicken king of the universe." His "eccalobeon," or artificial hatching establishment, turns out 250,000 chickens a year. He keeps 2,000 laying hens and buys all the fresh and fecund eggs that are offered him.

English-speaking countries have four different miles, the ordinary mile of 5280 feet, and the geographical or nautical mile of 6085 feet, making a difference of about one-seventh between the two. Then there is a Scotch mile of 5928 feet, and the Irish mile of 6720 feet. In fact, almost every country has its own standard mile.

"Shoe brushes, 10 cents," was what caught the eye of a man passing the shop of a tradesman with whom he had had some dealings. The passer-by went in and said: "That isn't the way to spell brushes." "Of course it isn't," said the cheerful merchant. "That's an advertising dodge. You are the tenth man this morning to come in and call my attention to the mistake."

College catalogues grow in bulk from year to year. It was long the custom of American colleges to make their annuals thin paper-bound pamphlets. These grew and grew until a few of the large colleges began binding their catalogues in boards. After that the growth went on, until at length the Columbia catalogue for '93-4 is a large octavo volume of more than 300 pages.

A canny person, who has a liking for artistic odds and ends and bric-a-brac can get a good deal of it for a little money if he will bide his time and be watchful. Every dealer in porcelains, bronzes, rugs, prints and the like has a certain number of mishaps every year, and when an article of merchandise is a little bit damaged it suffers a sweeping loss in value. The canny one gets his bric-a-brac a little damaged and mends it. A chipped edge on a Venetian glass, an obstinate rust spot on an old helmet, a tear in a print, a smear of wine or ink on a Persian rug, a scratch on a Chinese jar, a break in an ivory carving, enable him to get these treasures for half price, and a little skill and a few cents of expenditure will put them in good order.

At Glastonbury Abbey, in Somersetshire, England, once stood a thorn tree which, it is said, bloomed every Christmas morning. The first authentic account of it ever written was in 1772 by a visitor who tells of it in the account of his visit to the abbey. The keeper assured him that St. Joseph, of Arimathea, landed not far from the town, at a place where there was formerly an oak that had been planted to his memory; that he and his companions marched to a hill and rested themselves, and that Joseph stuck his staff in the ground. Now this staff was a common dry hawthorn stick, but it grew and first came into full flower on Christmas day. Afterward the tree, which had thus grown and budded like Aaron's rod, always bloomed on the day of our Lord's nativity and upon no other day, the flower, like those of the night-blooming cereus, lasting but a few hours. Many queer stories have been told of the "Miraculous thorn of Glastonbury." It was said that if the chips from it were planted they would sprout and grow like potatoes; that the leaves cured all inflammations, swellings, etc., and that "rods" cut from it would never leave marks on the children corrected by their use.

Dr. Chalmers, Veterinary Surgeon, M. R. C. V. S., says: "I used Dr. Manning's German Remedy for neuralgia. It cured me on first application. I have never used anything to equal it. Have made other uses of it and find it excellent.
THOMAS CHILLMERS, P. V. M. S. R. V. S.,
..... Truro, N. S., April 9, 1892.

FOR sick headace, sour stomach, loathing of food, dyspepsia or billiousness, take Hawker's Liver Pills. They will cure you. Recommended by leading physicians as a most reliable medicine. .....
